India Goes Electric with Maruti Suzuki. One India, One EV Charging platform.

- *Maruti Suzuki announces a robust electric vehicle eco-system with a comprehensive end-to-end digital platform for EV charging needs, including home charging and public charging with an integrated payment journey.*
- *As a part of a historic move, Maruti Suzuki has signed collaboration agreements with 13 leading Charge Point Operators (CPOs) and aggregators to provide seamless charging experiences on a single platform.*
- *2000+ exclusive Maruti Suzuki Charging Points accessible across nationwide dealer network. Customers' charging needs are further supported by an extensive partner-operated pan-India charging network.*
- *Maruti Suzuki will work with its partners to enable 1,00,000+ Public Charging Points by 2030.*
- *To demonstrate the unparalleled EV charging network, four e VITARAs were flagged off from Gurugram in all four directions - Srinagar up North, Kanyakumari in the South, Bhuj at the western edge of India and Dibrugarh in the eastern part of the country, as a part of the 'e drive'.*
- *Rigorously tested from 'Sand to Snow' over an extreme temperature spectrum of 60°C to -30°C, e VITARA has performed consistently, delivering a driving range of 543km*.*

New Delhi, 02 December, 2025: Maruti Suzuki India Limited (Maruti Suzuki) announces a historic signing of collaboration agreements with 13 Charge Point Operators (CPOs) and aggregators. Mr. Hisashi Takeuchi, Managing Director & CEO, and Mr. Partho Banerjee, Senior Executive Officer, Marketing & Sales, from Maruti Suzuki India Limited, and other senior dignitaries from CPOs.

Commenting on the occasion, **Mr. Hisashi Takeuchi, Managing Director & CEO, Maruti Suzuki India Limited**, said, *"At Maruti Suzuki, we strive to extend a delightful ownership experience to our customers to build lasting trust. Today, we are taking a historic step, as we enter the domain of electric mobility with full readiness to address the EV charging concerns and boost customer confidence. We have established a robust network of over 2,000 Maruti Suzuki exclusive charging points across our sales and service network, spanning more than 1,100 cities. Further, we have collaborated with 13 Charge Point Operators to offer access to a vast charging infrastructure across the country. Aligned with Suzuki's global vision, we plan to introduce multiple EVs and to support this, our aim is to enable a network of over 1 lakh charging points across India by 2030, along with our Dealer and CPO partners."*

Showcasing the robust EV ecosystem, **Mr. Partho Banerjee, Senior Executive Officer, Marketing & Sales, Maruti Suzuki India Limited**, said, *"Today is the dawn of a new era for electric mobility in India. It gives me immense pleasure to say that Maruti Suzuki is EV ready and will be 'By Your Side' with our comprehensive new platform that addresses key concerns around EV charging infrastructure. Leveraging India's largest dealer network and our charging partners' network, we are ensuring there are EV charging points at an average distance of 5-10 kilometres at key locations in the top 100 cities of India. DC fast chargers are also located at regular intervals along key highways to enable nationwide driving freedom for our prospective EV customers. To further enhance peace of mind, we have deployed a 1.5 lakh-strong specially-trained EV workforce to cater to every need of our customers. We have also activated 1500+ EV-ready service workshops across 1100 cities for meeting after-sales requirements to support EV ownership in every part of the country."*

"Words aside, we are showcasing the prowess of this platform by flagging off a radical 'e drive' that will demonstrate the real-world efficacy of Maruti Suzuki's comprehensive EV charging network. With the 'e drive', we aim to boost user confidence and execute faster EV adoption, working alongside the nation's sustainability goals for net zero," added **Mr. Banerjee**.

The Maruti Suzuki 'e for me' EV charging mobile app enables end-to-end usage of EV charging points from partner-operated charging points and Maruti Suzuki's own EV charging network on a single platform, offering a uniform customer journey for EV charging and payment through UPI or exclusive '**Maruti Suzuki Money**', powered by Razorpay. From the time of booking an e VITARA, the 'e for me' app will serve as a single platform for setting up the vehicle home-charger and ensuring optimal usage, locating public charging points and using them, alongside many other features on the platform.

Key facts of 'e for me':

- **Locate, Pay & Use** EV charging points available on the app.
- **Use Public and Smart Home Charger from the same app.**
- **One card for 'Tap N Charge' functionality** at Maruti Suzuki dealer outlets and home charger.
- **Mirror e for me app on the infotainment system** for seamless in-car EV charging experience.
- **Remotely start/stop and manage the power output** of the smart home charger etc.

The Company has also implemented a robust EV ecosystem which has enabled the Maruti Suzuki showroom network and over 1500 service workshops by making them EV-ready, providing the best EV ownership experience in India, supported by a 1.5 lakh-strong EV-ready workforce.

To validate the remarkable EV charging network readiness, the Company is flagging off the pan-India 'e drive'. As a part of the drive, four e VITARA Born EVs have driven out of Gurugram to all four corners of the country. From Srinagar up North to the coastal tip of Kanyakumari in the South, to Dibrugarh in the East, and Bhuj at the western edge of India in Gujarat, the drive will demonstrate the real-world feasibility of pan-India EV charging and ownership; cementing the robust operational network of nationwide 'e for me' charging points. Building customer trust, the 'e for me app' will be accessible on Apple App Store® and Google Play™ Store, enabling prospective Maruti Suzuki EV customers to view the national network of EV charging points.

Made-in-India and exported around the world, the e VITARA Born EV is a globally benchmarked product. Rigorously tested over 1 crore test kilometres spanning some of the most gruelling road conditions from 'Sand to Snow'; the **e VITARA has performed consistently over extreme temperatures ranging from -30°C to 60°C, with a driving range of 543 kilometres***. Developed to offer cutting-edge, uniform customer experiences for EV owners around the world, the e VITARA complemented by the 'e for me' electric vehicle ecosystem is all set to redefine EV ownership.
