## FOREWORD

The digital Owner's Manual is an essential part of your vehicle a rich document which familiarizes you with the vehicle by providing information such as features, warnings, operations and equipment description etc. Please read this manual carefully before operating your new MARUTI SUZUKI vehicle and review the manual from time to time. It is recommended to download this manual (from the "Maruti Suzuki" mobile application with your registered mobile number) and save a soft copy of the same for easy access all times. Please visit MARUTI SUZUKI authorised workshop for availing any service.

To prolong the life of your vehicle and reduce maintenance cost, the periodic maintenance must be carried out according to "PERIODIC MAINTENANCE SCHEDULE" described in "INSPECTION AND MAINTENANCE" section of this manual. It is essential for preventing trouble and accidents to ensure your satisfaction and safety.

Daily inspection and care as per "DAILY INSPECTION CHECKLIST" described in the "OPERATING YOUR VEHICLE" section of this manual is essential for prolonging the life of the vehicle and for safe driving.

Vehicle and the available features/accessories therein should be used and plied by the owner/user in accordance with the applicable legal requirements.

MARUTI SUZUKI INDIA LIMITED believes in conservation and protection of Earth's natural resources.

To that end, we encourage every vehicle owner to recycle, trade-in or properly dispose of, as appropriate, used Engine Oil, coolant and other fluids, batteries and tyres etc.

### MARUTI SUZUKI INDIA LIMITED

---

**All information in this manual is based on the latest product information available at the time of publication. Due to improvements or other changes, there may be discrepancies between information in this manual and your vehicle. MARUTI SUZUKI INDIA LIMITED reserves the right to make production changes at any time, without notice and without incurring any obligation to make the same or similar changes to vehicles previously built or sold.**

**This vehicle may not comply with standards or regulations of other countries. Before attempting to register this vehicle in any other country, check all applicable regulations and make any necessary modifications.**

---

## IMPORTANT

**▲ WARNING/ ▲ CAUTION/NOTICE/ NOTE**

Please read this manual and follow its instructions carefully. To emphasize special information, the symbol and the words **WARNING**, **CAUTION**, **NOTICE** and **NOTE** have special meanings. Pay particular attention to messages highlighted by these signal words:

### **▲ WARNING**

Indicates a potential hazard that could result in death or serious injury.

### **▲ CAUTION**

Indicates a potential hazard that could result in minor or moderate injury.

### **NOTICE**

Indicates a potential hazard that could result in vehicle damage.

#### **NOTE:**

Indicates special information to make maintenance easier or instructions clearer.

75F135

The circle with a slash in this manual means “Don’t do this” or “Don’t let this happen”.

#### **NOTE:**

- Words like *car*, *model/variant* are invariably used in this manual to denote the “Vehicle”.
- Pictorial representations used in this manual are for reference purposes only.

## MODIFICATION WARNING

### **▲ WARNING**

Do not modify your vehicle. Modification could adversely affect safety, handling, performance, or durability and may violate governmental regulations. In addition, damage or performance problems resulting from modification shall not be covered under warranty.

### **NOTICE**

Improper installation of mobile communication equipment such as cellular telephones, CB (Citizen’s Band) radios may cause electronic interference with your vehicle’s ignition system, resulting in vehicle performance problems. Consult your Maruti Suzuki authorized workshop or qualified service technician for advice on installing such mobile communication equipment.

### **NOTICE**

The diagnostic connector of your vehicle is prepared only for the specific diagnostic tool for inspection and service purpose. Connecting any other tool or device may interfere with electronic parts operations and cause running out of batteries.

# “WARNING”

Vehicle may **break-down**, meet with an **accident** or **catch fire** due to

1. Installation of
  - High wattage bulbs
  - Non genuine lamps / horns
  - Modified suspension / wheels
  - Non genuine parts / accessories etc.
2. Retrofitment of LPG / CNG fuel systems/kits.
3. Usage of domestic LPG.
4. Short circuiting due to tampering of wiring harness.

CAUTION: DO NOT STORE OR CARRY INFLAMMABLE MATERIALS IN THE VEHICLE.

Avoid driving into or starting the vehicle in a heavily water logged area. Vehicle may **break-down** or engine may fail due to

1. Water entry into the engine (which may lead to hydrostatic lock).
2. Short circuiting of the electrical systems.

If the vehicle is stuck in deep water, **do not start / crank the vehicle until the level of water drops below the level of exhaust pipe.**

NOTE:

IF THE VEHICLE IS SUBMERGED IN WATER, REPORT TO THE NEAREST AUTHORIZED WORKSHOP.

# “CAUTION”

1. Retro-fitting of LPG / CNG kit may deteriorate vehicle performance, reduce engine & engine related component's life and also warranty will be null and void for such vehicles.
2. Do not use domestic LPG/LPG cylinder for your factory fitted LPG vehicles.
3. Usage of domestic LPG for running vehicles is prohibited as per law.
4. Do not remove company fitted LPG/CNG kit to install some other kit. It may affect vehicle performance and may cause fire.
5. Drive slowly on wet roads. Tires may slip while braking at higher speeds due to aquaplaning. (reduced contact area between tire and road due to presence of water)
6. Do not leave engine running in garages or confined areas, with passengers inside. This may result in accumulation of carbon-monoxide in cabin and may lead to suffocation or breathing problems.
7. Do not park vehicle on dry leaves or grass. This may lead to fire due to hot catalytic converter, igniting the dry leaves/grass.
8. If the vehicle is equipped with CNG/LPG, ensure availability of fire extinguisher in the vehicle all the time.
9. Always wear seat belt at all the times.
10. Do not use mobile phone while driving.
11. Avoid Smoking in the car, live bud thrown in car may cause fire.
12. Do not put any body part under the vehicle when it is supported on a Jack.
13. Do not use non-genuine accessories in your vehicle.
14. Do not fit accessories from unauthorized workshops/sources.
15. Usage of non-approved electrical accessories in your vehicle may result in spark, fire or personal injury.
16. Do not use camphor, incense sticks inside cabin room. Doing so may cause fire.
17. Avoid usage of cellular phones while refueling. Electric current and/or electronic interference from cellular phones can potentially ignite fuel vapors and cause fire.
18. Avoid entry inside vehicle immediately once after you have begun refueling. You can generate a build up of static electricity by touching, rubbing or sliding against any item or fabric capable of producing static electricity. Static electricity discharge can ignite fuel vapors and may causing a fire.
19. Do not check the engine room/ open the hood near the fire area (Outside the vehicle). Fuel, washer fluid, etc. are flammable oils that may cause fire.
20. Avoid driving when vehicle has met with an accident. Before driving, Please contact with authorized MSIL dealership.

---

## To experience and use the Digital Owner's Manual, download Maruti Suzuki application

**Maruti Suzuki application** ensures a hassle free ownership experience. Get easy access to all the services and information you need by downloading the application

### How to download Owners manual from Maruti Suzuki application

**Step 1:** Download the “Maruti Suzuki” mobile application from the Apple App Store or Google Play Store.

**Step 2:** Enter your registered mobile number and verify with the OTP received via SMS.

**Step 3:** Tap the “Offerings” icon on the bottom bar.

**Step 4:** Select “Owner’s Manual” to access your car’s digital manual.

**Step 5:** Tap on download icon at top right of the page to download the Owner’s Manual.

Now, the Owner’s Manual is available on your mobile phone for reference at all times.

(For assistance, contact Maruti Suzuki authorized workshop)

---

## WARRANTY POLICY

Maruti Suzuki India Limited (hereinafter called "Maruti Suzuki"), warrants that each new Maruti Suzuki vehicle distributed in India by Maruti Suzuki and sold by a Maruti Suzuki authorized dealer will be free, under normal use and service, from any defects in material and workmanship at the time of manufacture SUBJECT TO THE FOLLOWING TERMS AND CONDITIONS:

### (1) Qualification:

To qualify for this warranty the vehicle must be delivered by a Maruti Suzuki authorized dealer and set-up, and serviced by a Maruti Suzuki authorized workshop.

### (2) Term:

The term of this warranty shall be Thirty-Six (36) months or 1,00,000 kilometers (whichever occurs first) from the date of invoice to the first owner, except for the following parts for which the term is as under:

#### NOTE:

*Maruti Suzuki offers warranty for the below parts in vehicle, if equipped, as follows:*

- *Lithium-ion battery, Integrated Starter Generator (ISG), Hybrid ECU, Inverter / Converter Unit, Power Management ECU- Sixty (60) months or 1,00,000 kilometers (whichever occurs first).*
- *Hybrid Electric Vehicle (HEV) Battery- Ninety six (96) months or 1,60,000 kilometers (whichever occurs first).*
- *Lead acid battery – Twenty four (24) months or 40,000 kilometers (whichever occurs first).*

### (3) Maruti Suzuki Warranty Obligation:

If any defect(s) should be found in a Maruti Suzuki vehicle within the term stipulated above, Maruti Suzuki's only obligation is to repair or replace at its sole discretion any part shown to be defective, with a new part or the equivalent at no cost to the owner for parts or labor, when Maruti Suzuki acknowledges that such a defect is attributable to faulty material or workmanship at the time of manufacture. Such defective parts, which have been replaced, will become the property of Maruti Suzuki. The owner is responsible for any repair or replacements which are not covered by this warranty. The decision of Maruti Suzuki shall be final & binding.

### (4) Limitation:

This warranty shall not apply to:

- (a) Normal maintenance service required other than the three free services, including without limitation, oil and fluid changes, consumables, headlight aiming, fastener retightening, wheel balancing, wheel alignment and tyre rotation, cleaning of injectors, adjustments of clutch and valve clearance.
- (b) The normal wear of parts including without limitation, bulbs, tyres\* and tubes, spark plugs, belts, hoses, filters, wiper blades, brushes, contact points, fuses, clutch disc, brake shoes, brake pads, cable and all rubber parts (except oil seal and glass run).  
(\* - If there is a complaint related to tyre, the customer may contact respective tyre manufacturer.)
- (c) Any vehicle which has been used for competition, rallies or racing.
- (d) Any repairs or replacement arising from accidents or collision.

- 
- (e) Any defect/ damage caused by misuse, negligence, abnormal use, insufficient care, vandalism, theft, riot, fire, flooding - not limited to entry of water in the components resulting in engine seizure, hydrostatic lock, etc. or external damages to the body/ components.
  - (f) Any damage resulting due to usage of adulterated fuel/ lubricants/ oil/ coolant/ fluids/ polishing products and fuel/ lubricants/ oil/ coolant/ fluids used other than those specified in the Owner's Manual.
  - (g) Any vehicle which has been modified or altered, including without limitation, the installation of performance accessories, enlargements of lights, other changes and external/ consequential reasons.
  - (h) Any vehicle on which parts or accessories not approved by Maruti Suzuki (Non-MSGA, Non-MSGP) have been used.
  - (i) Any vehicle which has not been operated in accordance with the operating instructions in this Owner's Manual.
  - (j) Any vehicle which has not received the service inspections prescribed in this Owner's Manual.
  - (k) Any vehicle which has been assembled, disassembled, adjusted or repaired by other than a Maruti Suzuki authorized workshop.
  - (l) Any vehicle which has been used for purposes other than what it was designed for.
  - (m) Any damage or deterioration caused by airborne fallout, industrial fallout, acid rain, hail or hail storm, wind storm, lightning, bird droppings, rodents bite / rat bite and such other thing that result in damage to the vehicle.
  - (n) Insignificant defects / noise which do not affect the function of the vehicle including without limitation, sound, vibration and fluid seep.
  - (o) Any natural wear and tear including without limitation, ageing, wear & tear or deterioration such as discoloration, fading, deformation or blurring and fabric discoloration.
  - (p) Installation and usage of domestic LPG gas/LPG Cylinder.
  - (q) V-belts, hoses and gas leaks.
  - (r) Any vehicle retrofitted with LPG/CNG kits.
  - (s) Repainting including patchwork, bodywork and mouldings and interior trims.
  - (t) Corrosion, rusting of body parts and/ or components.
  - (u) Any vehicle on which odometer has been changed unauthorisedly or odometer reading has been modified/ tampered with/ or not matching the service records.
  - (v) The damage(s) caused to the vehicle being unattended despite knowledge that the defect exists and ignorance by the owner/ user of the vehicle.
  - (w) Any damage(s) caused to vehicle including battery/ tyre due to improper maintenance or prolonged parking of the vehicle in idle condition for long duration.
  - (x) Any vehicle on which the retro-fitment is not authorized and/ or type approved as per the standards prescribed by the relevant authority including but not limited to Automotive Standards of India.
  - (y) Any vehicle on which the retro-fitment is such which directly or indirectly causes any damage to the vehicle or affects the functions of the vehicle in any manner whatsoever.

---

### **(5) Extent of Warranty:**

This warranty is the entire written warranty given by Maruti Suzuki for Maruti Suzuki vehicles and no dealer or its or his agent or employee is authorized to extend or enlarge this warranty and no dealer or its or his agent or employee is authorized to make any oral warranty or representation or assurance on behalf of Maruti Suzuki.

Maruti Suzuki reserves the right to add any improvements or change the design of any model at any time with no obligation to make the same changes on units previously sold.

### **(6) Warranty Service:**

To obtain warranty service, the complete vehicle must be presented at the owner's expenses to Maruti Suzuki authorized workshop.

The customer shall be responsible for his belongings or accessories fitted in the vehicle at the time of presenting the vehicle for service and no claim shall be entertained in any manner under any circumstances.

### **(7) Owner's Warranty Obligations:**

<b>NOTICE</b>
<b>The owner shall not use the vehicle in a damaged condition and report the same immediately to the nearest Maruti Suzuki authorized workshop. This would result in early inspection and repair of the vehicle and any possible harm to the person or aggravation of damage to the vehicle can be prevented.</b>

It is responsibility of each owner to:

- Have performed, at his own expenses, by a Maruti Suzuki authorized workshop all the service inspections specified in the Owner's Manual described in "INSPECTION AND MAINTENANCE" section.
- Should you resell the vehicle, please guide the new users/owners to download this manual (from the "Maruti Suzuki" mobile application with your registered mobile number). Also the soft copy of the manual must be passed on to new users/owners when resold or otherwise transferred.

If the Owner's Manual is lost due to any reason, the owner or user may download a soft copy of the same (from the "Maruti Suzuki" mobile application with the mobile number) and save it for easy access at any point of time".

### **(8) Disclaimer of Consequential Damage:**

Maruti Suzuki assumes no responsibility for loss of vehicle, loss of time, inconvenience or any other indirect incidental or consequential damage resulting from the vehicle not being available to the owner because of any defect covered by this warranty.

### **(9) Change of Owner**

Even if ownership of the vehicle changes, the remaining warranty period is effective for the new owner.

This warranty is applicable only in India and not transferable to any other country.

#### **NOTE:**

*Notwithstanding the warranty obligations, Maruti Suzuki may reuse reworked (refurbished) parts for undertaking rectification of recalled vehicles in terms of applicable laws.*

### Warning lights and indicators

#### Warning lights

#### Instrument cluster

55UM01022

- If a warning light continues to be lit or is blinking, there may be a problem with the vehicle or the system. Carefully read the following reference information and consult with a MARUTI SUZUKI authorized workshop.
- It is considered normal that warning lights and indicators marked with an asterisk (\*) are lit when the ignition switch is turned to “ON” position (i.e., high engine coolant temperature warning light initially lights up in red). If such lights do not light up, consult with a MARUTI SUZUKI authorized workshop.
- For the ENG A-STOP system, there is the particular condition that a warning light or an indicator is lit.

Warning light		Color	Name
(1)		Red	Driver's seat belt reminder light / front passenger's seat belt reminder light
(2)		Orange	Unreleased steering lock warning light (if equipped)
(3)		* Orange	Immobilizer/keyless push start system warning light
(4)		* Orange	Malfunction indicator light
(5)		* Red	Charge warning light
(6)		* Red	Engine oil pressure warning light
(7)		* Orange	Electric power steering warning light

## QUICK GUIDE

### Warning buzzer

- \*1: The master warning  in the instrument cluster blinks. At the same time, the message will be shown on the information display to inform the driver of the vehicle condition and the remedy (if equipped).
- \*2: The message will be shown on the information display to inform the driver of the vehicle condition and the remedy (if equipped).

When	Warning buzzer	Instrument cluster	Cause and remedy
When one of the doors is opened	Interior buzzer	 Blinks every 2 seconds	The security system warning is being activated. You can stop the warning by either of the following operations: <ul style="list-style-type: none"> <li>• Unlock the doors using the keyless entry system transmitter.</li> <li>• Turn the ignition switch to "ON" position.</li> </ul>
	<ul style="list-style-type: none"> <li>• Beeping at short intervals for approx. 10 seconds</li> </ul>		
When the ignition switch is turned to "ON" position	Interior buzzer	 Blinks rapidly for approx. 8 seconds	Indicates that a security system has been activated while the vehicle has been parked; check the vehicle to make sure that it is not broken into or nothing is stolen.
	<ul style="list-style-type: none"> <li>• Beeping 4 times</li> </ul>		
	Interior buzzer	*1	The steering wheel lock has not been released. With load not applied, turn the steering wheel to the left or right so as to press the engine switch or turn the ignition switch again.
When stopping or backing up the vehicle	Interior buzzer	-	Rear parking sensors detect an obstacle on the rear side of the vehicle. Check the surrounding area directly with your eyes and the mirrors, and back up the vehicle slowly.
	<ul style="list-style-type: none"> <li>• Short beeps at long intervals, short beeps at short intervals, short beeps at very short intervals, or continuous beep</li> </ul>		

When	Warning buzzer	Instrument cluster	Cause and remedy
When the ignition switch is in "ON" position	Interior buzzer • Chime (once)	 Lights up	The brake fluid is insufficient or the brake system may be faulty. Consult with a MARUTI SUZUKI authorized workshop.
	Interior buzzer • Chime (once)	 Lights up	The fuel level is low. Refuel soon.
When driving	Interior buzzer • Beeping at short intervals for approx. 95 seconds	 Blinks *1	The driver does not wear his/her seat belt. Stop the vehicle in a safe place and wear your seat belt. The front or rear passenger(s) does not wear his/her seat belt. Wear the seat belt.
	Interior buzzer • Beeping at short intervals for approx. 35 seconds	 Blinks *1	

## QUICK GUIDE

When	Warning buzzer	Instrument cluster	Cause and remedy
When driving	Interior buzzer	 Lights up *1	The parking brake has not been released. Stop the vehicle in a safe place and release the parking brake.
	<ul style="list-style-type: none"> <li>• 3 beeps repeating at short intervals</li> </ul>		
	Interior buzzer	 Lights up *1	One of the doors is not completely closed. Stop the vehicle in a safe place and close all doors completely.
	<ul style="list-style-type: none"> <li>• Beeping at long intervals</li> </ul>		
	Interior buzzer	 Blinks	The engine is running hot. Drive slowly to prevent overheating.
<ul style="list-style-type: none"> <li>• 1 Beeps</li> </ul>			
Interior buzzer	 Lights up	The engine is overheating. Refer to “Engine trouble: Overheating” in “EMERGENCY SERVICE” section.	
<ul style="list-style-type: none"> <li>• Continuous beep</li> </ul>			
When opening the driver’s door	Interior buzzer	 Lights up *1	The headlights and/or the position lights are left on. Turn them off.
	<ul style="list-style-type: none"> <li>• Continuous beep</li> </ul>		

When	Warning buzzer	Instrument cluster	Cause and remedy
When stopping or reversing the vehicle	Interior buzzer	 Indicates *2	The gearshift lever is in “R” (Reverse) position. Check the gearshift lever position.
	<ul style="list-style-type: none"> <li>• Beeping at short intervals</li> </ul>		
When the ignition switch is turned to “LOCK” position	Interior buzzer	*1	You cannot turn the ignition switch to “LOCK” position because there may be malfunction of the gearshift lever. Consult with a MARUTI SUZUKI authorized workshop.
	<ul style="list-style-type: none"> <li>• Chime (once)</li> </ul>		
When the engine is stopped automatically by the ENG A-STOP system	Interior buzzer	–	The engine stalled because the hood is opened after the engine is stopped automatically. To restart the engine, follow the procedure below 1) Set the parking brake firmly, and then shift into “N” (Neutral). 2) Securely close the engine hood. 3) Turn the ignition switch to restart the engine.
	<ul style="list-style-type: none"> <li>• Continuous beeps</li> </ul>		
	Interior buzzer	–	The gearshift lever is in a position other than “N” (Neutral). Place the gearshift lever in “N” (Neutral) position.
	<ul style="list-style-type: none"> <li>• Beeping at short intervals</li> </ul>		

## QUICK GUIDE

When	Warning buzzer	Instrument cluster	Cause and remedy
When the engine is stopped automatically by the ENG A-STOP system	Interior buzzer	 and  Lights up	The engine stalled because the following operations were performed. <ul style="list-style-type: none"> <li>• The driver's seat belt is unfastened.</li> <li>• The driver's door is opened.</li> </ul> To restart the engine, follow the procedure below. <ol style="list-style-type: none"> <li>1) Set the parking brake firmly, and then shift into "N" (Neutral).</li> <li>2) Close the driver's door and fasten the driver's seat belt.</li> <li>3) Turn the ignition switch or press the engine switch to restart the engine.</li> </ol>
	Interior buzzer		
When opening the driver's door	Interior buzzer	-	The driver's seat belt is unfastened. You can restart the engine by depressing the clutch pedal when the seat belt is fastened.
	• Continuous beep		

## FAQ

### Q&A

Refer to the following list of frequently asked questions.

#### Door opening / closing

- Q. The keyless entry system does not work. What should I do?
- A. There is a possibility that something is interfering with the function of the keyless entry system. Refer to “Keyless entry system transmitter” in “BEFORE DRIVING” section.
- A. If the battery of the Keyless entry system transmitter is dead, replace it. Refer to “Keyless entry system transmitter battery replacement” in “INSPECTION AND MAINTENANCE” section.

#### Window glass

- Q. How can I clear fog on the inside of the windshield and door glass areas?
- A. Use the defroster switch. Refer to “Manual air conditioning system (with digital control panel)” or “Automatic heating and air conditioning system (climate control)” in “OTHER CONTROLS AND EQUIPMENT” section.
- Q. How can I clear fog on the inside of the rear window glass?
- A. Use the heated rear window switch. Refer to “Heated rear window switch” in “BEFORE DRIVING” section.

## QUICK GUIDE

---

### Tyres

Q. I get a flat tyre. What should I do?

A. Change the flat tyre with a spare tire. Refer to “Tyre changing tool” in “EMERGENCY SERVICE” section.

### Running out of battery

Q. The battery runs out and the engine does not start. What should I do?

A. Connect the battery of a vehicle for assistance to jump leads and start the engine. Refer to “Jump-starting instructions” in “EMERGENCY SERVICE” section.

### Engine oil

Q. I would like to change the engine oil. What should I do?

A. Refer to “Engine oil and filter” in “INSPECTION AND MAINTENANCE” section and “Specifications” in “SPECIFICATIONS” section.

**ENG A-STOP system**

- Q. The ENG A-STOP system does not work. What should I do?
- A. Refer to “ENG A-STOP system (engine auto stop start system) (if equipped)” in “OPERATING YOUR VEHICLE” section.

**Electrical equipment**

- Q. The headlights or brake lights do not light up. What should I do?
- A. Check the light bulbs. Refer to “Bulb replacement” in “INSPECTION AND MAINTENANCE” section.
- Q. I cannot use an electrical device. What should I do?
- A. Check the fuses. Refer to “Fuses” in “INSPECTION AND MAINTENANCE” section.

59RN02300

## FOR SAFE DRIVING

### Driver's seat floor

#### Floor mats

83S06010

55T020010

To prevent the driver's side floor mat from sliding forward and possibly interfering with the operation of the pedals, MARUTI SUZUKI genuine floor mats are recommended.

Whenever you put the driver's side floor mat back in the vehicle after it has been removed, hook the floor mat grommets to the fasteners and position the floor mat properly in the footwell.

When you replace the floor mats in your vehicle with a different type such as all-weather floor mats, we highly recommend to use MARUTI SUZUKI genuine floor mats for proper fitting.

#### ⚠ WARNING

Failure to take the following precautions may result in the driver's side floor mat interfering with the pedals and causing a loss of vehicle control or an accident.

#### Description of warning label

- Check that the floor mat grommets are hooked to the fasteners.

- Never stack floor mats because it may prevent from securing to the fasteners and cause sliding forward.

(Continued)

#### ⚠ WARNING

(Continued)

- For more details, read this owner's manual.
- Never use a floor mat which does not fit the floor as the same may cause hindrance/damage in vehicle and its functioning.
- Never use damaged floor mats.

### Clearing the floor

69RHS157

**⚠ WARNING**  
Do not leave empty cans, etc. at your feet. These objects may interfere with pedal operation and cause accidents.

### Seat belts and child restraint systems

59RN02300

**⚠ WARNING**

- Wear your seat belts at all times.
- An airbag supplements or adds to the frontal collision protection offered by seat belts. The driver and all passengers must be properly restrained by wearing seat belts at all times, even if driving for a very short distance, whether or not an airbag is mounted at their seating position, to minimize the risk of severe injury or death in the event of a collision.

(Continued)

**⚠ WARNING**

(Continued)

- Do not modify, remove, disassemble seat belts. Doing so may prevent them from functioning properly and cause the risk of severe injury or death in the event of a collision.

59RN02390

## FOR SAFE DRIVING

59RN02400

59RN02380

### ⚠ WARNING

- Never allow persons to ride in the cargo area of a vehicle. In the event of an accident, there is a much greater risk of injury for persons who are not riding in a seat with their seat belt securely fastened.
- Ensure that all seat belts are worn correctly. An improperly worn seat belt increases the risk of injury or death if a collision occurs.
- Seat belts should always be adjusted as follows:
  - the lap portion of the belt should be worn low across the pelvis, not across the waist.
  - the shoulder straps should be worn on the outside shoulder only, and never under the arm.
  - the shoulder straps should be away from your face and neck, but not falling off your shoulder.
- Seat belts should never be worn with the straps twisted and should be adjusted as tightly as is comfortable to provide the protection for which they have been designed. A slack belt will provide less protection than a snug belt.

(Continued)

### ⚠ WARNING

(Continued)

- Check that seat belt latch plate (tongue) is inserted into the proper buckle especially in the rear seats. It is not possible to insert into the wrong buckles in the rear seats.
- Pregnant women should use seat belts, although specific recommendations about driving should be made by the woman's medical advisor. Remember that the lap portion of the belt should be worn as low as possible across the hips, as shown in the illustration.
- Do not wear seat belts over hard, fragile, or sharp items such as pens, keys, eyeglasses, etc in pockets or on clothing. The pressure from seat belt on such items can cause injury in case of an accident.

59RN02440

(Continued)

**⚠ WARNING**

(Continued)

- Do not hold a child on a passenger's lap. Even if the passenger holds the child tightly, he/she would not be supported enough in the event of an accident and it could result in a serious injury of the child.
- Never use the same seat belt for more than one occupant and never attach a seat belt over an infant or child being held on an occupant's lap. Such seat belt use could cause serious injury in the event of an accident.
- Periodically inspect seat belt assemblies for excessive wear and damage. Seat belts should be replaced if webbing becomes frayed, contaminated or damaged in any way. It is essential to replace the entire seat belt assembly after it has been worn in a severe impact, even if damage to the assembly is not obvious.
- Children aged 12 and under should ride properly restrained in the rear seat.

(Continued)

**⚠ WARNING**

(Continued)

- Infants and small children should never be transported unless they are properly restrained. Restraint systems for infants and small children can be purchased locally and should be used. Check that the system you purchase meets applicable safety standards. Read and follow all the directions provided by the manufacturer.
- For child, if the seat belt irritates the neck or face, use a child restraint system appropriately for the child. The seat belts of your vehicle are principally designed for persons of adult size.
- Avoid contamination of seat belt webbing by polishes, oils, chemicals, and particularly battery acid. Cleaning may safely be carried out using mild soap and water.
- Do not insert any items such as coins and clips into the seat belt buckles, and be careful not to spill liquids into these parts. If foreign materials get into a seat belt buckle, the seat belt may not work properly.
- All seatbacks should always be in an upright position when driving, or seat belt effectiveness may be reduced. Seat belts are designed to offer maximum protection when seatbacks are in the upright position.

Adjustment before driving

80J014

**⚠ WARNING**

- When driving, do not adjust the steering wheel (only adjustable type with certain specifications), the seat, the inside rearview mirror or the outside rearview mirrors. Otherwise, there is the risk of mistaken operation of the steering wheel or reduced awareness of what is in front of you, possibly leading to an accident.
- Do not tilt the seatback further back than necessary. Otherwise, the head restraint and the seat belt cannot function as intended.

## FOR SAFE DRIVING

### Correct use of seat belt

69RHS158

- Adjust the seat to the correct position. Sit your body fully into the seat.
- Make sure that the seat belt is not twisted.
- Make sure that you place the lap portion of the belt as low as possible across the pelvis.
- The upper belt should rest on the area midway between the shoulder and the base of the neck.
- Confirm that the belt is not twisted in any way, and remove any slack.

77R20050

### ⚠ WARNING

- If you do not fasten your seat belt properly, your body may not be restrained in a sudden braking and a collision. This may cause severe injury. Fasten your seat belt properly before driving.
- If all the passengers do not fasten their seat belts properly, their body may not be restrained in a sudden braking and a collision. This may cause severe injury. Ask all the passengers on the front passenger's seat and the rear seats to fasten their seat belts properly before driving.

### Front seats

#### Seat adjustment

### ⚠ WARNING

- Never attempt to adjust the driver's seat or seatback while driving. The seat or seatback could move unexpectedly, causing loss of control. Check that the driver's seat and seatback are properly adjusted before you start driving.
- To avoid excessive seat belt slack, which reduces the effectiveness of the seat belts as a safety device, check that the seats are adjusted before the seat belts are fastened.
- All seatbacks should always be in an upright position when driving, or seat belt effectiveness may be reduced. Seat belts are designed to offer maximum protection when seatbacks are in the upright position.

(Continued)

**⚠ WARNING**

(Continued)

- If you place a cushion, etc. between the seatback and your back, you may not be able to drive the vehicle in a correct posture. Also, the seat belt and the head restraint may not provide the best performance. This may cause severe injury in an accident.  
Do not place a cushion, etc. between the seatback and your back.
- Do not place any object under the front seat. If an object gets stuck under the front seat, the seat shall not be latched properly and may cause injury.
- Do not leave cigarette lighters or spray cans on the floor. If a cigarette lighter or spray can is on the floor, it may light accidentally when luggage is loaded or the seat is adjusted, causing a fire.

55UM02020

**Seat position adjustment lever (1)**

Pull the lever up and slide the seat.

55UM02021

**Seatback angle adjustment lever (2)**

Pull the lever up and move the seatback.

**NOTE:**

To operate the seat back smoothly, pull the seat back adjustment lever (2) in upward direction. Ensure to move seat back only after lever is moved to fully up position. After adjustment of seat back, release the lever gently. Check that seat back is locked by moving it forward and backward.

## FOR SAFE DRIVING

### Head restraints

80J001

Head restraints are designed to help reduce the risk of neck injuries in the case of an accident. Adjust the head restraint to the position which places the center of the head restraint closest to the top of your ears. If this is not possible for very tall passengers, adjust the head restraint as high as possible.

### ⚠ WARNING

- If you drive the vehicle with the head restraint removed, a passenger's backward tilting cannot be prevented in a collision from the backward and the impact to a passenger's head cannot be reduced in a sudden braking or a collision. This may cause severe injury. Never drive the vehicle with the head restraints removed.
- If the head restraint is installed back to front or it is not installed securely, the head restraint may not provide the best performance in case of emergency, resulting in severe injury. If the head restraint is installed back to front, you cannot adjust the height and install it securely. Make sure to install the head restraint securely in the right direction.
- Being distracted by head restraint adjustment could lead to an accident. Do not attempt to adjust the head restraint while driving.

### NOTE:

*It may be necessary to recline the seat back to provide enough overhead clearance to remove the head restraint.*

55UM02023

To raise the front head restraint, pull upward the head restraint until it clicks. To lower the head restraint, push down the head restraint while holding in the lock button (1). If a head restraint must be removed (for cleaning, replacement, etc.), push in the lock button (1) and pull the head restraint all the way out.

## Tilt steering lock lever

55UM02012

- (1) LOCK
- (2) UNLOCK

The lock lever is located under the steering column. To adjust the steering wheel height:

- 1) Push down the lock lever to unlock the steering column.
- 2) Adjust the steering wheel to the desired height and lock the steering column by pulling up the lock lever.
- 3) Try moving the steering wheel up and down back and forth to check that it is securely locked in position.

### **⚠ WARNING**

**Never attempt to adjust the steering wheel while the vehicle is moving or you could lose control of the vehicle.**

## Mirrors

### **⚠ WARNING**

Failure to observe following point may result in loss of vehicle control and cause an accident, leading to death or serious injury. Always follow below points while driving.

- Do not adjust the mirrors while driving.
- Always unfold all the outside rear-view mirrors and adjust properly before driving.
- Do not place objects in the rear of the vehicle which may hinder visibility or interfere with your vision from the rear window glass.

81M30360

### **⚠ WARNING**

- If you adjust the inside rearview mirror while driving, you could lose control of the vehicle, resulting in an accident.  
**Adjust the inside rearview mirror before driving.**

### **⚠ CAUTION**

**Do not modify the inside rearview mirror or install a non-genuine wide mirror. It could result in injury during accident.**

## Inside rearview mirror

You can adjust the inside rearview mirror by hand so as to see the rear of your vehicle in the mirror. To adjust the mirror, move the mirror up, down or side ways by hand to obtain the best view.

## FOR SAFE DRIVING

---

### Outside rearview mirrors

Adjust the outside rearview mirrors so you can just see the side of your vehicle in the mirrors.

70TH02007

You can adjust the outside rearview mirrors by hand so as to see the sides of your vehicle in the mirrors.

### **⚠ WARNING**

**If you adjust the outside rearview mirror while driving, you could lose control of the vehicle, resulting in an accident.**

**Adjust the outside rearview mirror before driving.**

### **⚠ WARNING**

**Be careful when judging the size or distance of a vehicle or other object seen in the side convex mirror. Be aware that objects look smaller and appear farther away than when seen in a flat mirror.**

## Safety for child

For safety, carefully drive at lower speed than usual.

### Place a child in the rear seat

51K0188

- Seat a child next to an adult when possible, and ensure that the child can be visually monitored.
- If a child sits in a front passenger's seat, the driver might become distracted by the child's movements, or the child might become mischievous, which could result in driving hindrance.
- Select an appropriate child restraint system suitable for the child's age and physical size.

### ⚠ WARNING

- If you do not use the child-proof lock, a child may open a door and the child may be thrown out, resulting in severe injury. To avoid this, use the child-proof lock setting.
- When it is necessary to seat the child who does not need a child restraint system in the front passenger's seat, observe the following point.
  - Slide the front passenger's seat all the way back. If the front passenger's seat is in a forward position, there is a risk of serious injury due to major impact if the front passenger's seat airbag was to be deployed.

(Continued)

### ⚠ WARNING

(Continued)

59RN04650

- If a child put a hand out of the window or lean on a door, the child may get severe injury by a strong impact of side or curtain airbag activation. Do not allow a child to put hand out of the window or lean on a door.
- Do not allow the hands or feet, etc., of a child near movable parts inside a vehicle, such as the armrests and the seat rails. Otherwise, there is the possibility of injury.

## FOR SAFE DRIVING

### A child needs to wear seat belt

69RHS159

69RHS160

### Do not let a child play with seat belt

69RHS161

#### **⚠ WARNING**

- Do not drive with a child on your lap. Even if you hold the child tightly, proper support is not possible, and in the event of a collision, etc., the child may get serious injury.
- If a child does not wear a seat belt, in a sudden braking and a collision, the child may get serious injury. Be sure to always have a child wear a seat belt.
- If two or more people use a single seat belt, in a sudden braking and a collision, the seat belt may not provide the best performance, resulting in severe injury. Do not allow two or more people to use a single seat belt.

#### **⚠ WARNING**

- The seat belts of this vehicle are designed to be suitable for occupants of adult size. If the shoulder strap rests on the neck or chin of a child rather than the shoulder, or if the lap portion of the belt does not rest securely on the hipbone, ensure that the child is seated in a child restraint system placed in the rear seat. Failure to properly use a seat belt may result in serious injury to the child.
- Use a child restraint system securely fastened to the rear seat for any child that cannot hold their head upright or sit on their own.

#### **⚠ WARNING**

If a child play with a seat belt, for example, if the child's body is wrapped by the seat belt, it may cause severe injury such as suffocation. In case of emergency, cut the seat belt with scissors.

#### **Using the child restraint system**

Refer to “Securing child restraint system by seat belt” or “Securing child restraint system by ISOFIX” in this section.

**An adult needs to open or close each door or window, and adjust seats**

Only an adult should open or close each door or window and adjust seats, not to get a child's hands, arms, legs or neck, etc. caught in.

69RHS162

**⚠ WARNING**

- If the windows are not locked, a child may operate the windows by mistake or the other passengers may be caught in the windows. To avoid unintended operation of the power window by a child, use the window lock switch.

(Continued)

**⚠ WARNING**

(Continued)

- If you leave the power window in ready condition, it may cause unintended operation of the power window by a child, resulting in an accident.

When you leave the vehicle, make sure to turn the ignition switch to "LOCK" position, keep the key with you and leave the vehicle with your child.

**Do not let a child stick his/her head or hands out of the window**

69RHS163

**⚠ WARNING**

Ensure that a child does not put their hands or heads, etc., out the windows. Otherwise, serious injuries due to falling out or sudden braking may occur. Moreover, serious injury could also occur if a child were to come into contact with objects outside the vehicle.

## FOR SAFE DRIVING

**Do not leave a child unattended in the vehicle**

69RHS164

### **⚠ WARNING**

When getting out of the vehicle, do not allow a child to stay in the vehicle without you.

- Unintended and wrong operations by a child may cause a fire or an accident from the vehicle start.
- As the inside temperature of the vehicle will become hot under the blazing sun, a child may suffer from heat stroke or dehydration, resulting in severe health problems or death in the worst case. Even if you turn on the air conditioner, do not leave a child alone in the vehicle.

## Seat belt

**A child needs to wear seat belt**

Refer to "Safety for child" in this section.

**Information for pregnant woman and the sick person**

69RHS166

### **⚠ WARNING**

- Those that are pregnant or sick/disabled must also wear their seat belts. However, in the event of a collision, there is the danger of heavy pressure focused on certain body areas. Consultation with a physician is recommended.
- For those that are pregnant, ensure that the lap portion of the belt is as low as possible across the pelvis, avoiding to touch the abdomen. Make sure that the shoulder strap rests halfway between the shoulder and the base of the neck, crossing the chest and avoiding to touch the abdomen.

## Lap-shoulder belt

### Emergency locking retractor (ELR)

The seat belt has an emergency locking retractor (ELR), which is designed to lock the seat belt only during a sudden stop or impact. It also may lock if you pull the belt across your body very quickly. If this happens, let the belt go back to unlock it, and then pull the belt across your body more slowly.

### Safety reminder

59RN02310

59RN02320

To reduce the risk of sliding under the belt during a collision, position the lap portion of the belt across your lap as low on your hips as possible and adjust it to a snug fit by pulling the shoulder portion of the belt upward through the latch plate. The length of the diagonal shoulder strap adjusts itself to allow freedom of movement.

83SH02080

Holding the tongue plate (1) and the seat belt, pull out the seat belt slowly to straighten the twisted seat belt.

#### NOTE:

*When the seat belt is locked and you cannot pull it out, release it once and then pull it out again. If you still cannot pull it out, pull the seat belt strongly, release it and then pull it out again slowly.*

## FOR SAFE DRIVING

59RN02330

To fasten the seat belt, sit up straight and far back into the seat, pull the latch plate attached to the seat belt across your body and press it straight into the buckle until you hear a click. After pressing the latch plate into the buckle, pull the seat belt to make sure it is securely latched.

80J2008

**NOTE:**  
*The word "CENTER" is marked on the buckle for the rear center belt. The buckles are designed so a latch plate cannot be inserted into the wrong buckle.*

59RN02340

To unfasten the seat belt, push the red "PRESS" button on the buckle and retract the belt slowly while holding the belt or/and the latch plate.

**NOTE:**  
*If the seat belt cannot be pulled from its fully retracted position, firmly pull the belt and release it. Then smoothly pull the belt out of the retractor.*

### Adjustment of seat belt length

The seat belt does not require length adjustment. The seat belt extends and retracts according to the movement of the body. If the seat belt gets a strong impact, the belt locks its tension automatically, in order to secure the body.

### Correct use of seat belt

#### **WARNING**

- **Use the seat belt correctly. Otherwise, in a sudden braking or a collision, the body may not be restrained, resulting in severe injury. Observe the following points.**
- **If the seat belt is twisted or contains excessive slack, there is danger of heavy pressure focused on certain body areas.**
- **If the seat belt rests on the abdomen, this area may sustain heavy pressure when you get a strong impact.**
- **If the seat belt does not rest firmly over the shoulder, you may be thrown forward when you get a strong impact.**

## FOR SAFE DRIVING

### Seat belt reminder

55UM02009

- (1) Driver's seat belt reminder light / front passenger's seat belt reminder light
- (2) Rear passenger's seat belt reminder light (rear left)
- (3) Rear passenger's seat belt reminder light (rear center)
- (4) Rear passenger's seat belt reminder light (rear right)

For more details, refer to the explanation below.

### **⚠ WARNING**

**It is absolutely essential that the driver, front passenger and rear passenger fasten their seat belts at all times. Persons who are not fastening seat belts have a much greater risk of injury if an accident occurs. Make a regular habit of buckling your seat belt before starting the engine.**

#### NOTE:

- Along with the seat belt reminder light, a reminder message shall also come on the information display (if equipped), for unrestrained driver and/or front passenger.
- The driver's seat belt reminder light / front passenger's seat belt reminder light is for both the driver and front passenger.

**Driver's seat belt reminder**

If the driver's seat belt remains unbuckled when the ignition switch is turned to "ON" position, the reminder works as follows:

- 1) The driver's seat belt reminder light will come on. The front passenger's seat belt reminder light will also come on if a front passenger does not fasten his/her seat belt.
- 2) After the vehicle's speed has reached about 15 km/h, the driver's seat belt reminder light will blink and a buzzer will sound for about 95 seconds.
- 3) The reminder light will remain on until the driver's seat belt is buckled.

If the driver has buckled his or her seat belt and later unbuckles the seat belt, the reminder system will be activated from Step 1) or 2) according to the vehicle's speed. When the vehicle's speed is less than 15 km/h, the reminder will start from Step 1). When the vehicle's speed is more than 15 km/h, the reminder will start from Step 2).

The reminder will be automatically canceled when the driver's seat belt is buckled or the ignition switch is turned to "LOCK" position.

**Front passenger's seat belt reminder**

If there is a person sitting in the front passenger seat and the front passenger seat belt is unbuckled when the ignition switch is turned to "ON" position, the front passenger's seat belt reminder will activate.

55UM02011

(1) The sensor of the front passenger's seat belt reminder

The seat belt reminder sensor (1) detects whether a person is sitting in the front seat. The sensor of the front passenger's seat belt reminder is located in the seat cushion. The front passenger's seat belt reminder works in the same manner as the driver's seat belt reminder.

**NOTICE**

- The sensor of the front passenger's seat belt reminder is located in the seat cushion. If heavy or sharp objects are put on the seat cushion, or a removal, disassembly and modification of the passenger's seat are performed, the sensor may not work properly or can be damaged. Do not put heavy or sharp objects on the seat cushion. Do not remove, disassemble and modify the passenger's seat.
- Depending on the variety of seat cover, operation of the sensor may be adversely affected. MARUTI SUZUKI highly recommends that you use MARUTI SUZUKI genuine seat cover exclusively for this vehicle. If a seat cover is installed, consult with a MARUTI SUZUKI authorized workshop.
- If you spill liquid such as liquid aromatics, soft drinks or juice on the front passenger's seat cushion, the sensor of the front passenger's seat belt reminder located in the seat cushion can be damaged. Immediately wipe it dry with a soft cloth when spilled.

(Continued)

## FOR SAFE DRIVING

### NOTICE

(Continued)

- **When sitting on the front passenger's seat, it is very important that the passenger sits upright, leaning against the seat backrest and centered on the seat cushion in order for the seatbelt reminder system to function effectively. An occupant sitting improperly (slouches, turns sideways, sits forward or sideways) may hamper the functioning of this system as it may not detect the occupant.**

#### NOTE:

- *If you put an object on the passenger's seat, the weight of the object will be sensed by the sensor and the front passenger's seat belt reminder light will come on and then the interior buzzer may beep.*
- *If a child or a small sized person sit on the front passenger's seat or the cushion is put on the front passenger's seat, the weight will not be sensed by the sensor and the interior buzzer may not beep.*

### Rear passenger's seat belt reminder

Reminder light in speedometer for rear passengers to fasten their seat belts. Whether or not a passenger is seated, the rear seat belt reminder system works as follows, when ignition switch is turned to "ON" position:

- 1) Reminder light will turn ON for the non-buckled seats and continue for vehicle speed below 15 km/h.
- 2) When vehicle speed is above 15 km/h, reminder light will remain ON for the non-buckled seats for about 65 seconds and then turn OFF.
- 3) Further, when a buckled seat belt is unbuckled, the corresponding reminder light will turn ON. Above 15 km/h, the reminder light will blink (about 65 seconds) along with a buzzer sound (about 35 seconds). The reminder light will remain ON until the seat belt is buckled.

If rear door is opened in vehicle stationary condition, then reminder system will start from step 1.

The reminder will be automatically canceled when all the rear seat belts are buckled or the ignition switch is turned to "LOCK" position.

## Handling and care for seat belt

### Seat belt handling

70TH02018

Periodically check if the seat belts work properly and are not damaged. Check the webbing, buckles, latch plates, retractors, anchorages and guide loops. Replace any seat belts which do not work properly or are damaged.

**⚠ WARNING**

- Inspect all seat belt assemblies after any collision. Any seat belt assembly which was in use during a collision (other than a very minor one) should be replaced, even if damage to the assembly is not obvious. Any seat belt assembly even which was not in use during a collision must be replaced if the seat belt pretensioners were activated. The pretensioners and the load limiter only function once. In case they did not activate, consult with a MARUTI SUZUKI authorized workshop.
- If frays, scratches, cuts are found on the seat belt, replace it with a new one.
- If the buckle does not work properly, ask a MARUTI SUZUKI authorized workshop for inspection.
- If strong force was applied to the seat belt in a collision, the seat belt function may be damaged, even though its appearance is normal. Replace the seat belt with a new one.

(Continued)

**⚠ WARNING**

(Continued)

- As the seat belt may not provide the best performance and it may result in severe injury in case of emergency, observe the following points.
  - When foreign material enters into the buckle or you spill a drink, the seat belt may not work properly. In this case, ask a MARUTI SUZUKI authorized workshop for inspection.
  - As the seat belt may be damaged, be careful not to get the seat belt caught in the door. Before closing the door, check that the seat belt is retracted without any slack.
  - Do not modify or remove the seat belt.

**Seat belt care**

Caring for seat belts is the same as caring for any type of regular cloth material, etc.

**⚠ WARNING**

Do not use bleach, solvent or dyes on seat belts. Doing so may cause stains, discoloration and strength deterioration, and the seat belt may not function properly.

### Seat belt pretensioner system (only for front seat)

70TH02020

#### **▲ WARNING**

**This section describes your MARUTI SUZUKI vehicle's seat belt pretensioner system. Read and follow all these instructions carefully to minimize your risk of severe injury or death.**

To determine if your vehicle is equipped with a seat belt pretensioner system at the front or rear seating positions, check the label on the seat belt at the bottom part. If the letter "p" appears as illustrated, your vehicle is equipped with the seat belt pretensioner system. You can use the preten-

sioner seat belts in the same manner as ordinary seat belts.

Read this section and "Supplemental Restraint System (Airbags)" section to learn more about the pretensioner system.

The seat belt pretensioner system works with the supplemental restraint system (airbags). The crash sensors and the electronic controller of the airbag system also control the seat belt pretensioners. The pretensioners are triggered only when there is a frontal or side collision severe enough to trigger the airbags and the seat belts are fastened. For precautions and general information including servicing the pretensioner system, refer to "Supplemental Restraint System (airbags)" in addition to this "Seat belt pretensioner system" section, and follow all those precautions.

The pretensioner is located in each front seat belt retractor. The pretensioner tightens the seat belt so the belt fits the occupant's body more snugly in the event of a frontal or side collision. The retractors will remain locked after the pretensioners are activated. Upon activation, some noise will occur and some smoke may be released. These conditions are not harmful and do not indicate a fire in the vehicle.

The driver and all passengers must be properly restrained by fastening seat belts at all times, whether or not a pretensioner is equipped at their seating position, to minimize the risk of severe injury or death in the event of a collision.

Sit fully back in the seat; sit up straight; do not lean forward or sideways. Adjust the belt so the lap portion of the belt is worn low across the pelvis, not across the waist. Please refer to "Seat adjustment" in this section and the instructions and precautions about the seat belts in this "Seat belts and child restraint systems" section for details on proper seat and seat belt adjustments.

Please note that the pretensioners along with the airbags will activate in severe frontal or side collisions. They are not designed to activate in rear impacts, roll-overs, or minor frontal side collisions. The pretensioners can be activated only once. If the pretensioners are activated (that is, if the airbags are activated), have the pretensioner system serviced by a MARUTI SUZUKI authorized workshop as soon as possible.

The pretensioner system or the airbag system may not work properly if any of the following conditions occurs:

- 1) If the air bag warning light on the instrument cluster does not come on briefly, when the ignition switch is turned to the "ON" position.
- 2) If the air bag light comes on and stays on for more than 10 seconds, when the ignition switch is turned to the "ON" position.

3) If the air bag light comes on while driving.

Have both systems inspected by a MARUTI SUZUKI authorized workshop as soon as possible.

Service on or around the pretensioner system components or wiring must be performed only by a MARUTI SUZUKI authorized workshop who is specially trained. Improper service could result in unintended activation of pretensioners or could render the pretensioner inoperative. Either of these two conditions may result in personal injury.

To prevent damage or unintended activation of the pretensioners, check that the lead-acid battery is disconnected and the ignition switch has been in "LOCK" position for at least 90 seconds before performing any electrical service work on your MARUTI SUZUKI vehicle.

Do not touch pretensioner system components or wiring. The wires are wrapped with yellow tape or yellow tubing, and the couplers are yellow. When scrapping your MARUTI SUZUKI vehicle, ask a MARUTI SUZUKI authorized workshop, body repair shop, or scrap yard for assistance.

### For proper operation of seat belt pretensioner system

Do not modify any parts that can affect the functionality of the seat belt pretensioner system. The seat belt may be retracted unexpectedly, or it may not be properly retracted when necessary.

### Disposal and scrapping

Seat belt pretensioners that have not been activated must be activated according to the predetermined procedure before disposal.

#### **⚠ WARNING**

**If you do not handle a pretensioner properly for disposal, the pretensioner system may activate unexpectedly, resulting in severe injury. When disposing of a pretensioner or scrapping the vehicle equipped with a pretensioner, consult a MARUTI SUZUKI authorized workshop.**

### Seat belt force limiter system (only for front seat)

69RHS167

In the event of a strong impact coming from the front, the seat belt force limiter operates in two stages to reduce a force to the shoulder strap, thus lessening the impact being sustained by the front passengers.

## FOR SAFE DRIVING

55UM02004

### WARNING

If the seat belt sustains strong impact, the resin of the shoulder anchor part (1) and the tongue plate part (2) could soften due to heavy friction, thus sticking to the seat belt, making the belt slide less easily. In such a case, the seat belt may not provide the best performance, resulting in severe injury in case of emergency. Have the seat belt replaced by a MARUTI SUZUKI authorized workshop.

## Child restraint systems

### Child restraint system usage

59RN02280

The following types of child restraint system are available generally.

### Infant restraint

80JC007

### Child restraint

59RN02350

**Booster seat**

59RN02290

MARUTI SUZUKI highly recommends that you use a child restraint system to restrain infants and small children. Many different types of child restraint systems are available; check that the restraint system you select meets applicable safety standards.

All child restraint systems are designed to be secured in vehicle seats either by seat belts or by special rigid lower anchor bars built onto the floor. Whenever possible, MARUTI SUZUKI recommends that child restraint systems be installed on the rear seat. According to accident statistics, children are safer when properly restrained in rear seating positions than in front seating positions.

**NOTE:**

Observe any statutory regulation about child restraints.

**⚠ WARNING**

61M0241

- **Do not install a child restraint system on the front passenger's seat.**
- **When installing a child restraint system to the rear seat, touching the child's foot or the child restraint system to the seatback of the front seat can cause serious injury to the child in the event of an accident. Adjust the front seat so that it does not touch the child or the child restraint system.**

(Continued)

**⚠ WARNING**

(Continued)

- **If child restraint systems are not installed properly, children or other occupants could be seriously injured in the event of an accident. Secure the child restraint system firmly according to both this manual and the instruction provided by child restraint system's manufacturer.**
- **If the child is not secured properly in the child restraint system, it could cause serious injury to the child in the event of an accident. Use the child restraint system correctly following the instruction provided by child restraint system's manufacturer.**
- **If you use the child restraint system which was severely damaged by an accident, etc., it may not provide the best performance. This may cause severe injury to a child. If the child restraint system was severely damaged by an accident, etc., do not reuse the child restraint system even though its appearance looks normal.**

## FOR SAFE DRIVING

### Child Restraint System for India

#### Child Restraint

The suitability of each passenger's seat position for carriage of children and fitting of child restraint system is shown in the table below. Whenever you carry children up to 12 years of age, properly use the child restraints which conform to AIS 072 or UN R44<sup>\*1</sup> or UN R129<sup>\*1</sup> the standard for child restraints, referring to the table.

\*1: UN R44/R129 means the international regulation for the child restraint system.

#### Child Restraint Systems Installation Suitability for Each Seat Position (AIS 072 Format)

MASS GROUP#		Seating position (or other site)				
		Front Passenger	Rear Outboard	Rear Center	Intermediate Outboard	Intermediate Center
Group 0	Up to 10 kg	X	U	X	N.A.	N.A.
Group 0+	Up to 13 kg	X	U	X	N.A.	N.A.
Group I	9 to 18 kg	X	U	X	N.A.	N.A.
Group II	15 to 25 kg	X	U	X	N.A.	N.A.
Group III	22 to 36 kg	X	U	X	N.A.	N.A.

Key letters in the above table indicates the following:

U = Suitable for 'universal' category restraints approved for use in this mass group

X = Seat position not suitable for children in this mass group

N.A = Seat position not available for children in this mass group.

#### NOTE:

- 'universal' is the category as per AIS 072.
- 'Outboard' indicates window side seat.

#Mass Groups are classification of child restraint systems which conform to AIS 072 or UN R44.

Child Restraint Systems Installation Suitability for Each Seat Position (UN R16\*2 Format)

55UM02005

NOTE:

For detailed information on seating positioning for child restraint system, please refer to the table on the next page.

①	 
②	  
③	
④	  

	It is suitable for universal category of child restraint system fixed with the vehicle seat belt.
	It is suitable for i-Size and ISOFIX child restraint system.
	This seat is equipped with Top tether anchorage point.
	Never use a rearward facing child restraint system on passenger seat with active passenger airbag.
	It is not suitable for child restraint system.

NOTICE

\*2: UN R16 means the international regulation for safety belts, including compatibility with child restraint systems.

## FOR SAFE DRIVING

### Detailed information for child restraint system (UN R16 Format)

Seat position number	Seating position			
	①	②	③	④
Seating position suitable for universal belted (YES/NO)	NO	YES	NO	YES
i-Size seating position (YES/NO)	NO	YES	NO	YES
Seating position suitable for lateral fixture (L1/L2)*	NO	X	NO	X
Suitable rear-facing fixture (R1/R2X/R2/R3)*	NO	R1, R2, R3	NO	R1, R2, R3
		R2X		R2X
Suitable front-facing fixture (F2X/F2/F3)*	NO	F2, F3	NO	F2, F3
		F2X		F2X
Suitable booster fixture (B2/B3)*	NO	B2, B3	NO	B2, B3

Key letters in the above table indicates the following:

YES =Suitable for this seating position

NO = Not suitable for this seating position

X =This ISOFIX seat position is not suitable for ISOFIX child restraint systems in this fixture.

The child restraint system can be used in the seating positions for fixture shown in the above table.

**NOTE:**

\*For child restraint system fixtures mentioned herein, refer to table on the next page.

If your child restraint system has no size class (or if you cannot find information in the following table), refer to the child restraint system suitability information for the vehicle or ask with child seat retailer.

**ISOFIX child restraint systems are shown as follows:**

ISOFIX child restraint systems are divided into different mass group, size class and fixture.

Mass group	Size class of Child restraint system	Fixture	Description
0 (up to 10 kg)	F	L1	Left Lateral facing position Child Restraint Systems (carry-cot)
	G	L2	Right Lateral facing position Child Restraint Systems (carry-cot)
	E	R1	Rearward facing Infant Child Restraint Systems
0+ (up to 13kg)	E	R1	Rearward facing Infant Child Restraint Systems
	D	R2	Reduced-Size rearward facing toddler Child Restraint Systems
	–	R2X	Reduced-Size rearward facing toddler Child Restraint Systems
	C	R3	Full-Size rearward facing toddler Child Restraint Systems
I (9kg to 18kg)	D	R2	Reduced-Size rearward facing toddler Child Restraint Systems
	–	R2X	Reduced-Size rearward facing toddler Child Restraint Systems
	C	R3	Full-Size rearward facing toddler Child Restraint Systems
	B	F2	Reduced-Height forward facing toddler Child Restraint Systems
	B1	F2X	Reduced-Height forward facing toddler Child Restraint Systems
	A	F3	Full-Height forward facing toddler Child Restraint Systems

## FOR SAFE DRIVING

---

Mass group	Size class	Fixture	Description
II (15kg to 25kg)	X	X	-
III (22kg to 36kg)	X	X	-

Key letters in the above table indicates the following:  
X = There is no fixture for this mass group.

### **Booster seat fixtures are shown as follows;**

Fixture	Description
B2	Booster seat, reduced width 440 mm
B3	Booster seat, full width 520 mm

**Installation suitability of MARUTI SUZUKI recommendation child restraint systems for India**

Body size	Direction of child restraint system	Recommendation of Child restraint system (#A)	Seating position			
			①	②	③	④
40 - 83 cm ≤ 13 kg	Rear-facing	BRITAX RÖMER BABY-SAFE 3 i-SIZE	NO	YES (#1)	NO	YES (#1)
40 - 83 cm ≤ 13 kg	Rear-facing	BRITAX RÖMER BABY-SAFE 3 i-SIZE and VARIO BASE 5Z	NO	YES	NO	YES
76 - 105 cm and exceed 15 months ≤ 20 kg	Front-facing	BRITAX RÖMER KING PRO	NO	YES (#1)	NO	YES (#1)
76 - 105 cm and exceed 15 months ≤ 22 kg	Front-facing	BRITAX RÖMER TRIFIX 2 i-SIZE	NO	YES	NO	YES

Key letters in the above table indicates the following:

YES =It is suitable for this seating position

NO = It is not suitable for this seating position

#1: Only belted.

#A: These child restraint systems are MARUTI SUZUKI Genuine Accessory which comply with the UN R129, refer to the genuine accessories catalog.

## FOR SAFE DRIVING

### Securing child restraint system by seat belt

Choose the appropriate seat for the child's age and physical size.

#### ⚠ WARNING

61M0241

- Do not install a child restraint system on the front passenger's seat.
- If you install a child restraint system in the rear seat, slide the front seat far enough forward so that the child's feet do not contact the front seatback. This will help avoid injury to the child in the event of an accident.

(Continued)

#### ⚠ WARNING

(Continued)

- Do not hold a child on passenger's lap when the vehicle is in motion.
- Even if the passenger holds the child tightly, he/she would not be supported enough in the event of an accident and it could result in a serious injury of the child.

### Securing

#### ⚠ WARNING

If child restraint systems are not installed properly, children or other occupants could be seriously injured in the event of an accident. Secure the child restraint system firmly according to both this manual and the instruction provided by child restraint system's manufacturer.

This section explains securing the child restraint system in the rear seat.

- 1) Make sure that the child restraint system is securely fastened to the main seat.
- 2) Make sure to pass the seat belt of the passenger's seat through the specified parts, according to the instruction manual that came with the child restraint system.

59RN02140

- 3) Insert the tongue plate (3) firmly into the seat belt buckle (4) until you hear a click.
  - The child restraint system in the above figure is a typical example.
- 4) Make sure the child seat is installed properly according to the instructions provided by the child restraint system manufacturer.
  - If the child restraint system is not installed properly, consult the retailer where you purchased the child restraint system.

**Securing child restraint system by ISOFIX**

**Securing**

**⚠ WARNING**

If child restraint systems are not installed properly, children or other occupants could be seriously injured in the event of an accident. Secure the child restraint system firmly according to both this manual and the instruction provided by child restraint system's manufacturer.

55UM02024

(1) Lower anchorage

Your vehicle is equipped with the lower anchorages in the rear seat outboard seating positions for securing a ISOFIX type of child restraints with the connecting bars. The lower anchorages are located where the rear of the seat cushion meets the bottom of the seatback.

**⚠ WARNING**

Install the ISOFIX type of child restraint(s) in the only outboard seating positions, not in the central position for the rear seat.

Install the ISOFIX type child restraint system according to the instructions provided by the child restraint system manufacturer. After installation, try moving the child restraint system in all directions especially forward to check that connecting bars are securely latched to the anchorages.

56RH00271

Your vehicle is equipped with the top tether anchorages. Use the top tether strap of the child restraint according to the instructions provided by the child restraint system manufacturer.

Here is a general instruction:

**⚠ CAUTION**

If the child restraint is fitted improperly, a child sitting in it could be injured in a collision.

## FOR SAFE DRIVING

78F114

- 1) Place the child restraint in the rear seat, inserting the connecting bars to the lower anchorages between the seat cushion and the seatback.

68LM268

- 2) Use your hands to carefully align the connecting bar tips with the anchorages. Take care not to pinch your fingers.

54G184

- 3) Push the child restraint toward the anchorages so that the connecting bar tips are partially hooked to the anchorages. Use your hands to confirm the position.

54G185

- 4) Grasp the front of the child restraint and push the child restraint forcefully to latch the connecting bars. Check that they are securely latched by trying to

move the child restraint system in all directions, especially forward.

- 5) Make sure the child seat is installed properly according to the instructions provided by the child restraint system manufacturer.
  - If the child restraint system is not installed properly, consult the retailer where you purchased the child restraint system.
- 6) Attach the top tether strap referring to “Installation of child restraint with top tether” in this section.

When you put your child in the child restraint system, appropriately slide the front seat forward not to touch a part of your child’s body.

### NOTICE

**When installing a child restraint system to the rear seat, adjust the front seat position so that the front seat does not interfere with the child restraint system.**

**Installation of child restraint with top tether**

**CAUTION**  
 If the child restraint is fitted improperly, a child sitting in it could be injured in a collision.

55UM02008

Some child restraint systems require the use of a top tether strap. Top tether anchorages are provided in your vehicle at the locations shown in the illustrations. The number of the top tether anchorage brackets provided in your vehicle depends on the vehicle specification. Install the child restraint system as follows:

1) Secure the child restraint on the rear seat using the procedure described above for securing a restraint system that does not require a top tether strap.

- 2) Open the cover that is marked with the top tether anchorage bracket symbol to access the top tether anchorage bracket. Close the cover when not using the top tether anchorage bracket.
- 3) Hook the top tether strap to the top tether anchorage and tighten the top tether strap according to the instructions provided by the child restraint system manufacturer. Attach the top tether strap to the corresponding top tether anchorage located directly behind the child restraint. Do not attach the top tether strap to the luggage restraint loops (if equipped).

**WARNING**  
 Do not attach the child restraint top tether strap to the luggage restraint loops. Incorrectly attached top tether strap will reduce the intended effectiveness of the child restraint system.

86G032

- 4) When routing the top tether strap, pass the top tether strap as shown in the illustration.
- 5) Make sure the child seat is installed properly according to the instructions provided by the child restraint system manufacturer.
  - If the child restraint system is not installed properly, consult the retailer where you purchased the child restraint system.

**NOTICE**  
 When installing a child restraint system to the rear seat, adjust the front seat position so that the front seat does not interfere with the child restraint system.

*NOTE:*  
 MARUTI SUZUKI recommends use of MARUTI SUZUKI Genuine accessory of "Child seat, ISOFIX".

**WARNING**  
 If the seat belt, etc. gets stuck in the child restraint system, it may not be secured properly and this may cause severe injury to a child in a collision. When you install the child restraint system, check that obstacles and the seat belt do not exist near the ISOFIX anchorages and the top tether anchorages.

## FOR SAFE DRIVING

### Supplemental Restraint System (airbags)

#### **⚠ WARNING**

This section describes the protection provided by your MARUTI SUZUKI vehicle's supplemental restraint system (airbags). Read and follow all instructions carefully to minimize your risk of severe injury or death in the event of a collision.

Your vehicle is equipped with a supplemental restraint system consisting of the following components in addition to a lap-shoulder belt at each seating position.

- (1) Side curtain airbag module
- (2) Side crash sensor
- (3) Front passenger's front airbag module
- (4) Driver's front airbag module
- (5) Forward crash sensor
- (6) Front seat belt pretensioner
- (7) Side airbag module
- (8) Airbag controller

55UM02003

### What is SRS airbag system?

SRS stands for “Supplemental Restraint System”. This system aims to restrain passengers in their seats for safety.

55UM02014

If airbag warning light on the instrument cluster does not blink or come on when the ignition switch is first turned to “ON” position, or airbag warning light stays on, or comes on while driving, the airbag system (or the seat belt pretensioner system) may not work properly. Have the airbag system inspected by a MARUTI SUZUKI authorized workshop as soon as possible.

**⚠ WARNING**

- **SRS airbag system is not a substitute for seat belts. SRS airbag system is the supplemental restraint system and will provide the effectiveness by using the seat belts at the same time. If you and the passengers do not fasten their seat belts, it may result in severe injury in a sudden braking or a collision. Even when you drive the vehicle equipped with SRS airbag system, make sure to fasten seat belt.**
- **If the seat belts are not fastened properly, airbags may not provide the best performance. This may cause severe injury in a sudden braking and a collision. Make sure that the driver and all the passengers fasten the seat belts properly in a correct posture.**

*NOTE:*  
Via the event data recorder (EDR) system, this vehicle records and accumulates data when the airbag is deployed.

### Front airbags

80J090

Front airbags are designed to inflate in severe frontal collisions when the ignition switch is in “ON” position.

*NOTE:*  
In a frontal angle collision, the side airbags and side curtain airbags may inflate.

Front airbags are not designed to inflate in rear impacts, side impacts, rollovers or minor frontal collisions, since they would offer no protection in those types of accidents. Since an airbag deploys only one time during an accident, seat belts are needed to restrain occupants from further movements during the accident.

## FOR SAFE DRIVING

Therefore, an airbag is not a substitute for seat belts. To maximize your protection, always fasten your seat belts. Be aware that no system can prevent all possible injuries that may occur in an accident.

### Side airbags and side curtain airbags

68KM090

Side airbags and side curtain airbags are designed to inflate in severe side impact collisions when the ignition switch is in "ON" position.

Side airbags and side curtain airbags are not designed to inflate in frontal or rear collisions, rollovers or minor side collisions, since they would offer no protection in those types of accidents. Only the side airbag and side curtain airbag on the side of the vehicle that is struck will inflate. However, in a frontal angle collision, the side airbags and side curtain airbags may inflate. Since an airbag deploys only one time during an accident, seat belts are needed to restrain occupants from further movements during the accident.

Therefore, an airbag is not a substitute for seat belts. To maximize your protection, always fasten your seat belts. Be aware that no system can prevent all possible injuries that may occur in an accident.

### When driving the vehicle with SRS airbag system

Make sure to fasten seat belt

65J106

#### **⚠ WARNING**

**SRS airbag system is not a substitute for seat belts. SRS airbag system is the supplemental restraint system and will provide the effectiveness by using the seat belts at the same time. If you and the passengers do not fasten their seat belts, it may result in severe injury in a sudden braking or a collision. Even when you drive the vehicle equipped with SRS airbag system, make sure to fasten seat belt.**

**Correct sitting posture**

80J014

There is a possibility of major impact from the front airbags when the airbags activate and deploy instantaneously, the driver and the passenger should sit deeply into their seats and touch their backs lightly to the seatback. In addition, the seat should be positioned so that it is not too far forward.

59RN02190

**⚠ WARNING**

- Do not position your face, chest, etc., close to the steering wheel or instrument cluster, and do not rest your feet up into this area. Otherwise, there is the risk of serious injury due to major impact if the airbag were to be deployed.
- If side airbags or side curtain airbags activate, you may get strong impact, resulting in severe injury. Do not put hands out of the window or lean on the door. Also, when sitting in the rear seat, do not hug the seatback of the front seat.

**For proper SRS airbag system operation**

69RHS169

**⚠ WARNING**

- Do not modify the steering wheel, such as replacing it, placing stickers on it, painting it or putting the cover on it.
- Do not place stickers on the airbag units or the surrounding areas or paint them. Also, do not attach any accessories, fragrances, electronic toll control units, portable car navigation systems, etc. to this area, and do not lean umbrellas or other objects against it.
- Do not attach accessories (except for MARUTI SUZUKI genuine products), etc., to the windshield or the inside rearview mirror.

## FOR SAFE DRIVING

59RN02200

### **WARNING**

For the vehicle with side airbags or side curtain airbags, do not attach accessories such as cup holders or hangers near the door. Also, do not lean umbrellas against the door.

### Warning label of SRS airbag for front passenger's seat

72M00150

You may find this label on the sun visor.

### **WARNING**

**NEVER** use a rearward facing child restraint on a seat protected by an **ACTIVE AIRBAG** in front of it, **DEATH** or **SERIOUS INJURY** to the **CHILD** can occur.

### Description of warning label

Symbol	Symbol meaning
	Do not install a rear-facing child restraint system to the front passenger's seat equipped with an airbag.
	If the front passenger's seat airbag were to be deployed, a major impact could be applied to a rear-facing child restraint system and the child.
	For more details, read this owner's manual.

**“SRS AIRBAG” mark and location**

**Driver’s front airbag**

55UM02015

**Front passenger’s front airbag**

70TH02029

**Side airbags**

55UM02016

**Side curtain airbags**

70TH02031

The driver’s front airbag is located behind the center pad of the steering wheel and the front passenger’s front airbag is located behind the passenger’s side of the dashboard.

Side airbags are located in the part of the front seatbacks closest to the doors.

Side curtain airbags are located in the roof lining.

The words “SRS AIRBAG” are molded into the airbag covers to identify the location of the airbags.

**⚠ WARNING**

- If the airbag stored place is damaged or cracked, the airbag system may not work properly, which could result in serious injury in the event of a collision. Have your vehicle inspected by a MARUTI SUZUKI authorized workshop.
- If you smash the airbag stored place or apply a strong impact to it, the airbag may not work properly or may inflate unexpectedly, resulting in serious injury. Do not smash the airbag stored place or apply a strong impact to it.

## FOR SAFE DRIVING

### Installation of child restraint system

Refer to "Child restraint systems" in this section for details on securing your child.

### Handling for airbags

#### For proper SRS airbag system operation

If objects are positioned within the range where the airbag deploys, such objects might be impacted and blown off or the airbag may not deploy properly.

**⚠ WARNING**

- As the airbag may not provide the best performance and it may result in severe injury in case of emergency, observe the following points.
  - Do not modify the suspension. If the vehicle height or the stiffness of the suspension were to change, airbag malfunction may result.
  - When installing a grille guard, etc., on the front of the vehicle, consult a MARUTI SUZUKI authorized workshop. If you modify the front part of the vehicle, the airbag system may not work properly.
  - When installing radio equipment, etc., consult a MARUTI SUZUKI authorized workshop. Radio waves, etc., from a radio may adversely affect the computer module used in the airbag system.

(Continued)

**⚠ WARNING**

(Continued)

- Even though your vehicle is moderately damaged by a collision, it may not be severe enough to trigger front, side or side curtain airbags to inflate. If your vehicle sustains any front-end or side damage, have the airbag system inspected by a MARUTI SUZUKI authorized workshop to ensure that it works properly. If the original function of airbag system is damaged, airbag may not function effectively and fully in case of an emergency.
- If the airbag-related parts are replaced or repaired, which has an impact on the airbag functions, the airbag may activate unnecessarily or may not activate when necessary. The following situations may give a negative impact to the airbag system. In these cases, consult a MARUTI SUZUKI authorized workshop beforehand.
  - Removing the steering wheel, repairing the areas around the steering wheel, etc.

(Continued)

**⚠ WARNING**

(Continued)

- Center console repair, repairs around the instrument cluster, repairs under the front seat, and repairs of electrical wiring
- Installation of audio equipment, etc.
- Sheet metal painting and repairs around the dashboard
- Replacement of the front seat and repairs around the seat
- Repairs around the front pillar, the back pillar or the roof side
- Repairs around the center pillar
- Repairs around the sunroof

**Driver's front airbag precautions**

69RHS022

**⚠ WARNING**

- Do not position your hands, face, chest, etc., close to airbag unit area or lean on the steering wheel. Otherwise, there is the risk of serious injury due to major impact if the airbag were to be deployed.
- Do not modify the steering wheel, such as replacing it, placing stickers on it, painting it or putting the cover on it. Otherwise, the airbag may not deploy normally in case of emergency, resulting in severe injury.

**Front passenger's front airbag precautions**

69RHS170

**⚠ WARNING**

- When riding in the front passenger's seat or when allowing a child to ride in this seat, be sure to observe the following points. Failure to do so may result in serious injury due to major impact if the airbag is deployed.
  - Do not position your hands or feet on the airbag unit area, and do not position your face, chest, etc., close to this area.
  - Do not allow a child to stand in front of the airbag unit area or sit on a passenger's lap in the front passenger's seat. Have a child ride in the rear seat wearing a seat belt.

(Continued)

## FOR SAFE DRIVING

### ⚠ WARNING

(Continued)

- For a child that is not yet big enough to wear a seat belt properly, be sure to use a child restraint system on the rear seat.

69RHS169

### ⚠ WARNING

- As the airbag may not provide the best performance and it may result in severe injury in case of emergency, observe the following points.
  - Do not place stickers on the airbag units or the surrounding areas or paint them. Also, do not attach any accessories, fragrances, electronic toll control units, portable car navigation systems, etc. to this area, and do not lean umbrellas or other objects against it.
  - Do not attach accessories (except for MARUTI SUZUKI genuine products), etc., to the windshield or the inside rearview mirror.

### Side airbags and side curtain airbags precautions

59RN02200

### ⚠ WARNING

If you attach accessories such as cup holders or hangers near the door, or if you lean umbrellas against the door, when side airbags or side curtain airbags activate, these objects may be thrown out and may not inflate properly, resulting in severe injury.

Do not attach accessories such as cup holders or hangers near the door. Also, do not lean umbrellas against the door.

## Function of airbags

### How the system works

In a frontal collision, the collision sensors will detect rapid deceleration, and if the controller judges that the deceleration represents a severe frontal collision, the controller will trigger the inflators. The inflators inflate the appropriate airbags with nitrogen or argon gas. The inflated airbags provide a cushion for your head and upper body. The airbag inflates and deflates so quickly that you may not even realize that it has activated. The airbag will neither hinder your view nor make it harder to exit the vehicle.

A seat belt helps keep you in the proper position for maximum protection when an airbag inflates. Adjust your seat as far back as possible while still maintaining control of the vehicle. Sit fully back in your seat; sit up straight; do not lean over the steering wheel or dashboard. Front occupants should not lean on or sleep against the door. Refer to "Seat adjustment" and "Seat belt" in this section for details on proper seat and seat belt adjustments.

59RN02370

59RN04670

59RN02360

### ⚠ WARNING

- The driver should not lean over the steering wheel. The front passenger should not rest his or her body against the dashboard where a front air bag is mounted or a child should not stand in front of the dashboard. Otherwise, he or she will get too close to the dashboard. For vehicles with side air bags and side curtain air bag, occupants should not lean on or sleep against the door. In these situations, the out-of-position occupant would be too close to an inflating airbag, and may suffer severe injury.

(Continued)

### WARNING

(Continued)

- Do not attach any objects to, or place any objects over, the steering wheel or dashboard. Do not place any objects between the airbag and the driver or front passenger. These objects may interfere with airbag operation or may be propelled by the airbag in the event of a collision. Also, these objects may move when you start moving vehicle or while vehicle is moving, they may interfere with driver's view or safe driving. In each condition, it may cause severe injury.
- Do not use non-genuine seat covers on the front seats, because non-genuine seat covers may obstruct the inflation of side airbags. MARUTI SUZUKI highly recommends MARUTI SUZUKI-genuine seat covers to be used when covering the front seats of such vehicles with side airbags. Also, near the door, do not place cup holders, hangers or any other objects and do not lean an umbrella, as these objects could be propelled by the airbag in the event of a collision. Either of these conditions may cause severe injury.

(Continued)

### WARNING

(Continued)

- Do not strike or apply significant levels of impact to the airbag component areas. It can cause the airbags to malfunction.
- Even though your vehicle is damaged by a collision, it may not be severe enough to trigger front, side or side curtain airbags to inflate. If your vehicle sustains any front-end or side damage, have the airbag system inspected by a MARUTI SUZUKI authorized workshop to ensure that it works properly. If the original function of air bag system is damaged, air bag may not function effectively and fully in case of an emergency.

### CAUTION

Airbags must inflate quickly and forcefully in order to reduce the chance of serious or fatal injuries. However, an unavoidable consequence of the quick inflation is that the airbag may irritate bare skin, such as the facial area against a front airbag. Wash off any residue as soon as possible to prevent skin irritation. Also, upon inflation, a loud noise will occur and some powder and smoke will be released. These conditions are not harmful and do not indicate a fire in the vehicle. Be aware, however, that some airbag components may be hot for a while after inflation. This may cause burn injury.

Your vehicle is equipped with a diagnostic module which records information about the airbag system if the airbags deploy in a collision. The module records information about overall system status, and which sensors activated the deployment.

**Servicing the airbag system**

If the airbags inflate, have the airbags and related components replaced by a MARUTI SUZUKI authorized workshop as soon as possible.

If your vehicle ever gets in deep water and the driver's floor is submerged, the airbag controller could be damaged. If this happens, ask a MARUTI SUZUKI authorized workshop to check the airbag system as soon as possible.

Special procedures are required for servicing or replacing an airbag. For that reason, only a MARUTI SUZUKI authorized workshop should be allowed to service or replace your airbags. Remind anyone who services your MARUTI SUZUKI vehicle that it has airbags.

Service on or around airbag components or wiring must be performed only by a MARUTI SUZUKI authorized workshop. Improper service could result in unintended airbag deployment or could render the airbag inoperative. Either of these two conditions may result in severe injury.

To prevent damage or unintended inflation of the airbag system, check that the battery is disconnected and the ignition switch has been in "LOCK" position for at least 90 seconds before performing any electrical service work on your MARUTI SUZUKI vehicle. Do not touch airbag system components or wires. The wires are wrapped with yellow tape or yellow tubing, and the couplers are yellow for easy identification.

 <b>CAUTION</b>
<p><b>If you do not handle the airbags properly, they may inflate unexpectedly, resulting in personal injury. When scrapping the airbags or the vehicle that has the airbags, consult a MARUTI SUZUKI authorized workshop.</b></p>

**Front airbag deployment conditions**

**Front airbags deploy (inflation)**

80J097

- Frontal collision with a fixed wall that does not move or deform at more than about 25 km/h

80J098E

- Strong impact equivalent to frontal collision such as above at left and right angles of about 30 degrees (1) or less from the front of your vehicle

## FOR SAFE DRIVING

### Front airbags may inflate

Receiving a strong impact to the lower body of your vehicle, the front airbags may inflate.

- Hitting a curb or medial strip

- Falling into a deep hole or ditch

- Landing hard or falling

### Front airbags may not inflate

The front airbags may not inflate when a strong impact has not occurred since the collision object (including living beings like animals) was easy to be deformed or moved, or the crashed portion of your vehicle was easy to be deformed.

Also, front airbags may not inflate in many cases when the collision angle is greater than about 30 degrees at left and right angles from the front of your vehicle. Also, in certain collisions at low speed, the airbag may not inflate.

- Frontal collision to a stopped vehicle at less than about 50 km/h

80J103

- Collision that the front of your vehicle goes under the bed of a truck etc.

80J105E

- Collision with a fixed wall or guardrail at left and right angles of greater than about 30 degrees (1) from the front of your vehicle

80J104

- Collision with a utility pole or stumpage

80J106

- Frontal collision with a fixed wall that does not move or deform at less than about 25 km/h

**Front airbags do not inflate**

Front airbags do not inflate in rear impacts, side impacts or rollovers, etc. However, these might inflate in a strong impact.

80J120

- Impact from the rear

80J119

- Impact from the side

## FOR SAFE DRIVING

80J110

- Vehicle rollover

### Side airbags and side curtain airbags deployment conditions

#### Side airbags and side curtain airbags deploy (inflation)

80J119

- Impacts from the side at about a right angle by a general passenger car to your vehicle at more than about 30 km/h or in a greater impact

### Side airbags and side curtain airbags may inflate in a strong impact

Side airbags and side curtain airbags may inflate even in a frontal collision, if there is a strong impact to the lateral direction.

80J102

- Frontal collision

52RM20730

- Hitting a curb or bump

80J100E

- Falling into a deep hole or ditch

80J101

- Landing hard or falling

**Side airbags and side curtain airbags may not inflate**

80J121

80J122

- Impact from the side to the vehicle body other than the passenger compartment

80J123

- Impact from the side at an oblique angle

80J124

- Impact from the side by a high hood vehicle

## FOR SAFE DRIVING

80J125

- Impact from the side by a motorcycle or bicycle

80J126

- Collision with a utility pole or stumpage

Side airbags and side curtain airbags do not inflate

80J120

- Impact from the rear

80J110

- Vehicle rollover

## When starting the engine

Be careful of carbon monoxide poisoning

### **⚠ WARNING**

Exhaust gases contain carbon monoxide, a potentially lethal gas that is colorless and odorless. If you breathe exhaust gases, you may feel drowsy, resulting in severe health problems or death in the worst case. If you start the engine, be careful of carbon monoxide poisoning.

Do not run engine in a poorly-ventilated area

52D334

**⚠ WARNING**

Avoid breathing exhaust gases. Exhaust gases contain carbon monoxide, a potentially lethal gas that is colorless and odorless. Since carbon monoxide is difficult to detect by itself, take the following precautions to help prevent carbon monoxide from entering your vehicle. Otherwise, it may result in severe health problems or death in the worst case.

(Continued)

**⚠ WARNING**

(Continued)

- Do not leave the engine running in garages or confined areas, with passengers inside. This may result in accumulation of carbon monoxide in cabin and may lead to suffocation or breathing problem and lead to death.
- Do not park with the engine running for a long period of time, even in an open area. In case of long periods, danger of choking and death on being inside the vehicle is a possibility when the engine is running. If it is necessary to sit for a short time in a parked vehicle with the engine running, check that the air intake selector is set to "FRESH AIR" and the blower is at high speed.
- Avoid operating the vehicle with the trunk open. If it is necessary to do so, check that the all windows are closed, and the blower is at high speed with the air intake selector set to "FRESH AIR".
- To allow proper operation of your vehicle's ventilation system, keep the air inlet grill in front of the windshield clear of snow, leaves or other obstructions at all times.

(Continued)

**⚠ WARNING**

(Continued)

- Keep the exhaust tailpipe area clear of snow and other material to help reduce the buildup of exhaust gases under the vehicle. This is particularly important when parked in blizzard conditions.
- Have the exhaust system inspected periodically for damage and leakage. Any damage or leakage should be repaired immediately.

## FOR SAFE DRIVING

### Do not take a nap with engine running

69RHS172

#### WARNING

Do not take a nap with the engine running. Otherwise, it may result in an accident, severe health problems or death in the worst case.

- Exhaust gases can enter the vehicle due to surrounding conditions and wind direction, possibly causing carbon monoxide poisoning.
- The gearshift lever could change unintentionally, or the accelerator pedal could be depressed accidentally, causing an accident.
- If you were to accidentally step on the accelerator pedal while asleep, the engine and exhaust system could overheat, resulting in danger of fire

### When loading the luggage

Loading too much luggage in the vehicle may have negative effects to the vehicle body or driving performance.

#### WARNING

59RN02230

- Fuel, chemical containers, spray cans etc. may catch a fire or cause an explosion. Do not bring these objects into the vehicle.

(Continued)

**⚠ WARNING**

(Continued)

59RN02240

- If you place any objects on the instrument panel, these objects may move and interfere with driver's view or safe driving. Also, the front passenger's front airbag may not work properly or these objects may be thrown out when the airbag inflates in an accident. Do not place any objects on the instrument panel.

59RN07290

**⚠ CAUTION**

- If you hang any objects on the gearshift lever or use it as a handrest, the gearshift lever may not work properly, resulting in a malfunction or an accident. Do not hang any objects on the gearshift lever or use it as a handrest.
- If you pile up luggage, it may interfere with driver's view. Also, in a sudden braking, the luggage would jump out and it may result in an accident. Do not pile up luggage in the vehicle.
- If animals move about in the vehicle, it may interfere with driver's view. Also, in a sudden braking, it may result in an accident. When you bring animals into the vehicle, make sure that animals do not move about.

## BEFORE DRIVING

### Keys

Your vehicle comes with a pair of identical keys. Keep one of the keys as a spare key in a safe place. One key can open all of the locks on the vehicle.

#### **⚠ WARNING**

**When you take the transmitter or remote controller in an airplane, do not press the lock button or the unlock button. When you put the transmitter or remote controller in a bag, place it so that either of these buttons is not pressed easily. If either of these buttons is pressed, radio wave may interfere with operation of the airplane.**

**\*The transmitter or remote controller is an electronic device which has a restriction on its use in the airplane.**

### Key number plate

55T030020

The key identification number (1) is stamped on a metal tag (2) provided with the keys. Keep the tag in a safe place. If you lose your keys, you will need this number to have new keys made. Write the number below for your future reference.

KEY NUMBER:

#### NOTE:

- Carefully keep the tag in the place other than your vehicle, so that someone does not find out about the key identification number. If you lose your key, inform the key identification number of a MARUTI SUZUKI authorized workshop.
- When you resell or transfer your vehicle to a new owner or operator, give the key number plate with your vehicle to him or her.

### Immobilizer system

For detail of immobilizer system, refer to “Immobilizer System” in the “OPERATING YOUR VEHICLE” section.

## Doors

**⚠ WARNING**

- When a seat belt or luggage is caught by a door, the door cannot be shut properly and it may open while driving. This may cause an accident. Close a door not to catch a seat belt or luggage in the door.
- When you keep the trunk open with the engine running, exhaust gases will enter the vehicle and cause carbon monoxide poisoning. This may cause severe health problems or death in the worst case. Do not keep the trunk open with the engine running.
- To prevent fire or theft, stop the engine and lock the doors when leaving the vehicle.
- When opening a door, be careful of the surrounding area. An accident, such as a collision with the vehicle or a pedestrian behind your vehicle, may occur. Be very careful when opening a door especially on a windy day.

**⚠ CAUTION**

- When a child opens or closes a door, his / her hands, legs or head may be caught in the door and this may cause injury. Opening or closing a door should be performed not by a child but by an adult.
- When the trunk is not fully opened, it may be unexpectedly closed and this may cause injury. When opening the trunk, open it fully.
- Be cautious while using the trunk lid on inclined surface or in windy weather.
- Opening the trunk right behind the exhaust pipes may cause burn injury. With the engine running, do not open the trunk right behind the exhaust pipes.

**NOTE:**

- When leaving the vehicle even for a short period of time, do not leave cash or valuables in the vehicle, to avoid risk of theft.
- Depending on the setting conditions of the security alarm and the opening conditions of the doors, an alarm may operate. Refer to "Security System" in this section.

## Side door locks

59RN03180

- (1) UNLOCK
- (2) LOCK
- (3) Front
- (4) Rear

To lock a front door from outside the vehicle:

- Insert the key and turn the top of the key toward the front of the vehicle, or
- Turn the lock knob forward, then pull and hold the door handle as you close the door.

To unlock a front door from outside the vehicle, insert the key and turn the top of the key toward the rear of the vehicle.

## BEFORE DRIVING

70TH03001

- (1) UNLOCK
- (2) LOCK

To lock a door from inside the vehicle, turn the lock knob forward. Turn the lock knob rearward to unlock the door.

To lock a rear door from outside the vehicle, turn the lock knob forward and close the door. You do not need to pull and hold the door handle as you close the door.

### NOTE:

*Be sure to hold the door handle when you close a locked front door, or the door will not remain locked.*

## Central door locking system

59RN03180

- (1) UNLOCK
- (2) LOCK
- (3) Front
- (4) Rear

You can lock and unlock all doors simultaneously by using the key in the driver's door lock.

To lock all doors simultaneously, insert the key in the driver's door lock and turn the top of the key toward the front of the vehicle once.

To unlock all doors simultaneously, insert the key in the driver's door lock and turn the top of the key toward the rear of the vehicle twice.

### NOTE:

*You can switch the function that unlocks all doors from requiring two turns to requiring one turn, and vice versa, via the information display setting mode. For details on how to use the information display, refer to "Setting mode of information display" in "SPECIFICATIONS" section.*

To unlock the driver's door only, insert the key in that door lock and turn the top of the key toward the rear of the vehicle once.

55UM03013

- (1) LOCK
- (2) UNLOCK

You can also lock or unlock all doors by pressing the front or rear of the switch, respectively.

**NOTE:**

- You can also lock or unlock all doors by operating the transmitter. Refer to "Keyless entry system transmitter" in this section.

**Trunk lid**

55UM03006

To unlock the all doors, push UNLOCK button twice on the keyless entry system transmitter. Push the trunk lid unlatch switch (1) and lift the trunk lid to open the trunk lid.

55UM03008

You can unlock the lid by pulling the trunk lid opener lever (2) located on the outboard side of the driver's side.

**⚠ WARNING**

**Always make sure that the trunk lid is closed and latched securely. Otherwise, it may open unexpectedly while driving. Completely closing it also helps keep exhaust gases from entering the vehicle.**

## BEFORE DRIVING

### Keyless entry system transmitter

Your vehicle is equipped with a keyless entry system transmitter.

The transmitter has only a keyless entry system. For details, refer to the following explanations.

79MH0237

- (1) LOCK button
- (2) UNLOCK button

You can lock or unlock all doors simultaneously by operating the transmitter near the vehicle.

### WARNING

**Radio waves from the keyless entry system antenna(s) may interfere with operation of electrical medical equipment such as pacemakers. Failure to take the precautions listed below can increase the risk of severe injury or death due to radio wave interference.**

- **Anyone who uses electrical medical equipment such as a pacemaker should consult the medical equipment supplier or their medical advisor about whether radio waves from the antenna(s) can interfere with the medical equipment.**
- **If radio wave interference is a concern, have the function of the antenna(s) disabled by a MARUTI SUZUKI authorized workshop.**

### Central door locking system

- To lock all doors, push LOCK button (1) once.
- To unlock only the driver's door, push UNLOCK button (2) once.
- To unlock other doors, push UNLOCK button (2) once again.

#### NOTE:

*You can switch the function that unlocks all doors from requiring two pushes to requiring one push, and vice versa, via the information display setting mode. For details on how to use the information display, refer to "Setting mode of information display" in "SPECIFICATIONS" section.*

The turn signal lights will flash once and the siren will sound once (if equipped) when the doors are locked.

When the doors are unlocked:

- The turn signal lights will flash twice and the siren will sound twice (if equipped).
- If the interior light switch is in DOOR position, the interior light will turn on for about 15 seconds and then fade out. If you insert the key into the ignition switch during this time, the light will start to fade out immediately.

Check that the doors are locked after you operate LOCK button (1).

**NOTE:**

If no door is opened within about 30 seconds after UNLOCK button (2) is operated, the doors will automatically lock again.

**NOTE:**

- If you lock the doors using the transmitter when the engine hood is open, the siren will sound 3 times to remind you (if equipped).
- If the security system was triggered due to an unauthorized entry into the vehicle and then you unlock the doors using the transmitter, the siren will sound 4 times to remind you. If this happens, check whether your vehicle has been broken into while you were away from it.
- Once you push both of the LOCK button (1) and UNLOCK button (2), then you push one of the buttons within 5 seconds, the siren will not sound (if equipped). However, push one of the buttons 5 seconds later, the siren will sound.
- You can set whether the siren sounds (if equipped) when locking or unlocking the door(s) via the setting mode of the information display. For details on how to use the information display, refer to "Setting mode of information display" in "SPECIFICATIONS" section.

**NOTE:**

- The maximum operating distance of the keyless entry system transmitter is about 5 m (16 ft.), but this can vary depending on the surroundings, especially near

other transmitting devices such as radio towers or CB (Citizen's Band) radios.

- The door locks cannot be operated with the transmitter, if the ignition key is inserted in the ignition switch.
- When any door is open, the door locks can only be unlocked with the transmitter, and the turn signal light will not flash.
- If you lose one of the transmitters, ask your MARUTI SUZUKI authorized workshop as soon as possible for a replacement. Have your dealer program the new transmitter code in your vehicle's memory so that the old code is erased.

**NOTICE**

**The transmitter is a sensitive electronic instrument. To avoid damaging the transmitter:**

- Do not expose it to impacts, moisture or high temperature such as by leaving it on the dashboard under direct sunlight.
- Keep the transmitter away from magnetic objects such as a television.

**Car locator function**

This function helps in locating the vehicle. Push both of the LOCK button (1) and UNLOCK button (2) for more than 3 seconds.

The turn signal lights will blink for about 27.5 seconds. Also, the siren will sound for about 27.5 seconds at the same time.

To cancel the car locator function, press any button (LOCK or UNLOCK).

You can also turn the ignition switch to the "ON" position to cancel the car locator function.

**NOTE:**

The car locator function will not activate when the key is in the ignition switch or pre warning / full blast warning by shock sensor or alarm is in activated condition.

## BEFORE DRIVING

### Security system (if equipped)

The security system is armed after you close and lock all doors (including engine hood and trunk lid) by using the keyless entry system transmitter.

Once the system is armed, any attempt to open a door by using any other means (\*) than the keyless entry system transmitter or open the engine hood, will cause the alarm to be triggered.

\* These means include the following:

- The key
- The lock knob on a door
- The central door locking switch
- The trunk lid unlatch switch

Also, in case that you have set the shock sensor to enabled state and set sensitivity of the pre-warning function and full blast warning function to a level other than 0, the warning will be triggered in case of any attempt to tamper with the vehicle. The shock sensor can be selected enabled or disabled state, and sensitivity of each warning can be adjusted as desired. To set the shock sensor, ask your MARUTI SUZUKI authorized workshop or use the setting mode of the information display.

**NOTE:**

- *The default setting of the shock sensor is in the disabled state. Set to the enabled state and adjust sensitivity of each warning according to your preference. For details on how to use the information display, refer to "Setting mode of information display" in "SPECIFICATIONS" section.*
- *Your dealer may have already set the shock sensor of the vehicle to the enabled state before you purchase it. Consult your dealer for further information.*

**NOTE:**

- *The security system generates alarms when any of the predetermined conditions is met. However, the system does not have any function of blocking unauthorized entry into the vehicle.*
- *Always use the keyless entry system transmitter to unlock the doors when the security system has been armed. Using a key instead will trigger the alarm.*
- *If a person who does not know the security system is going to drive the vehicle, we recommend you explain the system and its operation to the person. Mistakenly triggering the alarm may cause a nuisance to others.*
- *Even if the security system is armed, you should still be careful to guard against theft. Do not leave money or valuable things in the vehicle.*

### How to arm the security system

Lock all doors (including engine hood and trunk lid) using the keyless entry system transmitter.

When the system is armed, the indicator continues to blink at intervals of approximately 2 seconds.

55UM03019

**NOTE:**

- *To prevent the alarm from being accidentally triggered, avoid arming it while anyone remains inside the vehicle. The alarm will be triggered if any person inside opens the door, trunk, engine hood, or the warning may be triggered if anyone swings the vehicle (if the shock sensor is in the enabled state).*
- *The security system is not armed when all doors are locked using the key from outside, using the door lock knobs or the central door locking switch from inside.*

- *If any door is not operated within approximately 30 seconds after the doors have been unlocked using the keyless entry system transmitter, the doors are automatically locked again. When the doors are locked, the security system will be armed.*
- *If the security system indicator (1) blinks when the ignition switch is in the "ON" position, there may be something wrong with the security system. Ask your MARUTI SUZUKI authorized workshop to inspect the system.*

### **How to disarm the security system**

Simply unlock the doors using the keyless entry system transmitter. The security system indicator will go out, indicating that the security system is disarmed.

### **How to stop the alarm**

Should the alarm be triggered accidentally, the alarm will stop by the following operations.

- Turn the ignition switch to "ON" position in case of emergency.
- Unlock the doors using the keyless entry system transmitter.

**NOTE:**

- *Even after the alarm has stopped, if you lock the doors using the keyless entry system transmitter, the security system will be rearmed.*
- *If you disconnect the battery while the security system is in the armed condition or the alarm is actually in operation, the alarm will be re-triggered when the battery is reconnected.*
- *Even after the alarm has stopped at the end of the predetermined operation time, it will be triggered again if any of the doors, trunk or engine hood is opened, without disarming the security system.*

### **Checking whether the alarm has been triggered during parking**

If the alarm was triggered and you then turn the ignition switch to "ON" position, the security system indicator will blink rapidly for about 8 seconds and a buzzer will beep 4 times during this period. If this happens, check whether the vehicle has been broken into while you were away from it.

### **Security system indication**

- If any of the doors or trunk are opened without unlocking by the keyless entry system transmitter, all turn signal lights start to blink and the interior buzzer beeps intermittently. After 5 seconds, the siren will sound for about 27.5 seconds. The security system indicator continues to blink during this time.
- If the engine hood is opened, all turn signal lights blink, and the siren sounds for about 27.5 seconds. The security system indicator continues to blink during this time.

(If the shock sensor is in the enabled state)

- If the vehicle feels a shock higher than the pre-warning sensitivity, the siren sounds for about 2 seconds (pre-warning). If the vehicle feel a shock higher than the full blast warning sensitivity, the siren sounds for about 5 seconds (full blast warning). The security system indicator continues to blink during this time.

**NOTE:**

*If you set the full blast warning sensitivity higher than the pre-warning sensitivity in the setting mode of the information display, or the vehicle feels such shock as to be able to trigger the full blast warning, the full blast warning will be triggered preferentially. In this case, the pre-warning will not be triggered.*

## BEFORE DRIVING

### Windows

#### Electric window controls

The electric windows can only be operated when the ignition switch is in "ON" position.

#### Driver's side

55UM03014

The driver's door has a switch (1) to operate the driver's window, and a switch (2) to operate the front passenger's window or there are switches (3), (4), to operate the rear left and right passenger windows, respectively.

#### Passenger's door / rear door

70TH03014

The passenger's door has a switch (5) to operate the passenger's window.

81A009

To open a window, push the top part of the switch. To close the window, lift up the top part of the switch.

The driver's window has AUTO-DOWN and AUTO-UP features for greater convenience (at toll booths or drive-through restaurants, for example). These features allow the driver to open or close the window without holding the window switch in DOWN or UP position. Press down or lift up the driver's window switch completely and release it. To stop the window before it reaches the FULL-DOWN or FULL-UP position, pull up or push down the switch briefly.

## Lock switch

55UM03015

The driver's door also has a lock switch for the passenger's window(s). When you push in the lock switch, the passenger's window(s) cannot be raised or lowered by operating any of the switches (2), (3), (4) or (5). To restore normal operation, release the lock switch by pushing it again.

**⚠ WARNING**

- **When opening or closing a window, a part of body such as hands, legs and neck may be caught by the window and an accident may occur. When you operate a window, observe the following precautions:**
  - **A driver and the other passengers should be careful when opening or closing a window.**
  - **Do not allow a child to operate the window switches.**
  - **You should always lock the passenger's window operation when there are children in the vehicle. Children can be seriously injured if they get part of their body caught by the window during operation. Refer to "Lock switch" in this section for details.**
  - **When you leave your vehicle, make sure to turn the ignition switch to "LOCK" position. Then, carry your key with you and take a child or children out of the vehicle.**

(Continued)

**⚠ WARNING**

(Continued)

- **When you open or close the front passenger's window or the rear windows on the driver's side, check that the other passengers and children do not take their hands and faces outside the vehicle, before the window operation. Also, make sure to inform them that you will perform the window operation.**
- **When you operate the electric window controls from the outside of the window, your hands or neck may be caught by the window and an accident may occur. Do not operate the electric window controls from the outside of the window.**

**NOTE:**

*If you drive with one of the rear windows open, you may hear a loud sound caused by air vibration. To reduce the sound, open the driver's or front passenger's window, or narrow the rear window opening.*

## BEFORE DRIVING

### Pinching prevention function

The driver's window is equipped with a pinching prevention function. This function detects a foreign object that is caught in the window as it is being closed by AUTO-UP feature, which allows you to close the window without holding the window switch in UP position, and stops the window from closing to prevent damage.

#### WARNING

**The function may not detect the object depending on shape, size, hardness and position of the object caught by the closing window. This may cause severe injury. Be very careful when opening or closing the windows.**

#### CAUTION

- **The pinching prevention function does not operate while you are holding the window switch in UP position.**
- **The pinching prevention function may not detect an object caught in the window just before the window is fully closed.**

#### NOTE:

*Even if you cannot close the window by the AUTO-UP feature because there may be something wrong with the pinching prevention function, you can close the window by holding the window switch in UP position. If you drive in extreme off-road condition, the pinching prevention function may operate accidentally because the window reacts to vehicle jolting.*

### Pinching prevention function initialization

When you disconnect and reconnect the lead-acid battery or replace the fuse, the function will be deactivated. In this condition, the AUTO-DOWN feature will be deactivated, while the AUTO-UP feature may remain activated. The pinching prevention function needs to be initialized.

To initialize the pinching prevention function, use the following procedure:

- 1) Turn the ignition switch to "ON" position.
- 2) Open the driver's window fully by holding the window switch in DOWN position.
- 3) Close the driver's window by holding the switch in UP position, and keep holding the switch for 2 seconds after the window is fully closed.
- 4) Check the driver's window to see if the AUTO-DOWN/UP feature works.

#### WARNING

**As the pinching prevention function will not operate until its initialization is completed, an accident may occur. Make sure to perform the pinching prevention function initialization.**

If the AUTO-DOWN/UP feature will not work after initialization, there might be something wrong with the pinching prevention function. Have your vehicle inspected by a MARUTI SUZUKI authorized workshop.

Lighting control lever

**⚠ WARNING**  
 To avoid possible injury, do not operate controls by reaching through the steering wheel.

Lighting operation

To turn the lights on or off, twist the knob on the end of the lever. There are three positions:

**OFF (1)**  
 All lights are off.

**☞☞ (2)**  
 Front position lights, tail lights, license plate light and instrument lights are on, but headlights are off.

**☞☞☞ (3)**  
 Front position lights, tail lights, license plate light, instrument lights and headlights are on.

56RH00249

With the headlights on, push the lever forward to switch to the high beams (main beams) and pull the lever toward you to switch to the low beams. When the high beams (main beams) are on, a light on the instrument cluster will come on. To momentarily activate the high beams (main beams) as a passing signal, pull the lever slightly toward you and release it when you have completed the signal.

**NOTICE**  
 Do not leave the headlamp ON in any position when the engine is not running, or the battery will discharge rapidly.

## BEFORE DRIVING

### Light reminder buzzer

The interior buzzer continuously beeps if you open the driver's door without turning off the headlights and position lights. This function is triggered under the following condition:

The headlights and/or position lights are on even after the ignition switch is turned to "LOCK" position.

The buzzer stops sounding when you turn off the headlights and position lights.

### Headlight leveling switch

55UM03021

Level the headlight beam according to the load condition of your vehicle by turning this switch. The chart shows the appropriate switch position for different vehicle load conditions.

### Vehicle with halogen headlights (for petrol model)

Vehicle Load Condition	Switch Position
Driver only	0
Driver + 1 passenger (in front seat)	0.5
Driver + 4 passengers, no cargo	2.0
Driver + 4 passengers, cargo added	2.5
Driver + full cargo	4.0

### Vehicle with halogen headlights (for CNG model)

Vehicle Load Condition	Switch Position
Driver only	0
Driver + 1 passenger (in front seat)	0.5
Driver + 4 passengers, no cargo	2.0
Driver + 4 passengers, cargo added	NA
Driver + full cargo	NA

NA = Not applicable

\*: In case of CNG, luggage cannot be placed in trunk.

## Turn signal control lever

You can use the turn signal control lever when the ignition switch is in “ON” position.

### Turn signal operation

With the ignition switch in “ON” position, move the lever upward or downward to activate the right or left turn signals.

55UM03016

- Move the turn signal control lever (1) as follows:
  - Turning left: Move the lever upward.
  - Turning right: Move the lever downward
- When you move the lever, the turn signal lights and the turn signal light indicators on the instrument cluster will flash simultaneously.
- When you move the lever to its original position, the turn signal lights and the turn signal light indicators on the instrument cluster will be turned off.

- When changing lanes, if you lightly press the turn signal control lever in the directions (a) or (b) in which you want to change lanes, the turn signal lights and turn signal light indicators on the instrument cluster will flash only while the turn signal control lever is pressed.
- The turn signal control lever in the above figure is a typical example; the actual equipment depends on the vehicle type.

#### NOTE:

*If the angle which you turn the steering wheel is small, the lever will not automatically returned to its original position. In this case, return the lever to its original position by your hand.*

## Lane change signal

### EXAMPLE

56RH00256

Move the lever partially upward or downward to turn right or left and hold the lever in the moved position.

- The turn signal and its indicator flash while the lever is held at the moved position.
- The turn signal and its indicator flash 3 times even if you returned the lever immediately after the activation.

#### NOTE:

- *The turn signal and its indicator can be set whether they flash 3 times after the turn signal lever is returned via the information display. Refer to “Setting mode of information display” in “SPECIFICATIONS” section.*
- *You can customize the setting for the number of flashing times of the turn signal and its indicator (1 to 4 times). Please ask a MARUTI SUZUKI authorized workshop for the customization.*

## BEFORE DRIVING

---

### Hazard warning switch

55UM03020

You can use the hazard warning switch to warn the other drivers of possible risk of traffic hazard when you park your vehicle in case of emergency.

- Push the hazard warning switch to activate the hazard warning lights. All turn signal lights and the turn signal indicators on the instrument cluster will flash simultaneously.
- Push the switch again to turn off the hazard warning switch.
- The instrument panel in the above figure is a typical example; the actual equipment depends on the vehicle type.

#### **NOTICE**

**If you use the hazard warning switch for many hours with the engine stopped, the lead-acid battery may run out.**

**Do not use the hazard warning switch for many hours with the engine stopped.**

## Windshield wiper and washer lever

When the ignition switch in “ON” position, you can use the wiper/washer lever.

**▲ CAUTION**

In cold weather, the sprayed washer fluid on the glass may get frozen and it may cause poor visibility to a driver. Use the defroster to warm the glass and spray the washer fluid. Refer to “Manual air conditioning system (with digital control panel)” in “OTHER CONTROLS AND EQUIPMENT” section.

**NOTICE**

- If you use the wipers with the glass dried, the glass and the wiper blade rubbers may be damaged. When the glass is dry, use the washer fluid and then use wipers.
- If you operate the wipers with the wiper blades stuck on the glass, the wiper blade rubbers may be damaged or the wipers may be broken. When the wiper blades are stuck on the glass, do not operate the wipers.
- If you use the washer when the washer fluid cannot be sprayed enough, the washer pump may be broken. When the washer fluid cannot be sprayed enough, turn off the washer switch.

### When the operative wipers suddenly stop

When the wipers are under heavy load such as covered by snow and the temperature of the wiper motor becomes high, the breaker will be activated and the wipers will temporarily stop to protect the wiper motor from overheating.

If this happens, perform the following operations:

- 1) Stop the vehicle in a safe place, and turn the ignition switch to “ACC” or “LOCK” position.
- 2) Move the wiper lever and switch to “OFF” position.
- 3) Remove obstacles such as snow on the wipers.
- 4) After a while, when the temperature of the wiper motor becomes low enough, the breaker will be reset automatically and you can use the wipers.

If you cannot use the wipers after a while, there may be another problem. Ask a MARUTI SUZUKI authorized workshop to have the wipers inspected.

## BEFORE DRIVING

### Windshield wipers

You can operate the windshield wipers by moving the lever (1) upward or downward.

MIST	Temporary operation only while the lever is up
OFF	Off
INT	Intermittent operation
LO	Low speed operation
HI	High speed operation

### Windshield washer

If you pull the lever (1) toward you, the windshield washer fluid will be sprayed and the windshield wipers will automatically operate a few times.

#### **⚠ WARNING**

- To prevent windshield icing in cold weather, turn on the defroster to heat the windshield before and during windshield washer use.
- Do not use radiator antifreeze in the windshield washer reservoir. It can severely impair visibility when sprayed on the windshield, and can also damage your vehicle's paint.

#### **NOTICE**

To help prevent damage to the windshield wiper and washer system components, you should take the following precautions:

- Do not continue to hold in the lever when there is no windshield washer fluid being sprayed or the washer motor can be damaged.
- Do not attempt to remove dirt from a dry windshield with the wipers or you can damage the windshield and the wiper blades. Always wet the windshield with washer fluid before operating the wipers.
- Clear ice or packed snow from the wiper blades before using the wipers.
- Check the washer fluid level regularly. Check it often when the weather is bad.

## Horn

52RM20420

Press the horn button of the steering wheel to sound the horn. The horn will sound with the ignition switch in any position.

## Heated rear window switch

70TH03023

- If you push the rear defogger switch, the rear window glass will be heated and the indicator light (1) will turn on. To turn off the defogger, push the switch again.
- The defogger will automatically turn off after the defogger remains on for 15 minutes to prevent discharging of the lead-acid battery.
- If you turn the ignition switch to “ACC” or “LOCK” position with the defogger on, the defogger will not automatically operate even if you start the engine again.

### NOTICE

The heated rear window use a large amount of electricity. If you do not turn off the switch after the window and mirrors have become clear, the battery may run out. To protect the lead-acid battery, turn off the switch shortly after the window and mirrors have become clear.

Also, do not use the defogger to melt snow or dry rain water.

### NOTE:

- When you wipe the interior side of the rear window glass, use a soft cloth dampened with water and wipe the glass along the heat wires, not to damage the heat wires and the terminals.
- The defogger will work only when the engine is running.

## INSTRUMENT CLUSTER

Instrument cluster .....	4-1
Information display .....	4-4
Warning and indicator lights .....	4-9

59RN04640

# INSTRUMENT CLUSTER

## Instrument cluster

- (1) Speedometer
- (2) Tachometer
- (3) Information display
- (4) Trip meter selector knob
- (5) Indicator selector knob
- (6) Warning and indicator lights

55UM04017

**NOTE:**

For vehicle fitted with CNG fuel system, refer to the supplementary owner's manual.

### Speedometer

The speedometer indicates vehicle speed in km/h.

**NOTE:**

Maximum speed of the vehicle is 80 km/h as per government regulation.

### Tachometer

The tachometer indicates engine speed in revolutions per minute.

<b>NOTICE</b>
<p>Never drive the vehicle with the engine revving in the red zone or severe engine damage can result. Keep the engine speed below the red zone even when downshifting to a lower gear position. Refer to “Downshifting maximum allowable speeds” in “OPERATING YOUR VEHICLE” section.</p>

### Fuel gauge

52RM20470

When the ignition switch is in “ON” position, this gauge gives a rough indication of the amount of fuel in the fuel tank. “F” stands for full and “E” stands for empty.

If the fuel meter indicator shows only one segment to “E”, refill the tank as soon as possible.

<b>NOTICE</b>
<p>To minimize the possibility of damage to catalytic converter or other components of the vehicle, avoid driving the vehicle near empty fuel tank level.</p>

## INSTRUMENT CLUSTER

**NOTE:**

If the last segment blinks, it means that the fuel is almost empty.

If the low fuel warning light (1) comes on, refill the fuel tank immediately.

**NOTE:**

The activation point of the low fuel warning light (1) varies depending on road conditions (for example, slope or curve) and driving conditions because of fuel movement in the tank.

Refer to “Low fuel warning light” in this section for details.

The mark (2) indicates that the fuel filler door is located on the left side of the vehicle.

### Brightness control

When the ignition switch is turned to “ON” position, the instrument panel lights come on.

Your vehicle has a system to automatically dim the brightness of the instrument panel lights when the position lights or headlights are on.

When the position lights and/or headlights are on, you can adjust the meter illumination brightness.

To increase the brightness of the instrument panel lights, turn the indicator selector knob (1) clockwise.

To reduce the brightness of the instrument panel lights, turn the indicator selector knob (1) counterclockwise.

### **⚠ WARNING**

**Do not adjust the brightness of the instrument panel lights while driving. Otherwise, you could lose control of the vehicle.**

**NOTE:**

- If you do not turn the knob within several seconds of activating, the brightness control display will be canceled automatically.
- When you reconnect the lead-acid battery, the brightness of the instrument panel lights will be reinitialized. Readjust the brightness according to your preference.

**NOTE:**

- If you adjust to the maximum brightness level when the position lights or headlights are on, the following functions will be canceled.
- The function which automatically dims the brightness of instrument panel lights
  - The function which operates with the brightness control, except maximum brightness level

**Information display**

Information display is shown when the ignition switch is turned to "ON" position.

55UM04005

- (1) Trip meter selector knob
- (2) Indicator selector knob

55UM04016

- (3) Information display

The information display shows the following information.

**Display (A)**

Clock

**Display (B)**

Thermometer

**Display (C)**

Parking sensors / Door open indication / Engine hood open indication / Rear passenger's seat belt reminder

**Display (D)**

Gear shift indicator

**Display (E)**

Trip meter / Odometer / Fuel consumption / Driving range

**Display (F)**

Fuel gauge

## INSTRUMENT CLUSTER

### Clock (if equipped)

The display (A) shows the time.

To change the time indication:

- 1) Push the trip meter selector knob (1) and the indicator selector knob (2) together.
- 2) To change the hour indication, turn the indicator selector knob (2) left or right repeatedly when the hour indication blinks. To change the hour indication quickly, turn and hold the indicator selector knob (2). To set the hour indication, push the indicator selector knob (2) and the minute indication will blink.
- 3) To change the minute indication, turn the indicator selector knob (2) left or right repeatedly when the minute indication blinks. To change the minute indication quickly, turn and hold the indicator selector knob (2). To set the minute indication, push the indicator selector knob (2).

To select 12/24H format, refer to “Setting mode of information display” in “SPECIFICATIONS” section.

#### WARNING

**If you attempt to adjust the display while driving, you could lose control of the vehicle.**

**Do not attempt to adjust the display while driving.**

### Thermometer (if equipped)

The display (B) shows the thermometer. The thermometer indicates the outside temperature.

55T040200

If the outside temperature drops to freezing condition, the mark (a) will appear on the display.

#### NOTE:

- *The outside temperature indication is not the actual outside temperature when driving at low speed, or when stopped.*
- *If there is something wrong with the thermometer, or just after the ignition switch is turned to “ON” position, the display may not indicate the outside temperature.*

When the display (E) shows the driving range, you can change the unit of temperature.

To change the unit of temperature, while pushing and holding the trip meter selector knob (1), turn the indicator selector knob (2).

55T040210

### Parking sensor indication and door open indication

The display (C) shows the parking sensor indication and door open display indication.

Individual door, trunk and bonnet is indicated when the respective door, trunk or bonnet is not closed properly.

Refer to “Parking sensors” in “OPERATING YOUR VEHICLE” section.

### Gearshift indicator (if equipped)

The display (D) shows the gearshift indicator.

Refer to “Gearshift indicator (if equipped)” in “OPERATING YOUR VEHICLE” section.

**Trip meter / Odometer / Fuel consumption / Driving range**

The display (E) shows one of the following indications; trip meter A, trip meter B, odometer, instantaneous fuel consumption, average fuel consumption or driving range.

To switch the display indication (E), push the trip meter selector knob (1) or the indicator selector knob (2) quickly.

55T040230

↑ ↓	Push the trip meter selector knob (1).
↑ ↓	Push the indicator selector knob (2).

- (b) Trip meter A
- (c) Trip meter B
- (d) Odometer
- (e) Instantaneous fuel consumption
- (f) Average fuel consumption
- (g) Driving range

**⚠ WARNING**

**If you attempt to adjust the display while driving, you could lose control of the vehicle. Do not attempt to adjust the display while driving.**

**NOTE:**

- *Indications will change when you push and release a knob.*
- *The display shows estimated values. Indications may not be the same as actual values.*

## INSTRUMENT CLUSTER

### Trip meter

The trip meter can be used to measure the distance traveled on short trips or between fuel stops.

You can use the trip meter A or trip meter B independently.

To reset the trip meter, push and hold the trip meter selector knob (1) until the display shows 0.0.

#### NOTE:

*The indicated maximum value of the trip meter is 9999.9. When you run past the maximum value, the indicated value will return to 0.0.*

### Odometer

The odometer records the total distance the vehicle has been driven.

#### NOTICE

**Keep track of your odometer reading and check the maintenance schedule regularly for required services. Increased wear or damage to certain parts can result from failure to perform required services at the proper mileage intervals.**

### Instantaneous fuel consumption

The display shows the value of instantaneous fuel consumption only when the vehicle is moving.

#### NOTE:

- *The display does not show the value unless the vehicle is moving.*
- *Depending on the vehicle's specification, the fuel consumption units of initial setting are indicated as L/100km or km/L.*
- *For "L/100km" setting, the indicated maximum value of instantaneous fuel consumption is 30. No more than 30 will be indicated on the display even if the actual instantaneous fuel consumption is higher.*
- *For "km/L" setting, the indicated maximum value of instantaneous fuel consumption is 50. No more than 50 will be indicated on the display even if the actual instantaneous fuel consumption is higher.*
- *The indication on the display may be delayed if fuel consumption is greatly affected by driving conditions.*
- *The display shows estimated values. Indications may not be the same as actual values.*
- *For "L/100km" or "km/L" setting, you can change the units that instantaneous fuel consumption is displayed in. Refer to "Average fuel consumption" in this section.*

### Average fuel consumption

If you selected average fuel consumption the last time you drove the vehicle, the display shows the last value of average fuel consumption from previous driving when the ignition switch is turned to "ON" position. Unless you reset the value of average fuel consumption, the display indicates the value of average fuel consumption which includes average fuel consumption during previous driving.

To reset the average fuel consumption, push and hold the indicator selector knob (2) for a while when the display shows the average fuel consumption.

#### NOTE:

*When you reset the indication or reconnect the negative (-) terminal to the lead-acid battery, the value of average fuel consumption will be shown after driving for a while.*

#### (For "L/100km" or "km/L" setting)

To change the unit of average fuel consumption, while pushing and holding the trip meter selector knob (1), turn the indicator selector knob (2).

55T040240

**NOTE:**

*When you change the units that average fuel consumption is displayed in, the instantaneous fuel consumption units will be changed automatically.*

**Driving range**

If you selected driving range the last time you drove the vehicle, the display indicates “---” for a few seconds and then indicates the current driving range when the ignition switch is turned to “ON” position.

The driving range shown in the display is an indicative unit of the approximate distance you can drive until the fuel gauge indicates “E”, based on current driving conditions and current fuel level in the fuel tank.

When the low fuel warning light comes on, the display “---” will appear.

If the low fuel warning light comes on, fill the fuel tank immediately regardless of the value of driving range shown in the display.

When you refuel, the driving range is updated. However, if you only add a small amount of fuel, the correct value will not be displayed.

**NOTE:**

- *If you refuel when the ignition switch is in “ON” position, the driving range may not indicate the correct value.*
- *When you reconnect the negative (-) terminal to the lead-acid battery, the value of driving range will be shown after driving for a while.*
- *If there are substantial changes in the driving pattern or vehicle usage, the displayed range may vary significantly.*

**Fuel gauge**

The display (F) shows the fuel gauge. Refer to “Fuel gauge” in this section.

**Setting mode**

For details on how to use the information display, refer to “Setting mode of information display” in “SPECIFICATIONS” section.

## INSTRUMENT CLUSTER

### Warning and indicator lights

#### Brake system warning light

82K170

Three different types of operations exist depending on the vehicle's specification.

- 1) The light comes on briefly when the ignition switch is turned to "ON" position.
- 2) The light comes on when the parking brake is engaged with the ignition switch in "ON" position.
- 3) The light comes on when under either or both of above two conditions.

The light also comes on when the fluid in the brake fluid reservoir falls below the specified level.

The light should go out after starting the engine and fully releasing the parking brake, if the fluid level in the brake fluid reservoir is adequate.

The light also comes on together with the ABS warning light when the rear brake force control function (proportioning valve function) of the ABS system fails.

If the brake system warning light comes on while you are driving the vehicle, it may mean that there is something wrong with the vehicle's brake system. If this happens, you should:

- 1) Pull off the road and stop carefully.

#### WARNING

**Remember that stopping distance may be longer, you may have to push harder on the pedal, and the pedal may go down farther than normal.**

- 2) Test the brakes by carefully starting and stopping on the shoulder of the road.
- 3) If you determine that it is safe, drive the vehicle cautiously at low speed to the nearest MARUTI SUZUKI authorized workshop for repairs or tow the vehicle to the nearest MARUTI SUZUKI authorized workshop for repairs.

#### WARNING

**If any of the following conditions occur, you should immediately ask a MARUTI SUZUKI authorized workshop to inspect the brake system.**

- If the brake system warning light does not go out after the engine has been started and the parking brake has been fully released.
- If the brake system warning light does not come on when the ignition switch is turned to "ON" position.
- If the brake system warning light comes on at any time during vehicle operation.

#### NOTE:

*Because the brake system is self-adjusting, the fluid level will drop as the brake pads become worn. Replenishing the brake fluid reservoir is considered normal periodic maintenance.*

#### NOTE:

*(Parking Brake Reminder Buzzer)*

*A buzzer sounds intermittently to remind you to release the parking brake if you start the vehicle without releasing the parking brake. Make sure that the parking brake is fully released and the brake system warning light turns off.*

**Driver's seat belt reminder light / front passenger's seat belt reminder light**

80J221

When the driver and/or front passenger do(does) not buckle his or her seat belt, this light will come on and/or blink. For details about the seat belt reminder, refer to "Seat Belt Reminder" in "FOR SAFE DRIVING" section.

**Rear passenger's seat belt reminder light**

55T040040

Reminder light for rear passengers to fasten their seat belts. For details of the seat belt reminder, refer to "Seat belt reminder" in "FOR SAFE DRIVING" section.

**Airbag warning light**

63J030

This light blinks or comes on for several seconds when the ignition switch is turned to "ON" position so you can check if the light is working.

The light will come on and stay on if there is a problem in the airbag system or the seat belt pretensioner system.

**⚠ WARNING**

**If the airbag warning light does not blink or come on briefly when the ignition switch is turned to "ON" position, stays on for more than 6 seconds, or comes on while driving, the airbag system or the seat belt pretensioner system may not work properly, which could result in serious injury in the event of a crash. Have both systems inspected by a MARUTI SUZUKI authorized workshop.**

**Low fuel warning light**

54G343

If this light comes on, refuel the fuel tank as soon as possible.

When this light comes on, a ding sounds once to remind you to fill the fuel.

If you do not fill the fuel, a ding sounds every time when the ignition switch is turned to "ON" position.

**NOTE:**

- *The activation point of this light varies depending on road conditions (for example, slope or curve) and driving conditions because of fuel moving in the tank.*

## INSTRUMENT CLUSTER

### Anti-lock Brake System (ABS) warning light

When the ignition switch is turned to “ON” position, the light comes on briefly so you can check that the light is working. If the light stays on, or comes on when driving, there may be something wrong with the ABS.

If this happens:

- 1) Pull off the road and stop carefully.
- 2) Turn the ignition switch to “LOCK” position and then start the engine again.

If the warning light comes on briefly then turns off, the system is normal. If the warning light still stays on, the system will be something wrong.

If the light and the brake system warning light stay on, or come on simultaneously when driving, your ABS system is equipped with the rear brake force control function (proportioning valve function) and there may be something wrong with both the rear brake force control function and anti-lock function of the ABS system.

If one of these happens, have the system inspected by a MARUTI SUZUKI authorized workshop.

If the ABS becomes inoperative, the brake system will function as an ordinary brake system that does not have this ABS system.

For details of ABS system, refer to “Anti-lock Brake System (ABS)” in “OPERATING YOUR VEHICLE” section.

### High engine coolant temperature warning light (red color)

When the ignition switch is turned to “ON” position, this light comes on briefly so you can check that the light is working. If this light blinks and the buzzer sounds once while driving, it means the engine is running hot. If the light stays on after blinking and the buzzer sounds continuously, then the engine is overheating. To avoid actual overheating, if this light blinks or stays on while driving, refer to “Engine trouble: Overheating” in “EMERGENCY SERVICE” section.

#### **NOTICE**

**Continuing to drive the vehicle when engine overheating is indicated can result in severe engine damage.**

**Malfunction indicator light**

80J222

Your vehicle has a computer-controlled emission control system. A malfunction indicator light is provided on the instrument panel to indicate when it is necessary to have the emission control system serviced. The malfunction indicator light comes on when the ignition switch is turned to "ON" position to let you know the light is working and goes out when the engine is started.

If the malfunction indicator light comes on or blinks when the engine is running, there is a damage in the emission control system.

Bring the vehicle to a MARUTI SUZUKI authorized workshop to have the damage fixed.

**⚠ WARNING**

**If this light blinks, stop your vehicle immediately in a safe place to avoid catalyst's melting problem since there may be a misfire in the engine.**

- Do not drive or stop over such as withered grasses.

**Drive slowly if required to move the vehicle.**

**NOTICE**

**Continuing to drive the vehicle when the malfunction indicator light is on or blinking can cause permanent damage to the vehicle's emission control system, and can affect fuel economy and driveability.**

**Electric power steering warning light**

80J408

This light comes on when the ignition switch is turned to "ON" position, and goes out when the engine is started.

If this light comes on while driving, the power steering system may not work properly. Have the system inspected by a MARUTI SUZUKI authorized workshop.

**NOTE:**

- *Following operations of the steering wheel while parking or driving at a very low speed may have steering effort bigger gradually. This is not a malfunction of the steering system, but the power steering control system limits the power assist in order to prevent them from overheating.*
  - *The steering wheel is operated very often.*
  - *The steering wheel is kept in a fully turned position for a long while.*

## INSTRUMENT CLUSTER

*When the power steering control system cool down, the power steering system back to the original condition.*

*However, repeating these operations could cause the power steering system damaged.*

- *If the power steering system does not work properly, you will feel heavier to steer but you still will be able to steer.*
- *If the steering is operated, you may hear a noise. This is normal and indicates that the power steering system works properly.*

### Engine oil pressure warning light

80J223

This light comes on when the ignition switch is turned to "ON" position, and goes out when the engine is started. The light will come on and remain on if there is insufficient oil pressure. If the light comes on when driving, pull off the road as soon as you can and stop the engine.

Check the oil level and add oil if necessary. If there is enough oil, the lubrication system should be inspected by a MARUTI SUZUKI authorized workshop before you drive the vehicle again.

#### **NOTICE**

- **If you operate the engine with this light on, severe engine damage can result.**
- **Do not rely on the engine oil pressure warning light to indicate the need to add oil. Be sure to periodically check the engine oil level.**

### Charge warning light

80J226

This light comes on when the ignition switch is turned to "ON" position, and goes out when the engine is started. The light will come on and remain on if there is something wrong with the battery charging system. If the light comes on when the engine is running, the charging system should be inspected immediately by a MARUTI SUZUKI authorized workshop.

**Immobilizer system warning light**

80JM122

When the ignition switch is turned to "ON" position, the light comes on briefly so you can check that the light is working.

If this light blinks or stays on, there is a problem with the system.

If this light still blinks or stays on even if you start the engine with normal voltage of the vehicle battery, ask a MARUTI SUZUKI authorized workshop to have the system inspected.

**Open door warning light**

54G391

This light remains on until all doors are completely closed.

If any door is open when the vehicle is moving, a ding sounds to remind you to close all doors completely.

**Master warning indicator light (if equipped)**

68PM00278

When the ignition switch is turned to "ON" position, this light comes on briefly so you can check that the light is working.

**Turn signal indicators**

59RN04690

When you turn on the left or right turn signals, the corresponding green arrow on the instrument panel will blink along with the respective turn signal lights. When you turn on the hazard warning switch, both arrows will blink along with all of the turn signal lights.

**NOTE:**

*If any abnormality of the turn signals is observed, such as fast blinking, there may be a malfunction in the turn signal system. Ask a MARUTI SUZUKI authorized workshop to have the system inspected.*

## INSTRUMENT CLUSTER

### Main beam (high beam) indicator light

80J212

This indicator comes on when headlight main beams (high beams) are turned on.

### Illumination indicator light

64J045

This indicator light comes on while the position lights, tail light and/or the head-lights are on.

### Security system indicator (if equipped)

82K269

For details about the security system, refer to “Security system (if equipped)” in “BEFORE DRIVING” section.

### ESP® OFF indicator light

57L30045

When the ignition switch is turned to “ON” position, this light comes on briefly so you can check that the light is working.

When the ESP® OFF switch is pushed to turn off the ESP® systems (other than ABS), the ESP® OFF indicator light comes on and stays on.

For details of the ESP® systems, refer to “Electronic Stability Program (ESP®)” in “OPERATING YOUR VEHICLE” section.

### ESP® indicator light

52KM133

ESP® is a registered trademark of Mercedes-Benz Group AG.

This light blinks 5 times per second when one of the following systems is activated.

- Stability control system
- Traction control system

If this light blinks, drive carefully.

When the ignition switch is turned to “ON” position, the light comes on briefly so you can check that the light is working. If the light stays on or comes on when driving, there may be something wrong with the ESP® systems (other than ABS). You should have the system inspected by a MARUTI SUZUKI authorized workshop.

For details of the ESP® systems, refer to “Electronic Stability Program (ESP®)” in “OPERATING YOUR VEHICLE” section.

### WARNING

**The ESP® systems cannot prevent accidents. Always drive carefully.**

**Low engine coolant temperature light (blue color)**

54G344

When the ignition switch is turned to “ON” position, this light comes on and stays on if the engine is cold, and goes off after the engine warms up.

If this light still stays on after the engine warms up, there is a problem with the sensor.

Have your vehicle inspected by a MARUTI SUZUKI authorized workshop.

**ENG A-STOP indicator light**

72M00032

When the ignition switch is turned to “ON” position, this light comes on briefly to let you know the light is working.

When the engine stops automatically, this light comes on.

For details, refer to “ENG A-STOP system (engine auto stop start system)” in “OPERATING YOUR VEHICLE” section.

**ENG A-STOP OFF indicator light**

62R0352

When the ignition switch is turned to “ON” position, this light comes on briefly if the system works properly.

When you push the ENG A-STOP OFF switch, this light comes on.

If this light blinks when driving, there may be something wrong with the ENG A-STOP system. You should have the system inspected by a MARUTI SUZUKI authorized workshop.

For details, refer to “ENG A-STOP system (engine auto stop start system)” in “OPERATING YOUR VEHICLE” section.

## INSTRUMENT CLUSTER

### Parking sensor indicator light

When the ignition switch is turned to “ON” position, this light comes on briefly so you can check that the light is working.

When the rear parking sensors is activated and then detected obstacles, this light blinks.

If this light comes on, there is a problem with the rear parking sensors. Bring the vehicle to a MARUTI SUZUKI authorized workshop to have the problem corrected.

For details, refer to “Parking sensors” in “OPERATING YOUR VEHICLE” section.

### “PUSH” indicator light (if equipped)

If this light comes on when depressing the clutch pedal for manual transmission vehicles, you can start the engine.

### “ACC” indicator light (if equipped)

This light comes on when the ignition mode is “ACC”.

### Ignition “ON” indicator light (if equipped)

This light comes on when the ignition mode is “ON” with the engine off.

### Suzuki Connect indicator light (if equipped)

If this light comes on when the ignition switch is turned to “ON” position, there is a problem with the Suzuki Connect system. Have the system inspected by a MARUTI SUZUKI authorized workshop.

For details on the Suzuki Connect system, refer to “Suzuki Connect (if equipped)” in “OTHER CONTROLS AND EQUIPMENT” section.

## OPERATING YOUR VEHICLE

### Daily inspection checklist

#### Before driving

59RN05750

- 1) Check that the windows, mirrors, lights and reflectors are clean and unobstructed.
- 2) Visually check the tyres for the following points:
  - the depth of the tread groove
  - abnormal wear, cracks and damage
  - loose wheel nuts
  - existence of foreign material such as nails, stones, etc.

Refer to “Tyres” in “INSPECTION AND MAINTENANCE” section for details.

- 3) Look for fluid and oil leakage.

#### NOTE:

*It is normal for water to drip from the air conditioning system while and after use.*

- 4) Check that the hood is fully closed and latched.
- 5) Check the headlights, turn signal lights, brake lights and horn for proper operation.
- 6) Adjust the seat and head restraint.
- 7) Check the brake pedal feeling and the adjustment condition for the parking brake lever or pedal.  
Refer to “Brakes” in “INSPECTION AND MAINTENANCE” section for details.
- 8) Adjust the mirrors.
- 9) Check that you and all the passengers have properly fastened the seat belts.
- 10) Check that all the warning lights come on as the ignition switch is turned to “ON” position.
- 11) Check all the gauges.
- 12) Check that the brake system warning light turns off when the parking brake is released.

Once a week, or each time you fill your fuel tank, or before a long distance driving (like highway driving) perform the following under-hood checks:

- 1) Engine oil level
- 2) Coolant level
- 3) Brake fluid level
- 4) Battery fluid (acid) level
- 5) Windshield washer fluid level
- 6) Hood latch operation  
Pull the hood release lever inside the vehicle. Check that you cannot open the hood further without releasing the secondary latch. Close the hood securely after checking for proper latch operation. See the item “All latches, hinges and locks” of “Chassis, body and others” in “Maintenance Schedule” in “INSPECTION AND MAINTENANCE” section for lubrication schedule.

#### WARNING

**Check that the hood is fully closed and latched before driving. If it is not, it can fly up unexpectedly during driving, obstructing your view and resulting in an accident.**

Once a month, or each time you fill your fuel tank, check the tyre pressure using a tyre pressure gauge. Also check the tyre pressure of the spare tyre.

**When you notice the following symptoms**

80J009

**⚠ CAUTION**

If you keep using your vehicle in the following conditions, malfunction and an accident may occur. Consult a MARUTI SUZUKI authorized workshop.

- Leaked oil or other liquid appears on the ground below the vehicle.
- Brake fluid level is low.
- There are unusual odors, sounds or vibrations.
- The feeling of operating the steering wheel or the brakes is different than usual.

**Check the tyre pressure**

55UM05044

- Periodically check and adjust the tyre pressure. The specified tyre pressure for the tyres of this vehicle can be confirmed by checking the tyre information label (1) affixed to the opening of the driver's door.
- Driving with insufficient tyre pressure can cause the sides of the tyre to wear, in addition to decreasing fuel efficiency.

**⚠ WARNING**

- Driving with extremely low tyre pressure can cause a tyre blowout (bursting) and may result in an accident. Do not drive with extremely low tyre pressure.

69RHS173

- If the specified tyre pressure is not maintained, the full performance of the vehicle cannot be achieved and the following could occur, leading to accidents or malfunctions. Adjust the tyre pressure as specified.
  - Decreased driving stability
  - Longer distance required for braking

(Continued)

### WARNING

(Continued)

- **Accurate tyre rotation speed cannot be detected, which interferes with the following functions:**
  - **Anti-lock Brake System (ABS)**
  - **Electronic stability program (ESP®)**

To adjust the tyre pressure, refer to "Tyres" in "INSPECTION AND MAINTENANCE" section.

### Check the exhaust pipe

80J011

Periodically check the exhaust pipes for holes or cracks.

### WARNING

**If leaks in exhaust pipes are present, exhaust gas could enter the vehicle and possibly cause carbon monoxide poisoning. If you feel that something is abnormal, consult a MARUTI SUZUKI authorized workshop.**

## Engine oil consumption

It is normal for the engine to consume some engine oil during normal vehicle operation.

The amount of engine oil consumption depends on viscosity and quality of the oil and your driving conditions.

More oil is consumed during high-speed driving and when there is frequent acceleration and deceleration. Under high loads, your engine also will consume more oil.

A new engine also consumes more oil, since its pistons, piston rings and cylinder walls have not yet become conditioned. New engines reach the normal level of oil consumption only after approximately 5000 km driving.

**Oil consumption:  
Max. 1.0 L per 1000 km**

When judging the amount of oil consumption, note that the oil may become diluted and it is difficult to judge the accurate oil level.

As an example, if a vehicle is used for repeated short trips, and consumes a normal amount of oil, the dipstick may not show any drop in the oil level at all, even after 1000 km or more of driving. This is because the oil gradually becomes diluted with fuel or moisture, making it appear that the oil level has not changed.

You should also be aware that the diluting ingredients evaporate out when the vehicle is subsequently driven at high speeds, such as on an expressway, making it appear that oil is excessively consumed after high-speed driving.

**Ignition switch**

65D611

**⚠ WARNING**  
**To avoid possible injury, do not operate controls by reaching through the steering wheel.**

68PH00310

The ignition switch has the following four positions:

**LOCK**

This is the normal parking position. It is the only position in which the key can be removed.

55T050010

You must push in the key to turn it to "LOCK" position. It locks the ignition, and prevents normal use of the steering wheel after the key is removed.

To release the steering lock, insert the key and turn it clockwise to one of the other positions. If you have trouble turning the key to unlock the steering wheel, try turning the steering wheel slightly to the right or left while turning the key.

## OPERATING YOUR VEHICLE

### ACC

Accessories such as the radio can operate, but the engine is off.

### ON

This is the normal operating position. All electrical systems are on.

### START

This is the position for starting the engine using the starter motor. The key should be released from this position as soon as the engine starts.

### Ignition key reminder

A buzzer sounds intermittently to remind you to remove the ignition key if it is in the ignition switch when the driver's door is opened.

56RM03021

### ⚠ WARNING

- **Never return the ignition switch to "LOCK" position and remove the ignition key while the vehicle is moving. The steering wheel will lock and you will not be able to steer the vehicle.**

(Continued)

### ⚠ WARNING

(Continued)

- **Always return the ignition switch to "LOCK" position and remove the ignition key when leaving the vehicle even only for a short time. Also do not leave children alone in a parked vehicle. Unattended children could cause accidental movement of the vehicle or could tamper with power windows. They also could suffer from heat stroke in warm or hot weather. These could result in severe injury or even death.**

### NOTICE

**Do not leave the ignition switch in "ON" position if the engine is not running as the lead-acid battery will discharge.**

**Immobilizer system**

This system is designed to help prevent vehicle theft by electronically disabling the engine starting system.

The engine can be started only with your vehicle's original immobilizer ignition key, which has an electronic identification code programmed in it. The key or remote controller communicates the identification code to the vehicle when the ignition switch is turned to "ON" position. If you need to make spare keys or remote controllers, see a MARUTI SUZUKI authorized workshop. The vehicle must be programmed with the correct identification code for the spare. A key made by an ordinary locksmith will not work.

In the case you can start the engine, when you turn the ignition switch to "ON" position, the immobilizer system will be released and the immobilizer/keyless push start system warning light will turn on for about 2 seconds and then it will turn off.

When you turn the ignition switch to "LOCK" position, the immobilizer system will operate.

**NOTICE**

**If the immobilizer system is modified or removed, it cannot be properly operated. Do not modify or remove the immobilizer system.**

**NOTE:**

*This immobilizer system is maintenance-free.*

**Immobilizer system warning light**

80JM122

If the immobilizer system warning light blinks when the ignition switch is in "ON" position, the engine will not start.

If this light blinks, turn the ignition switch to "LOCK" position, and then turn it back to "ON" position.

If the light still blinks after the ignition switch is turned back to "ON" position, there may be something wrong with your key or with the immobilizer system. Ask a MARUTI SUZUKI authorized workshop to have the system inspected.

**NOTE:**

- If you lose your immobilizer ignition key, ask a MARUTI SUZUKI authorized workshop as soon as possible to deactivate the lost one, and to make a new key or remote controller.
- If you own other vehicles with immobilizer keys, keep those keys away from the ignition switch when using your MARUTI SUZUKI vehicle. Otherwise, the engine may not be started because they may interfere with your MARUTI SUZUKI vehicle's immobilizer system.
- If you attach any metal objects to the immobilizer key or remote controller, it may not start the engine.

**NOTICE**

**The immobilizer key is sensitive electronic instrument. To avoid damaging this:**

- **Do not expose this to impacts, moisture or high temperature such as on the dashboard under direct sunlight.**
- **Keep them away from magnetic objects.**

**Ignition key reminder (if equipped)**

A buzzer sounds intermittently to remind you to remove the ignition key if it is in the ignition keyhole when the driver's door is opened.

## OPERATING YOUR VEHICLE

### Pedal

80J2121

### Clutch pedal (1)

A clutch pedal is used to disengage the driving force to the wheels when starting the engine, stopping, or shifting the gear-shift lever. Depressing the pedal disengages the clutch.

#### **⚠ WARNING**

Do not drive with your foot resting on the clutch pedal. It could result in excessive clutch wear, clutch damage, or unexpected loss of engine braking.

### Brake pedal (2)

Your vehicle is equipped with front disc brakes and rear drum brakes. Depressing a brake pedal applies both sets of brakes.

You may hear occasional brake squeal when you apply the brakes. This is a normal condition caused by environmental factors such as temperature, humidity, snow or dust, etc.

#### **⚠ WARNING**

If brake squeal is excessive and occurs each time the brakes are applied, you should have the brakes checked by a MARUTI SUZUKI authorized workshop.

#### **⚠ WARNING**

Do not apply brakes continuously or rest your foot on the brake pedal. This will result in overheating of the brakes which could cause unpredictable braking action, longer stopping distances, or permanent brake damage.

### Accelerator pedal (3)

An accelerator pedal controls the speed of the engine. Depressing the accelerator pedal increases power output and speed.

#### **NOTE:**

Your vehicle is equipped with Brake Override System. If you depress both the accelerator pedal and the brake pedal simultaneously, the engine power output may be suppressed.

Starting / stopping engine

Starting engine

56RH05001

- 1) Check that the parking brake is set fully.
- 2) Turn off such loads as the headlights and air conditioning system to facilitate starting of the engine.
- 3) Shift into "N" (Neutral). Hold the clutch pedal and brake pedal fully depressed.
- 4) With your foot taken off the accelerator pedal, crank the engine by turning the ignition key to "START". Release the key immediately after the engine has started.

**NOTICE**

- Release the key immediately after the engine has started or the starter can be damaged.
- For protection of a lead-acid battery and a starter motor, do not use the starter motor by turning the key to "START" for more than 12 seconds at a time. If the engine does not start, turn the key to "LOCK" position and wait for more than 30 seconds before trying again. If the engine does not start after several attempts, consult a MARUTI SUZUKI authorized workshop.
- Do not try to start the engine by pushing or towing the vehicle, or coasting down a hill. This starting method could result in damage to the catalytic converter or damage to other parts.

Stopping engine

**⚠ WARNING**

Except in cases of emergency, do not stop the engine while the vehicle is in motion. If you stop the engine while the vehicle is in motion, the steering wheel will lock and you will not be able to steer the vehicle. This may result in an accident. Avoid stopping the engine while driving.

## OPERATING YOUR VEHICLE

### Parking brake lever

70TH05006

- (1) To set
- (2) To release
- (3) To release

The parking brake lever is located between the front seats. To set the parking brake, depress the brake pedal and pull the parking brake lever all the way up. To release the parking brake, depress the brake pedal and pull up slightly on the parking brake lever, push the button on the end of the lever with your thumb, and lower the lever to its original position.

#### ⚠ WARNING

- Never drive your vehicle with the parking brake on: rear brake effectiveness can be reduced from overheating, brake life may be shortened, or permanent brake damage may result.
- If the parking brake does not hold the vehicle securely or does not fully release, have your vehicle inspected immediately by a MARUTI SUZUKI authorized workshop.
- Always set the parking brake fully before leaving your vehicle or it may move, causing injury or damage. When parking, check that the gearshift lever is in 1st gear or “R” (Reverse).

**Remember, even though the transmission is in gear or in “N” (Neutral), you must set the parking brake fully.**

(Continued)

#### ⚠ WARNING

(Continued)

- When parking the vehicle in extremely cold weather, the following procedure should be used:
  - 1) Set the parking brake.
  - 2) Turn off the engine, then shift into reverse or first gear.
  - 3) Get out of the vehicle and put chocks under the wheels.
  - 4) Release the parking brake. When you return to your vehicle, first set the parking brake, and then remove the wheel chocks.
- Do not leave cigarette lighters, spray cans, soft drink cans or plastic articles (such as glasses, CD cases, etc.) in sun-heated vehicle. The temperature inside the vehicle may cause as follows:
  - Gas may leak from a cigarette lighter or spray can and may lead to a fire.
  - The glasses, plastic cards or CD cases, etc. may deform or crack.
  - Soft drink cans may fracture.

**Parking brake reminder buzzer**

A buzzer sounds intermittently to remind you to release the parking brake if you start the vehicle without fully releasing the parking brake. Check that the parking brake is fully released and the brake system warning light turns off.

**Precaution for parking**

**When moving the vehicle**

When moving the vehicle, start the engine.

**⚠ WARNING**

If you coast with the engine off, stronger force than normal is required when turning the steering wheel or depressing the brake pedal, resulting in an accident.  
Do not coast on a downhill slope with the engine off.

**⚠ WARNING**

- Exhaust gases can enter the vehicle due to surrounding conditions and wind direction, possibly causing carbon monoxide poisoning.
- The gearshift lever could change unintentionally, or the accelerator pedal could be depressed accidentally, causing an accident.
- If you were to accidentally step on the accelerator pedal while you are asleep, the engine and the exhaust system could overheat, resulting in danger of fire.

**When taking a nap in the vehicle**

69RHS172

Do not take a nap in the vehicle with the engine running.

## OPERATING YOUR VEHICLE

**With the engine running, the cooling fan (radiator fan) may rotate suddenly**

The cooling fan (radiator fan) in the engine compartment may automatically stop and rotate depending on the conditions of the engine coolant temperature.

### **⚠ WARNING**

If you get close to a rotating cooling fan (radiator fan), your hands, hair and clothing may get caught in it, resulting in personal injury. With the engine running, even when the cooling fan (radiator fan) stops, it may automatically rotate. Therefore, do not get close to the cooling fan (radiator fan).

**When you park the vehicle outside on a snowy day**

### **⚠ WARNING**

- When you park the vehicle under the eaves or the trees, fallen snow may hit the vehicle's roof and it may be dented.  
Do not park the vehicle under the eaves or the trees on a snowy day.
- If you park the vehicle outside on a snowy day, the wiper arms may be deformed and the wiper blades may be frozen on the windshield, because of the weight of snow. When you park the vehicle outside, raise the wiper arms.

**Do not park the vehicle near flammable materials**

69RHS174

### **⚠ WARNING**

If you park the vehicle near flammable materials, the exhaust pipes and exhaust gas will get hot, resulting in danger of fire. Do not park the vehicle near flammable materials such as dry grass, paper waste and plywood.

**When leaving the vehicle, stop the engine and lock doors**

69RHS054

Even when leaving the vehicle for a short time, do not leave cash or valuables inside, as there is a risk of theft.

**⚠ WARNING**

**If you leave the vehicle unattended with the engine running, problems such as fire or theft can occur. Do not leave the vehicle unattended with the engine running.**

**Do not leave the computer and the mobile phone in the vehicle**

There is the possibility of theft, or these items could become damaged due to moisture, humidity or temperature change.

**Do not leave lighters and eyeglasses in the vehicle**

69RHS175

**⚠ WARNING**

- As the inside of the vehicle becomes hotter when parking in areas where strong sunlight causes increased temperature, there is the danger of spontaneous ignition of lighters or spray cans, fire due to explosion, the deformation or cracking of eyeglasses, plastic cards or CD cases, or the rupture of carbonated beverage cans. When parking in those areas, do not leave lighters, spray cans, plastic products (eyeglasses, plastic cards, CD cases, etc.) or carbonated beverage cans in the vehicle.
- When items get pushed around or when the seats are moved, it is possible that gas could escape and lead to a fire. Do not place accessories such as lighters or spray cans with exposed operating parts in the glove box, in storage compartments, between the seats, on the floor, etc.

## OPERATING YOUR VEHICLE

### Using transmission

#### **⚠ WARNING**

Do not hang any items on the gearshift lever and do not use the gearshift lever as a handrest. Otherwise, it could prevent proper operation of the gearshift lever and cause its malfunction, resulting in an accident.

#### Starting off

To start off, depress the clutch pedal all the way to the floor and shift into 1st gear. After releasing the parking brake, gradually release the clutch. When you hear a change in the engine's sound, slowly press the accelerator while continuing to gradually release the clutch.

#### Shifting

All forward gears are synchronized and provide quiet and easy shifting. Always depress the clutch pedal all the way to the floor before shifting gears. Keep the engine speed from rising into the red zone of the tachometer.

#### **NOTICE**

If frequently driving at low speed using a high gear position, the life cycle of the clutch may be reduced.

#### Downshifting maximum allowable speeds

Downshifting	km/h
2nd to 1st	20
3rd to 2nd	80
4th to 3rd	125
5th to 4th	175*

#### *\*NOTE:*

*You may not accelerate to the maximum allowable speed because of the driving situation and/or the vehicle condition.*

#### **⚠ WARNING**

- Reduce your speed and downshift to a lower gear before going down a long or steep hill. A lower gear will allow the engine to provide braking. Avoid riding the brakes or they may overheat, resulting in brake failure.
- When driving on slippery roads, slow down before downshifting. Excessive and/or sudden changes in engine speed may cause loss of traction, which could cause you to lose control.

**NOTICE**

- Do not downshift to a lower gear at the speed faster than the maximum allowable speeds for the next lower speed, or severe damage to engine and transmission can result.
- Check that the vehicle is completely stationary before you shift into reverse.
- To help avoid clutch damage, do not use the clutch pedal as a footrest while driving or use the clutch to keep the vehicle stationary on a slope. Depress the clutch fully when shifting.
- When shifting or starting off, do not race the engine. Racing the engine can shorten engine life and cause negative effect to smooth shifting.

**NOTE:**

If it is difficult to engage reverse gear [R], follow below procedure.

- Put gear lever in neutral [N] position.
- Release clutch pedal once.
- Again depress the clutch pedal and shift from [N] to [R].

**Gearshift indicator**

55UM05032

In the following case, the gearshift indicator is indicated in the information display when the ignition switch is in the “ON” position.

- When the gearshift lever is in a position other than “N” (Neutral).

The electronic control system monitors driving condition (such as vehicle speed and/or engine revolution), and it recommends gearshift for your driving with indications on display.

If UP/DOWN arrow is indicated on the display while driving, we recommend you to shift up or down. It is the optimal gear position for a driving condition that reduces the over revolution and stress to the engine, and improves fuel consumption.

For details on how to use the transmission, refer to “Using transmission” in this section.

**⚠ WARNING**

The gearshift indicator is designed to indicate optimal gear position for your driving, however, a driver will not be relieved from the duty of care of driving operation or gear change with this indicator.

To drive safe, do not gaze the gearshift indicator, pay attention to your driving situation and shift up or down if necessary.

## OPERATING YOUR VEHICLE

---

### NOTE:

- The gearshift indicator is not indicated when the gear position is in “N” (Neutral).
- If you depress the clutch pedal while UP/DOWN arrow is indicated, the indication will disappear.
- In ordinary driving, UP arrow will disappear when you release your foot from the accelerator pedal.
- The indication of gearshift indicator timing may differ depending on the vehicle condition and/or driving situation even in the same vehicle speed and engine revolution.
- If ESP<sup>®</sup> system is working, the gear shift indicator will disappear temporarily.

### Example of the gearshift indicator

Indication	Description
  55UM05033	Lower gear position is selected for the vehicle speed and/or engine revolution. Changing to a higher gear position is recommended. <ul style="list-style-type: none"><li>• In this case, shifting up is recommended.</li></ul>
  55UM05034	Higher gear position is selected for the vehicle speed and/or engine revolution. Changing to a lower gear position is recommended. <ul style="list-style-type: none"><li>• In this case, shifting down is recommended.</li></ul>

**ENG A-STOP system (engine auto stop start system) (If equipped)**

The ENG A-STOP system (engine auto stop start system) automatically stops the engine while waiting briefly at a traffic light, etc., and automatically restarts the engine afterward. This system helps reduce emissions, improve fuel consumption and lower engine noise.

This system stops the engine temporarily under specific conditions. Before parking the vehicle for an extended period of time or leaving the vehicle, properly apply the parking brake and stop the engine with the ignition switch.

Once the specific conditions are met, the engine will stop automatically after the vehicle has stopped. However, the engine will not be stopped automatically until confirmation of the system function is finished.

**▲ CAUTION**

- Do not get out of the vehicle while the engine is automatically stopped by the ENG A-STOP system. Doing so may lead to an accident.
  - If the driver's seat belt is unfastened and the driver's door is opened, the engine will stall.
- If the engine does not restart automatically after having been stopped automatically by the ENG A-STOP system, turn the ignition switch to start the engine. Trying to move the vehicle when the engine has not yet restarted requires a strong force to turn the steering wheel or depress the brake pedal, potentially leading to an accident.

**NOTICE**

- The vehicle equipped with this system uses a dedicated high-performance battery that supports ENG A-STOP system. Accordingly, observe the instructions listed below. If these instructions are not observed, the system may not actuate properly or the battery may die prematurely.
- When replacing the battery, use a MARUTI SUZUKI genuine battery specified in the Specification.
  - Do not draw power from the battery terminals for electrical products.

## OPERATING YOUR VEHICLE

### Automatic stopping / restarting of the engine

- 1) With the brake pedal depressed, decelerate the vehicle.

70TH05007

- 2) After the vehicle has stopped with the clutch pedal depressed and the gearshift lever shifted to "N", and then release the clutch pedal, the engine will stop automatically.

The ENG A-STOP indicator light (green) (1) will come on.

- The ENG A-STOP system will not stop the engine automatically if all the automatic engine stop conditions are not met. For details, refer to "Automatic engine stop conditions" in this section.

- During the automatic engine stop, the engine may shut down, accompanied by an interior buzzer or restarted, to ensure safety.

For details, refer to "Points to note during the automatic engine stop" in this section.

#### NOTICE

During the automatic engine stop condition,

- Do not shift the gearshift lever to a position other than "N" without depressing the clutch pedal. If the gear shift lever is in a position other than "N", the engine will not restart automatically even if the clutch pedal is depressed.
- If the driver unfastens the seat belt, the engine does not restart automatically even if the clutch pedal is depressed. Also a buzzer will sound to alert the driver. In this case, fasten the seat belt.

#### NOTE:

During the automatic engine stop, electric equipment will be in the following conditions:

- The audio and other electrical component can be used during the automatic engine stop, but the air conditioner will switch to the fan mode.
- If the vehicle is equipped with automatic heating and air conditioning system, the fan speed will be limited during the auto-

matic engine stop (only in the auto control mode) to keep the cabin air-conditioned for a longer time.

#### NOTE:

If the engine stalled by a rapid clutch operation, the engine may restart when the gearshift lever is in "N" (Neutral) position, the clutch pedal is depressed, and other standby conditions are met.

70TH05008

- 3) Depressing the clutch pedal will restart the engine and ENG A-STOP indicator light (green) (1) will go off.

While the engine is stopped automatically, depressing the clutch pedal will restart the engine consuming fuel. Therefore, for fuel economy, it is recommended to depress the clutch pedal just before the vehicle start.

- Without depressing the clutch pedal, the engine may restart automatically if the automatic engine restart conditions are met.

For details, refer to “Automatic engine restart conditions” in this section.

**Points to note during the automatic engine stop**

When the following operations are performed during the automatic engine stop, the engine may shut down, accompanied by an interior buzzer or restarted, to ensure safety.

- When the hood is opened, an interior buzzer will sound intermittently and the engine will come out of the automatic engine stop mode and shut down. The ENG A-STOP indicator light (green) will go off.
- when the driver releases the seat belt and opens the driver’s door, the buzzer sounds and the ENG A-STOP indicator light (green) turns off and then the engine will stall.

**NOTE:**

- *The power steering warning light, engine oil pressure warning light and charge warning light on the meter panel do not come on during the automatic engine stop, but they will come on once the engine shuts down.*
- *If the audio volume is high, the sound may be choppy when the engine restarts, which is normal.*

**NOTE:**

*if the engine stalled by a rapid clutch operation, the engine will restart with the gear positioned “N” (neutral) and the clutch pedal depressed.*

**NOTICE**

**The ENG A-STOP system will not operate and engine does not restart automatically or the engine stalls with warning buzzer under the following conditions:**

- **Engine hood is open.**
- **Driver’s seat belt is not fastened and driver’s door is open.**
- **The gearshift lever is moved to a position other than “N” (Neutral) position without depressing the clutch pedal.**

**When the engine stalls, restart the engine by usual operation. Refer to “Starting / stopping engine” in this section for details.**

## OPERATING YOUR VEHICLE

### Actuation conditions for ENG A-STOP system

#### Standby conditions

When all of the following conditions are met while the vehicle is traveling, ENG A-STOP system will be permitted:

- The engine is started with the hood completely closed.
- The hood is completely closed.
- The ENG A-STOP OFF switch has not been pressed to deactivate the ENG A-STOP system.
- The battery is fully charged and the temperature inside the battery is within the specified range (#1).
- The engine has warmed up and the engine coolant temperature is within the specified range.
- The driver is wearing seat belts.
- The driver's door is completely closed.
- No electronically controlled system besides the ENG A-STOP system is issuing a signal to inhibit stopping of the engine (#2).
- The negative pressure of the brake booster is normal.

55RH03001

- The ABS or ESP® has not been activated during one driving cycle (a) from the engine start to the vehicle start and stop.

#1 If the vehicle has not been in use for an extended period of time or the audio or other electrical component was used for an extended period of time while the engine was stopped, the battery may have discharged and it may take some time before the standby mode is achieved.

#2 If any of the warning and indicator lights affecting the ENG A-STOP system come on, the engine will not be stopped automatically.

#### Automatic engine stop conditions

When all of the following conditions are met under the standby conditions, the engine will stop automatically after the vehicle has stopped:

- The gearshift lever is in "N" (Neutral) position
- The clutch pedal is released
- Engine auto stop function will be ready once the vehicle runs at a speed exceeding 6 km/h after restart of the engine.
- The vehicle has stopped.
- The accelerator pedal is not depressed.

**Automatic engine restart conditions**

If one of the following operations is performed or the vehicle enters one of the following modes during the automatic engine stop, the engine will restart automatically and the ENG A-STOP indicator light (green) will go off:

- The clutch pedal is depressed
- The ENG A-STOP OFF switch is pressed to deactivate the ENG A-STOP system.
- The battery has discharged substantially (#).
- A malfunction of the system is detected (#).
- The negative pressure of the brake booster has dropped (#).
- The vehicle starts to move on a slope, etc. (#).
- Some time (2 minutes or so) has elapsed after the start of the automatic engine stop (#).

# The ENG A-STOP indicator light (green) will blink and then go off.

**NOTICE**

**If driver's seat belt is not fastened or the gear shift lever is in a position other than "N", the engine will not be restarted automatically.**

**ENG A-STOP OFF switch (If equipped)**

The ENG A-STOP system can be deactivated.

- To deactivate the system, press the ENG A-STOP OFF switch (1) to turn on ENG A-STOP OFF indicator light (2).
- To activate the system once again, press the switch (1) again to turn off the indicator.
- Every time the engine is stopped manually, the system is enabled again and the ENG A-STOP OFF indicator light (2) goes off.

55UM05035

**NOTE:**

Pressing the ENG A-STOP OFF switch (1) during the automatic engine stop will restart the engine automatically and the ENG A-STOP OFF indicator light (2) will come on.

**ENG A-STOP OFF indicator light (If equipped)**

56RM03012

This indicator comes on in the instrument cluster.

- This indicator comes on when the ENG A-STOP system is deactivated.
- The indicator blinks when the ignition switch is turned to "ON" position, if one of the conditions listed below is met. The ENG A-STOP system does not actuate correctly while the indicator is blinking. Have the system inspected by a MARUTI SUZUKI authorized workshop.
  - There may be something wrong with the ENG A-STOP system.
  - The lead-acid battery is due for replacement.

**NOTE:**

If the indicator light blinks when the engine has stopped automatically by the ENG A-STOP system, the engine may restart or stall.

## OPERATING YOUR VEHICLE

### Parking sensors

(1) Symbol representing an obstacle detected by parking sensor\*

\* This symbol shows that an obstacle is located on the rear of vehicle.

- The parking sensor system uses ultrasonic sensors to detect obstacles near the rear bumper. If obstacles are sensed while you are parking or moving the vehicle slowly, the system warns you by sounding a buzzer and displaying symbols representing the obstacles on the information display in the instrument cluster.
- The system emits an ultrasonic wave and the relevant sensor detects the return of the wave reflected by an obstacle. The system measures the time taken by the ultrasonic wave to reach the obstacle and return from it, from which it determines the obstacle's position.
- The parking sensor function can be used when you turn the ignition switch to "ON" position, the gearshift lever is in the "R" position. This function is helpful in the following cases: pulling over to the curb; parallel-parking the vehicle; steering the vehicle into a garage; driving along an alley; and moving slowly in a place with obstacles.

#### WARNING

- The parking sensor warns you of obstacles with buzzers and by showing you the location of the obstacles on the information display. However, you must still pay full attention yourself while driving.
- The sensors can detect obstacles only within a limited area and only when the vehicle is moving within a limited speed range. So, in tricky areas, you must move the vehicle slowly while checking around it using your direct vision or rearview mirrors. There is increased risk of an accident if you control the vehicle relying only on the parking sensor.

#### NOTICE

**Parking sensors are only for driver's assistance.**

## OPERATING YOUR VEHICLE

### Sensor Locations

55UM05002

- (1) Rear center sensors (2 places)
- (2) Rear corner sensors (2 places)

### Working sensors

The sensors work depending on the gearshift lever position as follows:

Gearshift lever position		R	N, 1st – 5th	Parking brake lever
Rear sensors	Center	On	Off	No relation
	Corner	On	Off	No relation

### NOTICE

- Avoid hitting the sensor areas or directing the nozzle of a high-pressure car washer onto the sensor areas. Otherwise, the sensors may be damaged.
- If the bumper hits a hard object, the sensors on it may not work properly. If this occurs, have the sensors inspected by a MARUTI SUZUKI authorized workshop.

## OPERATING YOUR VEHICLE

Approximate areas where obstacles can be detected

55UM05031

- An obstacle within about 20 cm from a sensor or just below a sensor is not detectable.
- The detection distance of rear corner sensors is within about 60 cm.
- The detection distance of rear center sensors is about 150 cm.

### ⚠ WARNING

- Under the following conditions, the parking sensor system may not work normally because the sensors cannot detect obstacles correctly.
  - Sensors are covered with mud, ice or other materials (Such materials must be removed for normal operation).
  - Sensors are wet from water splashes or heavy rain.
  - Sensors are covered by a hand, sticker, accessory, etc.
  - There is an accessory or other object attached within the sensor's sensing area.
  - Items such as tow hooks, commercially available corner poles, radio antenna, etc. are installed on the bumper.
  - The height of the bumper is changed due to alteration to the suspension or other causes.
  - The sensor areas are extremely hot from direct sunlight or cold due to freezing weather.
  - The vehicle is on a rough surface, slope, gravel road or grass field.
  - The vehicle is at a steep angle.
  - Sensors have intercepted ultrasonic noise from another vehicle's horn, engine, air braking

(Continued)

### ⚠ WARNING

(Continued)

- system (large vehicles), or parking sensor.
  - Obstacles are too close to the sensors.
  - Sensors are at an angle to a highly reflective object such as glass (Ultrasonic waves are not reflected back from the obstacle).
- Sensors may not be able to correctly detect the following types of obstacles:
  - Objects made of a thin material like wire netting and ropes.
  - Square-shaped curbstones or other objects with sharp edges.
  - Tall objects with a large upper part like a road sign.
  - Low-profile objects such as curbstones.
  - Sound-absorbing objects such as cotton and snow.

#### NOTE:

- Thin poles or obstacles lower than the sensors may become undetectable as the vehicle moves closer to them even if they have been detected from longer distances.
- The system may calculate the distance to a road sign or similar obstacle to be shorter than the actual distance.

## OPERATING YOUR VEHICLE

### Obstacle indication by parking sensor

70TH05025

- (1) Obstacle detected by rear center sensors
- (2) Obstacle detected by rear corner sensors

Upon detecting an obstacle, the parking sensor causes an interior buzzer to sound and a symbol representing the obstacle appears on the information display in the instrument cluster.

- A different symbol is displayed depending on the direction and distance of the obstacle.
- A buzzer located behind the rear seat sounds when a sensor at the rear detects an obstacle.
- Warnings when obstacles are detected by rear sensors

Distance (approx.)		Buzzer	Symbol
Center sensors	60–150 cm	Short beeps at long intervals	Three lines
45–60 cm		Short beeps at short intervals	
35–45 cm		Short beeps at very short intervals	Two lines
Less than 35 cm		Continuous beep	One line

#### NOTE:

- Symbols are displayed with a short delay after the detection of obstacles.
- If the system detects multiple obstacles simultaneously, the display shows all of their positions using the corresponding symbols. However, the buzzers will sound only for the nearest obstacles.
- Even in places where the buzzer always sounds when an obstacle is detected, the buzzer may not sound depending on the situation.
- When the parking sensor detects an obstacle while it is operating, the parking sensor indicator light will blink.

## OPERATING YOUR VEHICLE

### Set sensors

You can select either the normal or trailer mode of the parking sensor via the information display. Refer to "Information display" in "BEFORE DRIVING" section.

### Normal mode

All sensors operate. Use this mode under normal conditions.

### Trailer mode

The rear corner and rear center sensors are inhibited from operating. Use this mode when towing a trailer.

#### NOTICE

**Check that the normal mode is selected with the parking sensor when steering the vehicle into a garage. If the parking sensor is left in the trailer mode, the rear corner and rear center sensors are not functioning.**

### Warning and indicator messages

If there is a problem or warning regarding the parking sensor system, the status of the indicator on the parking sensor inform it. Follow its instruction.

Indicator	Symbol	Probable cause and remedy
	<ul style="list-style-type: none"><li>• Two blinking lines in a sensor location</li><li>• Two blinking lines in all sensor locations</li></ul>	<p>There may be a problem with the indicated sensor or the parking sensor system.</p> <p>Have your vehicle inspected by a MARUTI SUZUKI authorized workshop.</p>
	<p>One blinking line in a sensor location</p>	<p>The indicated sensor is contaminated. Wipe it clean with a soft cloth.</p>

### Situations where the parking sensor system does not activate

Under the following situations, the parking sensor system does not activate properly.

- For few seconds immediately after turning the ignition switch to the "ON" position
- When the gearshift lever is in a position other than "R" position
- When an obstacle cannot be detected
- When the parking sensor system is temporarily stopped or malfunctioning
  - For details, refer to "Warning and indicator messages" in this section.

## Electronic Stability Program (ESP®)

ESP® is a registered trademark of Mercedes-Benz Group AG.

The Electronic Stability Program (ESP®) helps to control the vehicle during cornering if front wheels or rear wheels skid. It also assists you in maintaining traction while accelerating on loose or slippery road surfaces. It does this by regulating the engine's output, and by selectively applying the brakes. In addition, ESP® helps to avoid skidding by controlling braking pressure.

### WARNING

**The ESP® cannot enhance the vehicle's driving stability in all situations and does not control your vehicle's entire braking system. The ESP® cannot prevent accidents, including those resulting from excessive speed in turns, or hydroplaning. Only safe and attentive drive can prevent accidents.**

**The capabilities of an ESP®-equipped vehicle must never be used as a substitute for careful driving.**

### NOTE:

*You may hear an operation sound when you start the engine or after the vehicle begins to move. This means that the ESP® systems are in the self-check mode. This sound does not indicate a malfunction.*

The ESP® has the following systems:

### Anti-lock Brake System (ABS)

Refer to "Anti-lock Brake System (ABS)" in this section.

### Brake assist system

Refer to "Brake Assist System" in this section.

### Traction control system

The traction control system automatically helps prevent the spinning of wheels when the vehicle is started or accelerated on slippery road surfaces. The system operates only if it senses that some of the wheels are spinning or beginning to lose traction. When this happens, the system operates the front or rear brakes and reduces engine power to limit wheel spin.

### Stability control system

The vehicle stability control system helps provide integrated control of systems such as anti-lock brakes, traction control, engine control, etc. This system automatically controls the brakes and engine to help prevent the vehicle from skidding when cornering on a slippery road surface or when turning the steering wheel abruptly.

### WARNING

**Always check the surrounding conditions and drive the vehicle in a safe manner, as controlling the vehicle by ESP® has limits and ESP® may not function properly depending on the surrounding conditions.**

## OPERATING YOUR VEHICLE

### CAUTION

- Observe the following points. Otherwise, ESP<sup>®</sup> may not operate properly or it may result in a malfunction.
  - Adjust the tyre pressure as specified.
  - When replacing tyres, use the same tyres with the size, type, and tread patterns.
  - Do not use the tyres which have excessively worn conditions.
  - Do not modify the suspension or the brake and do not change vehicle height or suspension hardness.
  - Do not drive the vehicle with suspension or brake excessively deteriorated.
  - Do not modify the engine or the muffler.
  - Do not install LSD (limited slip differential).
- When you install the snow chains, ESP<sup>®</sup> may not operate properly.
- The ESP<sup>®</sup> is not a substitute for winter tyres or tyre chains on a snow-covered road

### NOTE:

- If you perform the following operations, you may hear an operation sound or a clicking sound. This means that the ESP<sup>®</sup> system is in the self-check mode and this does not indicate a malfunction.
  - When ignition switch is turned to the “ON” position
  - When releasing your foot from the brake pedal, after the ignition switch is in “ON” position with the brake pedal depressed
  - When starting the engine
  - When starting the vehicle after starting the engine
- When engine revolutions is high and ESP<sup>®</sup> operates, you may feel the change of engine revolutions or vibration of vehicle body. However, this is normal.

### ESP<sup>®</sup> indicator light

55UM05036

This light blinks 5 times per second when one of the following systems is activated.

- Stability control system
  - Traction control system
- If this light blinks, drive carefully.

When the ignition switch is turned to “ON” position, this light comes on briefly so you can check that the light is working.

### NOTICE

**If the ESP<sup>®</sup> indicator light comes on and stays on while driving, there may be a malfunction of the ESP<sup>®</sup> systems (other than ABS). You should have the systems inspected by a MARUTI SUZUKI authorized workshop.**

### NOTE:

When the ESP<sup>®</sup> indicator light comes on and stays on while driving, indicating a malfunction of the ESP<sup>®</sup> systems (other than ABS), the brake system will function as an ordinary ABS with no additional ESP<sup>®</sup> functions.

**ESP® OFF switch**

(1) ESP® OFF switch

When the ESP® OFF switch located at the instrument panel is pushed and held to turn off the ESP® systems (other than ABS), the ESP® OFF indicator light in the instrument cluster comes on.

When you have turned the ESP® systems (other than ABS) off, turn them back on before resuming ordinary driving.

When you push the ESP® OFF switch again, the ESP® OFF indicator light will go out and all of the ESP® systems will be activated.

**ESP® OFF indicator light**

You should turn the ESP® on during your ordinary driving, so that you have the benefits of all of the ESP® systems.

It may be required to turn the ESP® systems (other than ABS) off if your vehicle is stuck in sand, mud, or snow, where wheel spin is necessary.

**Hill hold control system**

The hill hold control system is designed to assist you in starting to move up hills. When you start to move up a hill, the system helps to prevent the vehicle from rolling downward (for approximately 2 seconds) while you move your foot from the brake pedal to the accelerator pedal.

**⚠ WARNING**

- **Do not rely excessively on the hill hold control system. The hill hold control system may not prevent the vehicle from rolling downward on a hill under all load or road conditions. Always be prepared to depress the brake pedal to prevent the vehicle from rolling downward. Failure to pay attention and depress the brake pedal to hold the vehicle on a hill when necessary, may result in loss of control or an accident.**
- **The hill hold control system is not designed to stop the vehicle on a hill.**

(Continued)

## OPERATING YOUR VEHICLE

### WARNING

(Continued)

- After you release your foot from the brake pedal, accelerate the vehicle to move up immediately. If you release your foot from the brake pedal over 2 seconds, the hill hold control system will be canceled. If so, the vehicle may roll downward, which can result in an accident depending on the degree of slope. And, the engine may stall and the power assist for the steering and brakes will not work so steering and braking will be much harder than usual which can result in an accident or vehicle damage.
- If you drive on the steep slope, the gravel, the snow-covered road, or the muddy road and the hill hold control system is activated, there may be a possibility that the wheels will be locked and then the vehicle may lose the control.

The hill hold control system activates for a maximum of about 2 seconds if your foot is moved from the brake pedal when the following conditions are all met.

- 1) The gearshift lever is in a forward gear or reverse gear.
- 2) The parking brake is released.
- 3) The vehicle is on an upward incline.

The hill hold control system is activated when the engine is restarted after being stopped automatically, even if the previous conditions are not met.

#### NOTE:

*When the hill hold control system is activated, the following conditions may be found, but this is not a malfunction.*

- You may hear a sound from the engine room.

As brake pedal becomes heavy, it may be difficult for you to depress it.

## Braking

59RN05770

The distance needed to bring any vehicle to a halt increases with the speed of the vehicle. The braking distance needed, for example, at 60 km/h will be approximately 4 times greater than the braking distance needed at 30 km/h. Start to depress the brake pedal when there is plenty of distance between your vehicle and the stopping point, and slow down gradually.

 **WARNING**

**If water gets into the brake devices, brake performance may become poor and unpredictable. After driving through water or washing the underside of the vehicle, test the brakes while driving at a slow speed to see if they have maintained their normal effectiveness. If the brakes are less effective than normal, dry them by repeatedly applying the brakes while driving slowly until the brakes have regained their normal effectiveness.**

*NOTE:*  
*While braking you may hear operational noise due to friction between brake disc/drum and brake lining. This is a normal phenomenon and does not indicate any abnormality or affect normal functioning of the vehicle.*

**Power-assisted brakes**

Your vehicle has power-assisted brakes. If power assistance is lost due to a stalled engine or other failures, the system is still fully operational on reserve power and you can bring the vehicle to a complete stop by pressing the brake pedal once and holding it down. The reserve power is partly used up when you depress the brake pedal and reduces each time the pedal is pressed. Apply smooth and even pressure to the pedal. Do not pump the pedal.

 **WARNING**

**Even without reserve power in the brake system, you can still stop the vehicle by pressing the brake pedal harder than normally required. However, the stopping distance may be longer.**

*NOTE:*  
*During brake pedal application & release, you may hear some operational noise owing to activation and functioning of components in the brake system. This is a normal phenomenon and does not indicate any abnormality or malfunction. Also, it does not affect the brake function.*

**Brake assist system**

When you slam the brakes on, the brake assist system determines it to be an emergency stop and provides more powerful braking for a driver who cannot hold down the brake pedal firmly.

*NOTE:*  
*If you quickly and forcefully depress the brakes, you may hear clicking sound by the brake assist system operation. This is normal and indicates that the brake assist system is activated properly.*

## OPERATING YOUR VEHICLE

### Anti-lock Brake System (ABS)

ABS will help you avoid skidding by electronically controlling braking pressure. It will also help you maintain steering control when braking on slippery surfaces or when braking hard.

The ABS works automatically, so you do not need any special braking technique. Just push the brake pedal down without pumping. The ABS will operate whenever it senses that the wheels are locking up. You may feel the brake pedal move a little while the ABS is operating.

#### WARNING

- Always check the surrounding conditions and drive the vehicle in a safe manner, as controlling the vehicle by ABS has limits and the system may not function properly depending on the surrounding conditions.
- If tyre grip performance is over the limit or hydroplaning occurs, ABS cannot work properly.

#### NOTE:

- If the ABS system is activated, you may hear a clunking noise and/or feel pulsating in the brake pedal. This is normal and indicates that the brake fluid pressure is being controlled properly.

- You may hear an operation sound when you start the engine or after the vehicle begins to move. This means that the above systems are in the self-check mode. This sound does not indicate a malfunction.

### Braking distance

ABS is not designed to shorten the stopping distance.

#### WARNING

- In the following situations, the braking distance required for a vehicle with ABS may be slightly greater than the one required for a vehicle without ABS, resulting in an accident. Drive the vehicle slowly and maintain ample distance between your vehicle and the vehicle in front of you.
  - When driving on rough roads such as unpaved or stone-paved roads
  - When driving on gravel roads or fresh snow roads
  - When driving over bumps on the roads such as joint seams
  - When passing over metal plates such as manholes
  - When snow chains are installed

#### NOTE:

- When applying sudden brake or applying brake on slippery roads, the braking distance required for a vehicle with ABS is almost the same as the one required for a vehicle without ABS.
- If you would like to suddenly apply brake, just push the brake pedal down firmly without pumping. Otherwise, the longer braking distance will be required.
- The ABS will not work if vehicle speed is under about 9 km/h. This depends on the road conditions.

### Vibration and sound during ABS operation

When strongly depressing the brake pedal, you might feel vibration of the brake pedal, the steering wheel, and the vehicle body. This is due to ABS operation, and does not indicate a malfunction; continue strongly depressing the brake pedal at this time.

#### NOTE:

Immediately after starting the engine and beginning to drive, you might temporarily hear a motor sound. This means that the systems are in self-check mode. This sound does not indicate a malfunction.

Tyres

**⚠ WARNING**

ABS detects each wheel rotation speed via a sensor. If tyres or wheels other than those specified in the owner's manual are used for size, type, tread pattern, or if worn conditions of tyres are different, the correct wheel rotation speed cannot be detected and ABS will not work properly. This may result in an accident. When replacing tyres, use the tyres with the size, type, and tread patterns which are specified in this owner's manual. Also, do not use the tyres which are excessively worn.

Situations where ABS may activate by chance when applying brake

- When driving on slippery roads

69RHS150

- Manholes

69RHS151

- Metal plates in construction zones

69RHS152

- Gravel roads

- When driving over joints in roads and other height differences

69RHS153

- Joints in roads

## OPERATING YOUR VEHICLE

69RHS154

- Height differences in roads
- When driving on rough roads

69RHS155

- Bumpy roads

69RHS156

- Cobblestone

### Anti-lock Brake System (ABS) warning light

55UM05039

If there is a problem in the ABS system with the ignition switch in “ON” position, this light will come on.

### Braking assist

This function assists you in applying more force when operating the brake. When sudden braking is applied, the time until the ABS comes into full effect is shortened.

- If you do not depress the brake pedal firmly, braking assist will not operate.
- Brake assist is not a device that provides control beyond the original braking performance.

# ADVICE FOR YOUR DRIVING

- When driving ..... 6-1
- Off-road driving ..... 6-7
- Improving fuel economy ..... 6-8
- Stuck vehicle ..... 6-9
- Precaution for handling vehicle ..... 6-10
- Running-in ..... 6-12
- Catalytic converter ..... 6-13

60G409

## ADVICE FOR YOUR DRIVING

### When driving

59RN02300

#### **▲ WARNING**

- Wear your seat belts at all times. Even though airbags are equipped at the front seating positions, the driver and all passengers should be properly restrained at all times, using the seat belts provided. Refer to “Seat belt” in “FOR SAFE DRIVING” section for instructions on proper use of the seat belts.
- Never drive under the influence of alcohol or other drugs. Alcohol and drugs can seriously impair your ability to drive safely, greatly increasing the risk of injury to yourself and others. You should also avoid driving when you are tired, sick, irritated or under stress.

### Start driving after carefully checking the surrounding circumstances

Be sure to always fully check the safety of the surrounding circumstances before beginning to drive.

69RHS176

#### **▲ CAUTION**

You cannot check the safety of the surrounding circumstances enough only by the rear parking sensors and the inside mirror. When moving the vehicle forward or backward, check the safety of the surrounding circumstances by directly checking with your eyes.

### Do not race the engine, and do not avoid fast starts and rapid acceleration just after engine start

Refer to “Avoid fast starts, rapid acceleration and hard braking” and “Do not race the engine” in the “Improving fuel economy” in this section.

Do not concentrate on a mobile phone or navigation system

55T060040

**▲ WARNING**

- Do not operate a mobile phone, etc. while driving. Being distracted by phone operation could lead to an accident.
- Do not operate navigation/audio equipment, etc. while driving. Otherwise, there is the danger of an accident due to being distracted.

Do not reach through the steering wheel

69RHS178

**▲ WARNING**

Reaching through the steering wheel could interfere with steering wheel operation and result in an accident.

Do not drive with your foot on the brake pedal

**▲ CAUTION**

Driving with your foot resting on the brake pedal could cause brake parts to become worn out more quickly than normal or cause brake components to overheat, making them less effective.

When depressing the accelerator pedal and the brake pedal simultaneously

*NOTE:*

*If you depress both the accelerator pedal and the brake pedal simultaneously while driving, the engine power output may be suppressed.*

## ADVICE FOR YOUR DRIVING

### Do not shift the gearshift lever into "N" (Neutral) while driving

69RHS180

#### **⚠ CAUTION**

**Do not put the gearshift lever into the "N" (Neutral) position while driving, except in times of emergency, as this disengages engine braking, which could result in an accident.**

#### **NOTE:**

*Non-usage of vehicle for long duration may cause gradual rusting on brake disc surface as it is made of cast iron. This may result in noise/vibration. The same has no bearing on functioning of the vehicle. Regular driving of vehicle may prevent/remove rust, thus reducing the noise and vibration.*

### What should you do in case of malfunction or emergency?

#### • **Warning light turns on**

Stop immediately in a safe place and take corrective action. For details, refer to "Warning Lights and Indicators" in the "QUICK GUIDE" section or "Warning and indicator messages" in the "INSTRUMENT CLUSTER" section.

#### • **You feel strong shock from under the floor**

Immediately stop in a safe place and check whether there is brake fluid leakage or fuel leakage, and also check whether there is any abnormality in the exhaust pipe, etc. If any abnormality is found, consult with a MARUTI SUZUKI authorized workshop.

#### • **Sudden tyre puncture**

Grasp the steering wheel firmly, carefully apply the brake, slowly reduce speed, and stop in a safe place.

#### • **You feel that the brake pedal is heavy to use**

Via engine vacuum pressure, the vehicle utilizes a brake booster to reduce the force necessary for depressing the brake pedal. If this engine vacuum pressure decreases, you may feel as if the brakes require more force than usual to depress, but this is not abnormal. Depress the brake pedal as strongly as you need to.

#### • **Metallic screeching sound is heard from the brakes**

Promptly consult with a MARUTI SUZUKI authorized workshop. The disk brake pads (MARUTI SUZUKI genuine parts) are designed to emit a creaking/screeching sound as a function to warn the wear, as they have almost reached usage limit and replacement timing.

#### **⚠ WARNING**

**The brakes could be losing their ability to function normally, which could result in an accident. If you hear a metallic creaking/screeching sound, do not continue driving.**

### Use engine brake on a long downhill slope

Use engine braking(\*) in tandem with regular braking when driving on a long downhill slope. Release the accelerator pedal and shift down according to vehicle speed.

55T060010

Shift down to a lower gear one by one.

\*: Engine braking is a braking effect that occurs when you release your foot from the accelerator pedal while driving. The lower the gear, the greater the effect of engine braking becomes.

### ▲ WARNING

Continuously depressing the brake pedal could cause the brakes to overheat, possibly rendering them ineffective.

### When side wind is strong

72J20330

At a tunnel exit, on a bridge, or when a large truck passes you, your vehicle might be blown slightly sideways by side wind. Do not panic. Firmly grasp the steering wheel, gradually reduce speed, and regain your intended course.

### Drive slowly on a slippery road surface

59RN06030

### ▲ CAUTION

When driving on wet, icy, or snowy roads, etc., refrain from sudden movements, such as sudden starting, acceleration, braking, turning or abrupt engine braking. Otherwise, there is the danger of an accident due to loss of traction.

## ADVICE FOR YOUR DRIVING

**Do not drive on puddles at high speed**

69RHS182

### **⚠ CAUTION**

**When driving on puddles or on wet road surfaces at high speed, a thin surface of water is built between the wheels and the road surface, and the wheels may float. This is called as hydroplaning, which leads to a loss of control in the steering wheel and the brakes and possibly results in an accident.**

**Check brake effectiveness after driving on puddles or washing a vehicle**

72J20360

- After verifying the safety of the surroundings, depress the brake pedal several times at low speed and check the brake effectiveness.
- If the brake effectiveness is still poor, depress the brake pedal at low speed gently and repeatedly until the brake effectiveness is fully recovered, to dry the brake equipment.

### When encountering a flooded area

61M0075

Avoid driving in a flooded area or a deep puddle. If driving in a flooded area is unavoidable, go slowly in the lowest gear. In case that you have driven in a flooded area, stop the vehicle in a safe place while checking the brake effectiveness. Then, ask a MARUTI SUZUKI authorized workshop to check the following inspection items.

- Function of brake
- Function of electrical components
- Changes of oil level and quality for engine, transmission and differential. In case that the oil is turbid whitely, water has been mixed in the oil and an oil change is required.
- Lubricant condition of the bearings, suspension joints, etc.

### NOTICE

**Avoid driving in a flooded area or a deep puddle. It may cause an engine stall, short in electrical components, engine and transmission damages, etc.**

### Highway driving

When driving at highway speeds, pay attention to the following:

- Stopping distance progressively increases with vehicle speed. Apply the brakes far enough ahead of the stopping point to allow for the extra stopping distance.
- On rainy days, hydroplaning can occur. Hydroplaning is the loss of direct contact between the road surface and the vehicle's tyres due to a water film forming between them. Steering or braking the vehicle during hydroplaning can be very difficult, and loss of control can occur. Keep speed down when the road surface is wet.
- At high speeds, the vehicle may be affected by side winds. Therefore, reduce speed and be prepared for unexpected buffeting, which can occur at the exits of tunnels, when passing by a cut of a hill, or when being overtaken by large vehicles, etc.

## ADVICE FOR YOUR DRIVING

### Driving on hills

55T060010

- When driving on steep hills, the vehicle may begin to slow down and show a lack of power. If this happens, you should shift to a lower gear so that the engine will again be operating in its higher power range. Shift rapidly to prevent the vehicle from losing momentum.
- When driving down a hill, the engine should be used for braking by shifting to the next lower gear.

### WARNING

Do not hold the brake pedal down too long or too often while going down a steep or long hill. This could cause the brakes to overheat, resulting in reduced braking efficiency. Failure to take this precaution could result in loss of vehicle control.

### NOTICE

When descending a downhill, Never turn the ignition switch to “LOCK” position. Emission control system damage may result.

### Off-road driving

Do not drive in the field covered with grown grass

69RHS181

Do not drive in the field covered with grown grass. If you drive in the field covered with grass, it may cause accident or fire or vehicle damage by getting caught in grown grass.

### WARNING

If loose grass, etc. becomes entangled in drive train parts or exhaust pipes, drive train components might become damaged or fire may result.

### Improving fuel economy

**NOTE:**

*Fuel economy (mileage) of the vehicle may vary due to several factors i.e. driving habits- gear change pattern, usage of A.C, Air pressure in the tyres, wind speed, traffic conditions, fuel quality-non adulterated standard fuel, maintenance of vehicle, road conditions, braking etc.*

The following instructions will help you improve fuel economy.

#### Keep tyre pressures correct

Under-inflation of the tyres can waste fuel due to increased running resistance of the tyres. Keep your tyres inflated to the correct pressure shown on the label on the driver's side door or the driver's door lock pillar.

#### Keep weight to a minimum

The heavier the load is, the more fuel the vehicle consumes. Unload any unnecessary luggage or cargo.

#### Avoid excessive idling

If you park your vehicle for more than one minute, stop the engine and start it again later. When warming up a cold engine, do not allow the engine to idle or apply full throttle until the engine has reached operating temperature. Allow the engine to warm up by driving.

### Avoid fast starts, rapid acceleration and hard braking

#### Avoid fast starts

Fast starts away from lights or stop signs will consume fuel unnecessarily and shorten engine life. Start off slowly.

#### Avoid unnecessary stops

Avoid unnecessary deceleration and stopping. Try to maintain a moderate, steady speed whenever possible. Slowing down and then accelerating again uses more fuel.

#### Keep a steady cruising speed

Drive at a constant speed that road and traffic conditions will permit.

### Do not race the engine

69RHS060

Revvng the engine only consumes extra fuel and has no benefit.

#### **NOTICE**

**Immediately after starting, the engine is often not yet fully warmed up. Therefore, revving the engine, starting to drive suddenly, or rapid acceleration can cause engine failure.**

### Drive with an appropriate gear for vehicle speed

Running the vehicle at a high engine rotation speed by using a low-speed gear will result in poor fuel economy. Use the correct gear according to the vehicle speed.

## ADVICE FOR YOUR DRIVING

### Keep the air cleaner clean

59RN06050

If the air cleaner is clogged with dust, there will be greater intake resistance, resulting in decreased power output and increased fuel consumption.

### Stuck vehicle

If your vehicle gets stuck in snow, mud or sand, follow the directions below:

- 1) Shift the transmission back and forth between a forward range (or first gear for manual transmission) and reverse. This will create a rocking motion which may give you enough momentum to free the vehicle. Press gently on the accelerator to keep wheel spinning to a minimum wheel rpm. Remove your foot from the accelerator while shifting. Do not race the engine. Excessive wheel spin will cause the tyres to dig deeper, making it more difficult to free the vehicle.

#### NOTE:

*You may have to turn the ESP® system off in order to allow spinning the wheels.*

- 2) If your vehicle remains stuck after a few minutes of rocking, we recommend you to consult a MARUTI SUZUKI authorized workshop or a roadside assistance service. If a towing service is not available in an emergency, your vehicle may be temporarily towed by a towing cable or chain secured to the towing eye on the front of the vehicle. Refer to "Towing by using towing eye" in "EMERGENCY SERVICE" section.

### WARNING

- Do not allow anyone to stand near the vehicle when you are rocking it, and do not spin the wheels faster than an indicated 40 km/h on the speedometer. Personal injury and/or vehicle damage may result from spinning the wheels too fast.

55T060070

- In addition to following the driving tips in this section, it is important to observe the following precautions.
  - Check that your tyres are in good condition and always maintain the specified tyre pressure. Refer to "Tyres" in "INSPECTION AND MAINTENANCE" section for details.

(Continued)

**⚠ WARNING**

(Continued)

- Do not use tyres other than those specified by MARUTI SUZUKI. Never use different sizes or types of tyres on the front and rear wheels. For information regarding the specified tyres, refer to the tyre information label located on the driver's door lock pillar.
- Never use oversized tyres or special shock absorbers and springs to raise (jack up) your vehicle. This will change the handling characteristics. Oversized tyres may also rub against the fender over bumps, causing vehicle damage or tyre failure.
- After driving through water, test the brakes while driving at a slow speed to see if they have maintained their normal effectiveness. If the brakes are less effective than normal, dry them by repeatedly applying the brakes while driving slowly until the brakes have regained their normal effectiveness.

**NOTICE**

Do not continue rocking the vehicle for more than a few minutes. Prolonged rocking can cause engine overheating or transmission damage.

**Precaution for handling vehicle**

Do not apply strong force to exterior parts

**NOTICE**

Do not apply strong force to the body panel, spoiler, front and rear bumper, side skirts, etc. These forces can cause damage to these exterior parts.

**Be careful of uneven road surface**

**NOTICE**

In the following cases, the bumper or the lower part of the vehicle could get damaged. Ensure proper care.

- Entering the areas where there is uneven road surface, such as road shoulder
- Driving on roads with grooves, bumps or potholes

Do not modify your vehicle illegally

69RHS184

**⚠ WARNING**

- If you modify your vehicle illegally, there is a danger of a fire or an accident. Illegal modifications might adversely affect handling, performance or durability. Also, this could even violate laws and ordinances.
- Do not install unsuitable parts to your vehicle or do not make your own adjustments or wiring.

(Continued)

## ADVICE FOR YOUR DRIVING

### **WARNING**

(Continued)

- Do not use wheels or wheel nuts other than specified MARUTI SUZUKI genuine products. Doing so could lead to accidents, such as nuts loosening and the wheel coming off while driving. Also, fuel consumption and driving stability could worsen, or it could result in other malfunctions.

### **NOTICE**

- When installing or removing electrical equipment such as radio equipment, navigation, audio equipment or electronic toll control equipment, consult with a MARUTI SUZUKI authorized workshop. Also, do not operate electrical equipment directly from the battery terminals or connect ground wires directly. Otherwise, there is a danger of hindering the functioning of electronic components, causing fire, malfunction, battery runout, etc.

(Continued)

### **NOTICE**

(Continued)

- Only a troubleshooting device designed for inspection and maintenance for this model can be connected to the vehicle's onboard diagnostics system. Connecting a device other than that specified could hinder the functioning of electronic components and cause battery runout, etc.

**Risk of installing electrical equipment other than MARUTI SUZUKI genuine products**

### **NOTICE**

Installing electrical equipment other than MARUTI SUZUKI genuine products may cause other electrical equipment to malfunction, lead to serious failure or leakage of personal information.

MARUTI SUZUKI will not be responsible for any failure or damage caused by the installation of electrical equipment other than MARUTI SUZUKI genuine products.

**When installing, removing and repairing parts**

### **WARNING**

The SRS airbag system and the seat belt pretensioner system could activate unexpectedly or could be rendered ineffective if the parts that affect their functions are adjusted or arranged. In the following cases, these systems will be adversely affected. Consult with a MARUTI SUZUKI authorized workshop beforehand.

- When removing the steering wheel and conducting repairs around the steering wheel, etc.
- When conducting repairs around the center console, around the instrument cluster, under the front seats or to electrical wiring
- When installing audio equipment, etc.
- When conducting sheet metal painting or repairs around the dashboard
- When replacing the front seats or conducting repairs around the seats
- Repairs around the front pillar, the back pillar or the roof side
- When conducting repairs around the center pillar

**Be careful when placing accessories**

69RHS185

**⚠ WARNING**

Do not attach accessories to the window glasses. Accessories and suction cups could hinder vision, or a suction cup could act as a lens and cause a fire. Also, if an airbag is activated, such accessories could be ejected outward within the vehicle, possibly resulting in injury.

**When spilling drinks or liquids**

**⚠ WARNING**

Do not allow liquids to spill, splash or spray inside the vehicle. The following items could malfunction, or fire could result. In the case of spilling drinks, etc., promptly consult with a MARUTI SUZUKI authorized workshop.

- SRS airbag system
- Audio equipment
- Electrical parts such as switches and wiring
- Movable parts such as the gearshift lever or seat belt buckles

**NOTICE**

The sensor of the seat belt reminder is built into the front passenger's seat cushion. If you spill liquid such as soft drinks or juice, the sensor of the seat belt reminder may be damaged. If you spill any liquid on the seat cushion, immediately wipe it with a soft cloth.

**Running-in**

**NOTICE**

The future performance and reliability of the engine depends on the care and restraint exercised during its early life. It is especially important to observe the following precautions during the first 960 km of vehicle operation.

- After starting, do not race the engine. Warm it up gradually.
- Avoid prolonged vehicle operation at a constant speed. Moving parts will break in better if you vary your speed.
- Start off from a stop slowly. Avoid full throttle starts.
- Avoid hard braking, especially during the first 320 km of driving.
- Do not drive slowly with the transmission in a high gear.
- Drive the vehicle at moderate engine speeds.
- Do not tow a trailer during the first 960 km of vehicle operation.

## ADVICE FOR YOUR DRIVING

### Catalytic converter

80G106

The purpose of the catalytic converter is to minimize the amount of harmful pollutants in your vehicle's exhaust. Use of leaded fuel in vehicles equipped with catalytic converters is prohibited, because lead deactivates the pollutant-reducing components of the catalytic system.

The converter is designed to last the life of the vehicle under normal usage and when unleaded fuel is used. No special maintenance is required on the converter. However, it is very important to keep the engine properly tuned. Engine misfiring, which can result from an improperly tuned engine, may cause overheating of the catalytic converter. This may result in permanent heat damage to the catalytic converter and other vehicle components.

#### NOTICE

To minimize the possibility of catalytic converter or other vehicle damage:

- Maintain the engine in the proper operating condition.
- In the event of an engine malfunction, particularly one involving engine misfire or other apparent loss of performance, have the vehicle serviced promptly.
- Do not turn off the engine or interrupt the ignition when the transmission is in gear and the vehicle is in motion.
- Do not try to start the engine by pushing or towing the vehicle, or coasting down a hill.
- Do not idle the engine with any spark plug wires disconnected or removed, such as during diagnostic testing.
- Do not idle the vehicle for prolonged periods if idling seems rough or there are other malfunctions.
- Do not allow the fuel tank to get near the empty level.

59RN06060

#### ⚠ WARNING

Be careful where you park and drive; the catalytic converter and other exhaust components can get very hot. As with any vehicle, do not park or operate this vehicle in areas where combustible materials such as dry grass or leaves can come in contact with a hot exhaust system.

## OTHER CONTROLS AND EQUIPMENT

### Fuel filler opening

Make sure to read "Refueling" in this section.

### Fuel filler door

55UM05040

A fuel filler door is located on the left rear side of the vehicle. The fuel filler door can be unlocked by pulling up the opener lever (1) located on the outboard lower side of the driver's seat and locked by simply closing the door.

### Fuel filler cap

57L51093

#### To remove the fuel filler cap:

- 1) Stop the engine and close all the doors and windows while refueling.
- 2) Open the fuel filler door.
- 3) Remove the cap by turning it counter-clockwise.

#### **CAUTION**

**Remove the fuel filler cap slowly. The fuel may be under pressure and may spray out, causing injury.**

55UM07010

#### NOTE:

The cap holder (1) holds the fuel filler cap (2) by hooking the groove (3) when refueling.

#### To reinstall the fuel filler cap:

- 1) Turn the cap clockwise until you hear several clicks.
- 2) Close the fuel filler door.

**⚠ WARNING**

- If you open the fuel filler cap suddenly, fuel may be under pressure and may spray out. Loosen the fuel filler cap slowly. After air deflating sound stops, open the fuel filler cap.
- If fuel spills out, an accident such as a fire may occur. Also, if you leave spilled fuel as it is, it may cause paint staining, discoloration or cracking. Be careful not to spill out fuel. If you spill it out, wipe it off with a soft cloth.
- If the fuel filler cap is not closed securely, it may cause fuel leakage or a fire. After refueling, close the fuel filler cap until you hear more than 2 clicks.
- If you use the fuel cap other than a genuine MARUTI SUZUKI cap, it may cause fuel leakage. Do not use the fuel cap other than a genuine MARUTI SUZUKI cap.

**Refueling****Watch out for fire**

69RHS186

**⚠ WARNING**

Be sure to observe the following points when refueling. Otherwise, gasoline may catch a fire from fuel and it may cause a fire.

- Always stop the engine first.
- Close all the doors and windows when refueling.
- As gasoline is highly flammable, open sparks such as lit cigarettes are strictly prohibited.

**When refueling at a self-service gas station****⚠ WARNING**

When refueling at a self-service gas station, be sure to observe the following points.

- If substantial static electricity is accumulated within your body, a spark could ignite fuel vapors and possibly cause burns. Before opening the fuel filler cap, discharge any static electricity\* that might have accumulated in your body, by touching a metal part of the vehicle body or the gas pump machine. In addition, do not re-enter the vehicle while refueling, as static electricity could be charged to your body again.
- Do not allow others who have not discharged their static electricity to come close to the fuel filler opening.

\*Take special care when air is dry, as this can cause your body to become charged with static electricity more easily. In addition, wearing layers of clothing can generate static electricity due to the friction of the fibers.

(Continued)

## OTHER CONTROLS AND EQUIPMENT

### ⚠ WARNING

(Continued)

- If you open the fuel filler cap suddenly, fuel may be under pressure and may spray out. Loosen the fuel filler cap slowly. After air deflating sound stops, open the fuel filler cap.
- If you do not insert the fuel filler nozzle securely into the fuel filler opening, fuel may spill out. Insert the fuel filler nozzle securely into the fuel filler opening until it stops.
- Pull the gas pump filler nozzle lever until it stops.

(Continued)

### ⚠ WARNING

(Continued)

69RHS070

- If you continue to refuel after the automatic stop to top up the tank, fuel could overflow. When the automatic stop function of gas pump filler nozzle is activated, stop refueling.

\*Depending on the type of gas pump machine being used, the automatic stop function could activate early and refueling might not be possible. Please follow the instructions of the employees at the gas station.

(Continued)

### ⚠ WARNING

(Continued)

- If fuel spills out, an accident such as a fire may occur. Also, if you leave spilled fuel as it is, it may cause paint staining, discoloration or cracking. Be careful not to spill out fuel. If you spill it out, wipe it off with a soft cloth.
- If the fuel filler cap is not closed securely, it may cause fuel leakage or a fire. After refueling, return the fuel filler nozzle to its original position and close the fuel filler cap until you hear more than 2 clicks.
- Fuel contains substances harmful to the human body. Do not breathe in vaporized fuel.
- In addition, be sure to observe all the warnings posted at the gas station.

Use unleaded gasoline only

### NOTICE

Using leaded gasoline, low-quality gasoline or other types of fuel (such as alcohol and diesel oil) can cause harmful effects to the engine and fuel delivery system.

Do not use fuel other than unleaded gasoline.

## Hood

**⚠ WARNING**

- As the hood is heavy, if a child tries to open or close it, the child may get injured. Do not allow a child to open or close the hood.
- As the engine compartment becomes hot, it may cause burns. When opening the hood, do not allow a child to come close to the hood.
- If you leave any tool or cloth in the engine compartment, it may cause a malfunction. Also, as the engine compartment becomes hot, it may result in vehicle fire. Do not leave any tool or cloth for inspection or cleaning in the engine compartment.

**⚠ CAUTION**

If you come close to a running drive belt or a cooling fan (radiator fan), hands, hair, clothing, etc. may be caught and you may get injured. When the engine is running, keep away from the drive belt or the cooling fan (radiator fan).

## Opening the hood

55UM05041

- 1) Pull up the hood release lever (1) located under the driver's side instrument panel in the outboard position. This will disengage the hood lock halfway.

55UM07001

- 2) Push the under-hood release lever (2) sideways with your finger, as shown in the illustration. While pushing the lever, lift up the hood.

**⚠ CAUTION**

The under-hood release lever can be hot enough to burn your finger while the engine is running or right after the engine stopped.

If you try to open the hood while the engine is running or right after the engine stopped, touch the under-hood release lever after it becomes cool enough.

## OTHER CONTROLS AND EQUIPMENT

### NOTICE

If you lift up the hood with the wiper arms raised, the wiper arms and the hood may get damaged. Do not lift up the hood with the wiper arms raised.

55UM07002

- 3) While holding the hood, pull the prop rod (3) out from the holding clip (4), and then insert the end of the rod into the designated hole (5).

### CAUTION

- The prop rod can be hot enough to burn your finger while the engine is running or right after the engine stopped. If you would like to use the prop rod while the engine is running or right after the engine stopped, touch the prop rod after it becomes cool enough.
- If the prop rod slips out, you may get caught in the closing hood. Insert the end of the prop rod into the hole securely.
- The prop rod may slip out when the hood is blown by wind. If this occurs, you may get caught in the closing hood. Be very careful when you open the hood on a windy day.

#### NOTE:

When you pull out the prop rod from the holding clip, hold the (a) part.

## Closing the hood

55UM07003

- 1) Lift up the hood slightly and remove the prop rod from the hole. Put the prop rod back into the holding clip.
- 2) Lower the hood to about 20 cm above the hood latch, and then let it drop down. Check that the hood is securely latched after closing.

### WARNING

If the hood is not fully closed, it can fly up unexpectedly during driving, obstructing your view and resulting in an accident. Check that the hood is fully closed and latched before driving.

**▲ CAUTION**

When closing the hood, the occupant's body such as hands may get caught in the hood and get injured. Also, pushing on the hood from the top may damage it. When closing the hood, check that no part of the occupant's body such as hands is in the path of the hood.

**Sun visor**

79J161

The sun visors can be pulled down to block glare coming through the windshield, or they can be unhooked and turned to the side to block glare coming through the side window.

## OTHER CONTROLS AND EQUIPMENT

### Interior light

55UM07032

- (1) Front Room Lamp (if equipped)
- (2) Center Room Lamp
- (3) Trunk lid light (if equipped)

### Front Room Lamp (if equipped) (1)

55UM07028

### Center Room Lamp (2)

55UM07029

This light switches have three positions which function as described below:

#### ON (a)

The light comes on and stays on regardless of whether the door is open or closed.

#### NOTE:

*If your vehicle is equipped with the keyless entry system, the light will automatically be turned off to prevent the battery from discharging when the following conditions are simultaneously met:*

- The ignition switch is in "LOCK" position.
- The hazard warning lights, the position lights and the headlights are off.
- After about 15 minutes of the light on.

#### DOOR (b)

- The light comes on while any of the doors is opened. After closing all doors, the light will remain on for 15 seconds and then fade out.
- If all doors are closed, the light comes on for about 15 seconds when the ignition key is pulled out from the ignition switch. After 15 seconds, the light will fade out.
- To save the battery, the light will be automatically turned off when a period of 15 minutes has elapsed after any of the doors is opened and other operations are not done.

If you perform any of the following procedures before the light fading out, the light will start to fade out immediately.

- Inserting the ignition key into the ignition switch to change the ignition mode to "ACC" or "ON".
- Locking all doors by operating the key, keyless entry transmitter or power door locking switch.

#### OFF (c)

The light remains off even when the door is opened.

**Trunk lid light (if equipped) (3)**

55UM07009

When you open the trunk lid, the trunk light comes on and remains on as long as you keep the lid open.

**NOTE:**

If you leave trunk lid open, the light will automatically be turned off after about 15 minutes to prevent the battery from discharging.

**Accessory socket****Center console**

55UM05042

The accessory socket will work when the ignition switch is in "ACC" or "ON" position. This socket can be used to provide 12 volt / 120 watt / 10 ampere power for electrical accessories. Check that the rubber cap remains on the socket when the socket is not in use.

When using the accessory socket, open the rubber cap (1).

**⚠ WARNING**

When the accessory socket is not in use, closed the rubber cap. If any foreign material enters the accessory socket, it may cause a malfunction or short circuit.

**NOTICE**

- To prevent the fuse from being blown, when using sockets at the same time, do not exceed the total combined power capacity of 12 volt / 120 watt / 10 ampere.
- If you use the accessory socket while the engine is stopped, the lead-acid battery may discharge. Also, if you use the accessory socket for a long time while the engine is in the idling condition, the lead-acid battery may discharge.
- Use of inappropriate electrical accessories can cause damage to your vehicle's electrical system. Check that any electrical accessories you use are designed to plug into this type of socket.
- Check that the cap remains on the socket when the socket is not in use.

(Continued)

## OTHER CONTROLS AND EQUIPMENT

### NOTICE

(Continued)

- When the ignition switch is in "LOCK" position during using the accessory socket, the following accidents may occur;
  - the audio or navigation system does not turn off.
  - the keyless entry system does not work, etc.

If they occur, disconnect the item from the accessory socket and check whether the electrical equipments work properly.

If the problem persists, ask a MARUTI SUZUKI authorized workshop to have the system inspected.

### Drink holder

#### Floor console

Front

Rear (if equipped)

(1) Floor console drink holder

### Door

Front

Rear

(2) Bottle holder

### **WARNING**

- Be careful and use a lid for a drink not to spill out liquid. Spilling out hot liquid can cause burn injury. In addition, if liquid spills out on the following parts, it may cause a fire or a malfunction and an airbag system may not work properly.
  - Navigation system, audio system or the relevant switches
  - Wiring or electrical components under the floor
  - Moving part of the gearshift lever or the seatbelt buckle
- If you place a long drink container, sharp-edged, hard or breakable objects in the drink holders, these objects may be thrown out, resulting in personal injury and hindering your view. In the driver's side drink holder or the front passenger's side drink holder, you can place a can, a cup or a plastic bottle.
- In the floor console drink holder, do not place a carton pack with the bigger size than 500 ml. Otherwise, the carton pack may fall down or a drink may spill out.

#### **NOTE:**

- *If you spill or drop liquid accidentally, have your vehicle inspected by a MARUTI SUZUKI authorized workshop.*

## OTHER CONTROLS AND EQUIPMENT

### Storage area

55UM05043

- (1) Glove box
- (2) Floor console tray (if equipped)
- (3) Center console pocket (if equipped)

Each item in the figure is a typical example; the actual equipment depends on the vehicle type.

#### **⚠ WARNING**

- If any object gets caught in the brake pedal or the accelerator pedal, you may not operate the pedal properly, resulting in an accident. If you use a storage area without a lid, do not place the object which may fall out while driving.
- If there is any object within the area where the front passenger's airbag could inflate, the object may be thrown out or the front passenger's airbag may not inflate properly.

#### **⚠ CAUTION**

If you use a storage area with a lid, do not drive the vehicle with the lid open. In acceleration, a sudden braking or an collision, your body may be hit by the lid or the object which falls out from the storage area.

**Using storage area with a lid  
Glove box**

70TH07016

- To open the glove box, pull the latch lever (1).
- To close it, push the lid until it is latched securely.

**⚠ WARNING**

- **Never drive with the glove box lid open. It could cause injury if an accident occurs.**
- **Do not leave cigarette lighters or spray cans in the glove box. If a cigarette lighter or spray can is in a place such as the glove box, it may light accidentally when luggage is loaded, causing a fire.**

**Assist grips**

80J1233

Assist grips are provided for convenience. Pull the assist grip (1) towards you.

**NOTICE**

**To avoid damaging the assist grip and the molded headlining, do not hang down the assist grip.**

**Footrest**

70TH07017

Use the footrest as a support for your left foot only.

## OTHER CONTROLS AND EQUIPMENT

### Door pocket

#### Front

55UM07025

#### Rear

55UM07026

Each pocket is provided for holding light and soft things such as gloves, newspapers or magazines.

#### **▲ CAUTION**

- If an accident occurs, objects such as bottles, cans, etc. in the door pocket can injure the occupants. Do not put hard or breakable objects in the door pocket.
- If you grab and pull the door pocket, it may be broken, resulting in personal injury. When closing a door, do not grab and pull the door pocket.

#### *NOTE:*

*If you place the keyless remote controller in a door pocket, it may not be detected.*

### USB socket (if equipped)

55UM07035

Open the cover (1), and then connect your portable digital music player, etc. to this socket to enjoy music through the vehicle's audio system. Refer to the supplementary manual for details.

#### **▲ WARNING**

**If foreign material enters the USB socket, a malfunction or a short circuit may occur.  
Always close the cover when the USB socket is not in use.**

### Luggage carpet hook

55UM07033

The hook (1) is provided in the luggage compartment area to hang the luggage carpet.

### Luggage compartment carpet

69T070190

There is a tool bag under the luggage compartment carpet. When installing the luggage compartment carpet, hook the carpet by using the holes (1) in the carpet, onto the hooks (2) at the base of the luggage compartment.

## OTHER CONTROLS AND EQUIPMENT

### Heating and air conditioning system

#### Manual heating and air conditioning system (with digital control panel)

##### Air outlet

55UM07034

1. Windshield defroster outlet
2. Side defroster outlet
3. Side outlet
4. Center outlet
5. Floor outlet

**Center outlet**

55UM07012

Move the knob (1) vertically or horizontally to adjust the direction of airflow as desired.

**⚠ CAUTION**

Prolonged exposure to hot air from the heater or air conditioner could result in low temperature burns. All vehicle occupants, particularly children, the elderly, those with special needs, individuals with delicate skin, and sleeping individuals, should maintain sufficient distance from the air outlets to prevent prolonged exposure to hot airflow.

**Side outlet**

70TH07028

When open, air comes out regardless of the air flow selector position. Move the knob (2) vertically or horizontally, to adjust the direction of airflow as desired. The side outlet opens when you turn the dial (3) upward and closes when you turn it downward.

**⚠ CAUTION**

Prolonged exposure to hot air from the heater or air conditioner could result in low temperature burns. All vehicle occupants, particularly children, the elderly, those with special needs, individuals with delicate skin, and sleeping individuals, should maintain sufficient distance from the air outlets to prevent prolonged exposure to hot airflow.

**NOTE:**

- For side outlet, if the front door windows are fogged, adjust to direct wind from the side outlets towards the front door windows. This will allow you to remove fog more quickly.

## OTHER CONTROLS AND EQUIPMENT

### Manual air conditioning system (with digital control panel)

#### Description of controls

69T070260

- (1) Temperature selector
- (2) Blower speed selector
- (3) Air intake selector
- (4) Air flow selector
- (5) Defrost switch
- (6) Air conditioning switch
- (7) "OFF" switch
- (8) MAX A/C switch
- (9) Display

#### Temperature selector (1)

69T070270

Push upper part or lower part of the temperature selector (1) to adjust the temperature.

To down a temperature, push upper part of the temperature selector. To up a temperature, push lower part of the temperature selector.

### Blower speed selector (2)

69T070280

The blower speed selector (2) is used to turn on the blower and to select blower speed.

To down the blower speed, push upper part of the temperature selector. To up the blower speed, push lower part of the temperature selector.

### Air intake selector (3)

55T070160

Push the air intake selector (3) to change between the following modes.

### RECIRCULATED AIR (a)

When this mode is selected, inside air is recirculated. At the same time, the indicator light (10) will turn on. This mode is suitable when driving through an area with polluted air such as a tunnel, or when attempting to quickly cool down the vehicle or to reduce unwanted odor from entering the vehicle.

### FRESH AIR (b)

When this mode is selected, outside air is introduced. At the same time, the indicator light (10) will turn off.

The fresh air position (b) and recirculated air position (a) are selected alternately each time the air intake selector is pushed.

### NOTE:

*If you select the recirculated air position (a) for an extended period of time, the air in the vehicle can become contaminated. Therefore, you should occasionally select the fresh air position (b).*

## OTHER CONTROLS AND EQUIPMENT

### Air flow selector (4)

55T070170

Push the air flow selector (4) to change among the following functions. The indication of the selected mode appears on the display.

### VENTILATION (c)

55UM07036

Temperature-controlled air comes out of the center and side outlets.

### BI-LEVEL (d)

55UM07037

Temperature-controlled air comes out of the floor outlets and cooler air comes out of the center and side outlets. When the temperature selector (1) is in the fully cold position or fully hot position, however, the air from the floor outlets and the air from the center and side outlets will be the same temperature.

**HEAT (e)**

55UM07038

Temperature-controlled air comes out of the floor outlets and the side outlets, a small amount of air comes out of the windshield defroster outlets and also comes slightly out of the side defroster outlets.

**HEAT & DEFROST (f)**

55UM07039

Temperature-controlled air comes out of the floor outlets, the windshield defroster outlets, the side defroster outlets and the side outlets.

**Defrost switch (5)**

59RN07170

Push the defrost switch (5) to turn on the defroster. At the same time, the indicator light (11) will turn on.

## OTHER CONTROLS AND EQUIPMENT

### DEFROST

55UM07040

Temperature-controlled air comes out of the windshield defroster outlets, the side defroster outlets and the side outlets.

#### NOTE:

When the defrost switch (5) is pushed to turn on the defroster, the air conditioning system will operate and FRESH AIR mode will be selected automatically. In very cold weather, however, the air conditioning system will not operate.

### Air conditioning switch (6)

59RN07190

The air conditioning switch (6) is used to turn on and off the air conditioning system only when the blower is on. To turn on the air conditioning system, push in the switch and "A/C" will appear in the display. To turn off the air conditioning system, push in the switch again and "A/C" will go off.

### MAX A/C switch (8)

69T070350

Push the MAX A/C switch (8) to cool down the interior at peak efficiency.

#### NOTE:

When the MAX A/C switch is pushed, "MAX A/C" will appear in the display and the air conditioning system will operate in the following settings automatically.

- The air conditioner: On
- The blower speed: Full speed
- The temperature setting level: Maximum cooling
- The air flow mode: VENTILATION (c)
- The air intake mode: RECIRCULATED AIR (a)

To return to the current setting, push the MAX A/C switch again.

### System operating instructions

To set the air conditioning system, follow the procedure below.

- 1) Start the engine.
- 2) Set the desired blower speed by pushing upper part or lower part of the blower speed selector (2).
- 3) Set the desired temperature by pushing upper part or lower part of the temperature selector (1).

You can use the air conditioning switch (6) to manually turn the air conditioner on or off according to your preference. When you turn the air conditioning switch off, the air conditioning system cannot lower the inside temperature below the outside temperature.

To turn the air conditioning system off, push the "OFF" switch (7).

### Normal cooling

Set the air flow selector (4) to VENTILATION (c), the temperature selector (1) to the desired temperature position and the blower speed selector (2) to the desired blower speed position. Setting the blower speed selector (2) to a higher blower speed position increases cooling efficiency.

You can switch the air intake selector (3) to either FRESH AIR (b) or RECIRCULATED AIR (a) as you desire. Choosing RECIRCULATED AIR (a) increases cooling efficiency.

### Quick cooling (using recirculated air)

The base settings are the same as for normal cooling except you select RECIRCULATED AIR (a) and the highest blower speed.

To cool down the interior at peak efficiency, push the MAX A/C switch (8).

#### NOTE:

- If you select RECIRCULATED AIR (a) for an extended period of time, the air in the vehicle may become contaminated and the windows tend to get misted. Therefore, you should select FRESH AIR (b) whenever possible.
- If your vehicle has been left in the sun with the windows closed, it will cool faster if you open the windows briefly while you operate the air conditioner with the air intake selector at FRESH AIR (b) and the blower at high speed.

### Dehumidifying

Set the air flow selector (4) to the desired air flow selector position, the temperature selector (1) to the desired temperature position and the blower speed selector (2) to the desired blower speed position. Also select FRESH AIR (b).

#### NOTE:

- Because the air conditioner dehumidifies the air, turning it on will help keep the windows clear.
- If the heating performance can no longer perform at a sufficient level due to automatically stopping the engine, press the ENG A-STOP OFF switch to deactivate the ENG A-STOP system. (The engine will automatically restart and the air conditioning performance will be restored.)
- If the windshield and/or the driver's side/passenger side door windows are fogged during automatically stopping the engine, stop the ENG A-STOP system and restart the engine. Then, push the air flow selector (4) to change the air flow to the HEAT & DEFROST or DEFROST position to defog the windows.

## OTHER CONTROLS AND EQUIPMENT

---

### Maintenance

If you do not use the air conditioner for a long period, such as during winter, it may not give the best performance when you start using it again. To help maintain optimum performance and durability of your air conditioner, it needs to be run periodically. Operate the air conditioner at least once a month for one minute with the engine idling. This circulates the refrigerant and oil and helps protect the internal components.

If your air conditioner is equipped with air filters, clean or replace them as specified in "Maintenance schedule" in "INSPECTION AND MAINTENANCE" section. Have this job done by a MARUTI SUZUKI authorized workshop as the lower glove box must be lowered for this job.

#### NOTE:

*Your vehicle uses the air conditioning refrigerant HFC-134a, commonly called R-134a. R-134a replaced R-12 around 1993 for automotive applications. Other refrigerants are available, including recycled R-12, but only R-134a should be used in your vehicle.*

#### **NOTICE**

**Using the wrong refrigerant may damage your air conditioning system.  
Use R-134a only. Do not mix or replace the R-134a with other refrigerants.**

### How to use air conditioning system effectively

#### **If you do not use the air conditioner for a long period**

Ensure that the air conditioner is used at least once a month, so as to circulate the refrigerant throughout the air conditioning system. The refrigerant contains the oil necessary for lubricating the system's parts, which contributes to maintaining the air conditioner's performance.

#### **Parking under the blazing sun**

After parking for a long time under the blazing sun, the interior temperature can become very high. Use the air conditioning system, with the windows or doors opened to ventilate the interior.

## Radio antenna

55UM07021

(1) Radio antenna

## Installation of radio frequency transmitters

We recommend that you always ask a MARUTI SUZUKI authorized workshop about frequency band, max output power, antenna position of vehicle and specific conditions for installation and/or use before installing a radio transmitter in your vehicle. Such equipments may cause the electronic control system to malfunction if they are incorrectly installed or they are not suited for the vehicle.

### **NOTICE**

**Improper installation of mobile communication equipment such as cellular telephones, CB (Citizen's Band) radios or any other wireless transmitters may cause electronic interference with your vehicle's ignition system or any other electrical systems, resulting in vehicle performance problems. Consult a MARUTI SUZUKI authorized workshop or qualified service technician for advice.**

## Audio function

### **When using audio system with appropriate volume not to disturb safe driving**

- When playing music or other audio, if a mobile phone is used inside or nearby the vehicle, noise may be heard from the speakers. This does not indicate a malfunction.
- Navigation and audio equipment may not function properly if they are interfered with unauthorized radio waves.
- For further information about the features of the navigation or audio equipment, refer to the instruction manuals.

### **⚠ WARNING**

**If you operate the navigation or audio equipment, you may be distracted by them, resulting in an accident. Do not operate the navigation or audio equipment while driving.**

## OTHER CONTROLS AND EQUIPMENT

---

### NOTICE

**While the engine is stopped, using the navigation or audio equipment for a long period of time may cause the lead-acid battery to run out. Do not use the navigation or audio equipment for a long period of time while the engine is stopped.**

#### NOTE:

*Due to poor quality of FM/AM signal, some disturbance/noise may be heard from speakers. It is recommended to switch off the tuner system to prevent the said disturbance/noise in the speaker.*

### Suzuki Connect (if equipped)

Suzuki Connect is an advanced Telematics solution that offers Connected car features related to Vehicle Alerts & Notifications, Safety & Security, Trips & Location & Remote Vehicle Operation.

Refer to MARUTI SUZUKI website for below details:

2. Feature & Vehicle applicability
3. Terms & Conditions
4. FAQs
5. Suzuki Connect App Manual
6. Help & Contact us
7. Suzuki Connect Alexa Skill Manual

#### NOTE:

- *Application services are subject to change. It is recommended to install the latest updates from Google Play/Apple App store for optimal experience.*
- *Application functioning is subject to network availability & also depends on Smartphone hardware & OS performance.*
- *Amazon, Alexa and all related logos are trademarks of Amazon.com, Inc. or its affiliates.*

The communication device equipped with your vehicle includes free/open source software.

The license information and/or source code for free/open source software is available at the following URL:

<https://www.denso-ten.com/support/source/oem/sg1/>

## VEHICLE LOADING AND TOWING

Vehicle loading ..... 8-1  
Trailer towing ..... 8-1

54G215

## VEHICLE LOADING AND TOWING

---

### Vehicle loading

Your vehicle was designed for specific weight capacities. The weight capacities of your vehicle are indicated by the Gross Vehicle Weight Rating (GVWR) and the Permissible maximum Axle Weight (PAW, front and rear). The GVWR and PAW (front and rear) are listed in the "SPECIFICATIONS" section.

GVWR – Maximum permissible overall weight of the fully loaded vehicle (including all the occupants, accessories and cargo plus the trailer nose weight if towing a trailer).

PAW – (Front and Rear) Maximum permissible weight on an individual axle.

Actual weight of the loaded vehicle and actual loads at the front and rear axles can only be determined by weighing the vehicle. Compare these weights to the GVWR and PAW (front and rear). If the gross vehicle weight or the load on either axle exceeds these ratings, you must remove enough weight to bring the load down to the rated capacity.

### WARNING

- **Never overload your vehicle. The gross vehicle weight (sum of the weights of the vehicle, all the occupants, accessories, cargo must never exceed the Gross Vehicle Weight Rating (GVWR). In addition, never distribute a load so that the weight on either the front or rear axle exceeds the Permissible maximum Axle Weight (PAW).**
- **Always distribute cargo evenly. To avoid personal injury or damage to your vehicle, always secure cargo to prevent it from shifting if the vehicle moves suddenly. Place heavier objects on the floor and as far forward in the cargo area as possible. Never pile cargo higher than the top of the seat backs.**

### Trailer towing

Your vehicle was originally designed to carry people and a normal amount of cargo, not to tow a trailer.

## INSPECTION AND MAINTENANCE

59RN05750

### ⚠ WARNING

Take extreme care when working on your vehicle to prevent accidental injury. Carefully observe the following precautions:

- To prevent damage or unintended activation of the airbag system or seat belt pretensioner system, check that the lead-acid battery is disconnected and the ignition switch has been in "LOCK" position or the ignition mode has been LOCK (OFF) for at least 90 seconds before performing any electrical service work on your MARUTI SUZUKI vehicle. Do not touch airbag system components, seat belt pretensioner system components or wires. The wires are wrapped with yellow tape or yellow tubing, and the couplers are yellow for easy identification.
- Do not leave the engine running in garages or other confined areas.

(Continued)

### ⚠ WARNING

(Continued)

- When the engine is running, keep hands, clothing, tools, and other objects away from the fan and drive belt. Even though the fan may not be moving, it can automatically turn on without warning.
- When it is necessary to perform service work with the engine running, check that the parking brake is set fully and the transmission is in Neutral.
- Do not touch ignition wires or other ignition system parts when starting the engine or when the engine is running, or you could receive an electric shock.
- Be careful not to touch a hot engine, exhaust manifold and pipes, muffler, radiator and water hoses.
- Do not allow smoking, sparks, or flames around fuel or the battery. Flammable fumes are present.

(Continued)

### ⚠ WARNING

(Continued)

- Do not get under your vehicle if it is supported only with the portable jack provided in your vehicle.
- Be careful not to cause accidental short circuits between the positive and negative battery terminals.
- Keep used oil, coolant, and other fluids away from children and pets. Dispose of used fluids properly; never pour them on the ground, into sewers, etc.
- While pouring engine oil, brake fluid and coolant, do not spill them. Their adhesion to the surrounding parts may cause a fire or malfunction.

## Maintenance Schedule

The following table shows the timing when you should perform regular maintenance on your vehicle. This table shows in kilometers and months when you should perform inspections, adjustments, lubrication and other services.

 <b>WARNING</b>
<p><b>MARUTI SUZUKI recommends that maintenance on your MARUTI SUZUKI vehicle should be performed by MARUTI SUZUKI authorized workshop.</b></p>

## Periodic Maintenance Schedule

<b>NOTICE</b>
<p>Whenever it becomes necessary to replace parts on your vehicle, it is recommended that you use genuine MARUTI SUZUKI replacement parts or their equivalent.</p>

- “C”: Clean
- “R”: Replace or Change
- “I”: Inspect, clean, adjust, lubricate or replace as necessary
- “L”: Lubricate
- “T”: Tighten to Specified Torque
- “O”: Rotate

**NOTE:**

- This table includes services as scheduled up to 80,000 km mileage. Beyond 80,000 km, carry out the same services at the same intervals respectively.
- For free inspection the cost of materials and consumables to be borne by customer.

## INSPECTION AND MAINTENANCE

Interval: This interval should be judged by odometer reading or months, whichever comes first.			FREE INSPECTION				PERIODIC MAINTENANCE AT COST						
			km (x1000)	1	5	10	20	30	40	50	60	70	80
			months	1	6	12	24	36	48	60	72	84	96
<b>ENGINE</b>													
1-1.	Engine accessory drive belt (Wear)		-	-	I	I	I	I	I	I	I	R	
1-2.	Engine Coolant SUZUKI LLC: Super (Blue) (#1,2)	First time only:	Replace at 100000 km or 60 months whichever comes first										
		Second time and after:	Replace every 40000 km or 24 months whichever comes first										
	Engine Coolant SUZUKI LLC: Standard (Yellow) (#1,3)		I	I	I	R	I	R	I	R	I	R	
1-3.	Engine oil, engine oil filter and drain plug gasket (Level, Leakage)		I	I	R	R	R	R	R	R	R	R	
1-4.	Cooling system hoses and connections (Leakage and Damage)		I	I	I	I	I	I	I	I	I	I	
1-5.	Engine mounting and manifold fixing (Loose Damage)		-	-	I	-	I	-	I	-	I	-	
1-6.	Exhaust system (Noise, Leakage etc.)		-	I	-	I	-	I	-	I	-	I	
1-7.	Positive crank case ventilation system (Hoses, Connections and Valve)		-	I	-	I	-	I	-	I	-	I	
<b>IGNITION</b>													
2-1.	Ignition wire (Damage, Deterioration)		-	-	-	I	-	I	-	I	-	I	
2-2.	Spark plug		Replace every 100000 km or 84 months whichever comes first										
<b>FUEL</b>													
3-1.	Air cleaner filter element	Paved-road	Clean every 5000 km. Replace after every 40000 km										
		Dusty Condition	Clean every 2500 km or as required. Replace after every 40000 km										
3-2.	Fuel tank cap, fuel lines and connections (Leakage and Damage)		-	I	-	-	-	I	-	-	-	I	
3-3.	Fuel tank		-	-	-	-	-	I	-	-	-	I	
3-4.	Fuel filter (Leakage)		Replace every 100000 km or 120 months whichever comes first										

#1: Perform the engine coolant level check under the daily inspection in the "OPERATING YOUR VEHICLE" section.

The same type of coolant that is filled at the time of a brand new car should be used when you add or replace the coolant. Refer to "Engine coolant" in this section.

#2: Do not add SUZUKI LLC: Standard (Yellow) Coolant or distilled water or others when your vehicle is originally filled with SUZUKI LLC: Super (Blue) Coolant.

#3: When your vehicle is originally filled with SUZUKI LLC: Standard (Yellow) Coolant, follow the maintenance schedule of SUZUKI LLC: Standard (Yellow) Coolant.

## INSPECTION AND MAINTENANCE

Interval: This interval should be judged by odometer reading or months, whichever comes first.		FREE INSPECTION			PERIODIC MAINTENANCE AT COST

## INSPECTION AND MAINTENANCE

### Drive belt

#### WARNING

**When the engine is running, keep hands, hair, clothing, tools, etc. away from the moving fan and drive belts.**

The drive belts tension is adjusted automatically. If the belt is too loose, insufficient battery charging, poor air conditioning, or excessive belt wear can result.

The belts should also be examined to ensure that they are not damaged.

If you need to replace or adjust the belt have it done by your MARUTI SUZUKI authorized workshop.

### Engine oil and filter

#### Specified oil

##### For India

56RM07013

(1) Preferred

##### Except for India

55T090690

(1) Preferred

For India, be sure that the engine oil you use comes under the quality classification as listed below.

- API SN, SP
- ILSAC GF-6

Except for India, be sure that the engine oil you use comes under the quality classification as listed below.

- API SL, SM, SN, SP
- ILSAC GF-6

SAE 0W-16 (1) is the best choice for good fuel economy and good startability in cold weather.

#### NOTE:

*We recommend that you use MARUTI SUZUKI genuine oil. To purchase it, see a MARUTI SUZUKI authorized workshop.*

#### NOTE:

- *The replacement timing varies with the type of engine oil that you choose. Refer to "Maintenance schedule" in this section for corresponding maintenance schedule.*
- *We recommend that you use MARUTI SUZUKI genuine oil. To purchase it, see a MARUTI SUZUKI authorized workshop.*

**Oil level check**

It is important to keep the engine oil at the correct level for proper lubrication of your vehicle's engine. Check the oil level with the vehicle on a level surface. The oil level indication may be inaccurate if the vehicle is on a slope. The oil level should be checked either before starting the engine or at least 5 minutes after stopping the engine.

Pull out the oil dipstick, wipe the oil off with a clean cloth, insert the dipstick all the way into the engine, and then remove it again. The oil on the stick should be between the upper and lower limits shown on the stick. If the oil level indication is near the lower limit, add enough oil to raise the level to the upper limit.

**NOTICE**

**Failure to check the oil level regularly could lead to serious engine trouble due to insufficient oil.**

**Refilling**

Remove the oil filler cap and pour oil slowly through the filler hole to bring the oil level to the upper limit on the dipstick. Be careful not to overfill the oil. Too much oil is almost as bad as too little oil. After refilling, start the engine and allow it to idle for about a minute. Stop the engine, wait about 5 minutes and check the oil level again.

**Changing engine oil and filter**

Since special procedures are required, ask a MARUTI SUZUKI authorized workshop for this job.

### Engine Coolant

#### Coolant Level Check

70TH09003

Check the coolant level at the reservoir tank, not at the radiator. With the engine cool, the coolant level should be between “FULL” and “LOW” marks. If the coolant level is below “LOW” mark, coolant should be added.

#### Coolant addition and replacement

When you add the coolant, remove the reservoir tank cap and add coolant until the reservoir tank level reaches “FULL” mark while the engine is cool. Never fill the reservoir tank above “FULL” mark.

Since special procedures are required for coolant replacement, ask a MARUTI SUZUKI authorized workshop for this job.

#### **⚠ WARNING**

**Swallowing engine coolant can cause severe injury or death. Inhaling coolant mist or vapors or getting coolant in your eyes could result in severe injury.**

- **Do not drink antifreeze or coolant solution. If swallowed, do not induce vomiting. Immediately contact a poison control center or a physician.**
- **Avoid inhaling coolant mist or hot vapors. If inhaled, remove to a fresh air area.**
- **If coolant gets in the eyes, flush with water and seek medical attention.**
- **Wash thoroughly after handling coolant.**
- **Keep engine coolant out of the reach of children and pets.**

#### **NOTICE**

**When putting the cap on the reservoir tank, line up the mark on the cap and the mark on the tank. Failure to follow this can result in coolant leakage.**

#### Selection of coolant

To maintain optimum performance and durability of your engine, use MARUTI SUZUKI genuine coolant or equivalent.

This type of coolant is the best for cooling system for the following reasons:

- The coolant helps maintain proper engine temperature.
- It gives proper protection against freezing and boiling.
- It gives proper protection against corrosion and rust.

Failure to use the proper coolant can damage your cooling system. A MARUTI SUZUKI authorized workshop can help you select the proper coolant.

#### **NOTICE**

**To avoid damaging your cooling system:**

- **Always use a high quality ethylene glycol base non-silicate type coolant diluted with distilled water at the correct mixture concentration.**
- **Do not add extra inhibitors or additives. They may not be compatible with your cooling system.**
- **Do not mix different types of base coolants. Doing so may result in accelerated seal wear and/or the possibility of severe overheating and extensive engine/transmission damage. In case of coolant mix-up**

(Continued)

**NOTICE**

(Continued)  
**have your vehicle inspected by a MARUTI SUZUKI authorized workshop.**

*NOTE:*  
 Maruti Suzuki highly recommends the use of MARUTI SUZUKI genuine coolant. MARUTI SUZUKI genuine coolant has been specially formulated for your MARUTI SUZUKI product and contributes to the desired vehicle performance and ideal driving experience.

Depending on the production period of your vehicle, the coolant type filled at the time of a brand new car differs. There are two coolant types, SUZUKI LLC: Super (Blue) Coolant and SUZUKI LLC: Standard (Yellow) Coolant. You can check the original coolant type in your vehicle by the color of the coolant in the reservoir tank (Refer below figure).

Coolant Color	Coolant Type
Blue	Suzuki LLC: Super
Yellow	Suzuki LLC: Standard

*NOTE:*  
 The same type of coolant that is filled at the time of a brand new car should be used when you add or replace the coolant.

**SUZUKI LLC: Super (Blue) Coolant:**

**NOTICE**

- This coolant is already diluted to the proper percentage. Do not dilute with distilled water additionally. Doing so may result in the possibility of freezing and/or overheating coolant.
- Do not add SUZUKI LLC: Standard (Yellow) Coolant or distilled water or others when your vehicle is originally filled with SUZUKI LLC: Super (Blue) Coolant. If such a case occurs, then get the vehicle inspected by a MARUTI SUZUKI authorized workshop.

## INSPECTION AND MAINTENANCE

**SUZUKI LLC: Standard (Yellow) Coolant:**

### NOTICE

- The concentration of the mixture to be used shall be 30% antifreeze and 70% distilled water. Do not use straight coolant nor plain water.
- If the lowest ambient temperature in your area is expected to be  $-15^{\circ}\text{C}$  ( $5^{\circ}\text{F}$ ) or below, use higher concentrations up to 60% following the instructions on the antifreeze container. Concentrations greater than 60% will cause overheating conditions.
- When your vehicle is originally filled with SUZUKI LLC: Standard (Yellow) Coolant, follow the maintenance schedule of SUZUKI LLC: Standard (Yellow) Coolant in this section. In case you replace with Suzuki LLC: Super (Blue) Coolant, then get the vehicle inspected by a MARUTI SUZUKI authorized workshop.

## Air cleaner

If the air cleaner is clogged with dust, there will be greater intake resistance, resulting in decreased power output and increased fuel consumption.

70TH09006

- 1) Unclamp the side clamps (1).
- 2) Hold up the air cleaner upper case (2).
- 3) Remove the element from the air cleaner case. If it appears to be dirty, clean or replace it with a new one.
- 4) Reinstall the air cleaner case securely.

## Spark plugs

### Spark plug replacement and inspection

Since special procedures, materials and tools are required, it is recommended that you trust this job to a MARUTI SUZUKI authorized workshop.

**Gear oil**

**Manual transmission oil**

When adding gear oil, use gear oil with the appropriate viscosity and grade as shown in the chart below.

We highly recommend you use “MARUTI GENUINE GEAR OIL 75W” for manual transmission oil

**Manual transmission oil**

56RM07006

**Gear oil level check / Gear oil change**

Since special procedures, materials and tools are required, ask a MARUTI SUZUKI authorized workshop for this job.

**Clutch**

**Clutch pedal**

54G274

**Clutch pedal play “d”:  
MAX 10 mm**

Measure the clutch pedal play by moving the clutch pedal with your hand and measuring the distance it moves until you feel slight resistance. The play in the clutch pedal should be less than the specified values. If the play is more than the above, or clutch dragging is felt with the pedal fully depressed, have the clutch inspected by a MARUTI SUZUKI authorized workshop.

**Clutch fluid**

70TH09007

Check the clutch pedal for smooth operation and clutch fluid level from time to time. If clutch dragging is felt with the pedal fully depressed, have the clutch inspected by a MARUTI SUZUKI authorized workshop. If the clutch fluid level is near “MIN” line, fill it up to “MAX” line with MARUTI GENUINE BRAKE FLUID (MGBF) or DOT3 brake fluid.

### NOTICE

Clutch fluid is supplied from brake fluid reservoir. If your clutch fluid level is increased or near the "MIN" line, there is a possibility of clutch or brake fluid leakage or abnormal wear of clutch.

Have your vehicle inspected immediately by a MARUTI SUZUKI authorized workshop.

## Brakes

### Brake fluid

70TH09007

Check the brake fluid level by looking at the reservoir in the engine compartment. Check that the fluid level is between "MAX" and "MIN" lines.

### ⚠ WARNING

- Failure to follow the guidelines below can result in personal injury or serious trouble in the brake system.
  - If the brake fluid in the reservoir drops below a certain level, the brake warning light on the instrument cluster will come on (the engine must be running with the parking brake fully disengaged). Should the light come on, immediately ask a MARUTI SUZUKI authorized workshop to inspect the brake system.
  - A rapid fluid loss indicates leakage in the brake system. In this case, immediately ask a MARUTI SUZUKI authorized workshop to inspect the brake system.
  - Do not use any fluid other than MARUTI GENUINE BRAKE FLUID (MGBF) or DOT3 brake fluid. Do not use reclaimed fluid or fluid that has been stored in old or open containers. It is essential that foreign particles and other liquids are kept out of the brake fluid reservoir.

(Continued)

### ⚠ WARNING

(Continued)

- Brake fluid is harmful or fatal if swallowed, and harmful if it comes in contact with skin or eyes. If swallowed, do not induce vomiting. Immediately contact a poison control center or a physician. If brake fluid gets in eyes, flush eyes with water and seek medical attention. Wash thoroughly after handling. Solution can be poisonous to animals. Keep out of reach of children and animals.

### NOTICE

- If your brake fluid level is near the "MIN" line, there is a possibility of brake pad and/or shoe wear and brake fluid leakage. In this case, ask a MARUTI SUZUKI authorized workshop to inspect the brake system.
- Brake fluid can damage painted surfaces. Be careful when refilling the reservoir.

### NOTE:

- The fluid level can be expected to gradually fall as the brake pad and/or shoe wear.
- Brake fluid absorbs water over time and brake fluid with high water content may cause vapor lock or brake system malfunction.

Replace the brake fluid according to the maintenance schedule in this owner's manual.

### Brake pedal

Check brake pedal stroke. If the stroke is so large, have the brake system inspected by a MARUTI SUZUKI authorized workshop. If you doubt the brake pedal is at its normal height, check it as follows:

54G108

**Minimum distance between brake pedal and floor carpet "a"**

53 mm

## INSPECTION AND MAINTENANCE

With the engine running, measure the distance between the brake pedal and floor carpet when the pedal is depressed with approximately 30 kg of force. The minimum distance required is as specified. Since your vehicle's brake system is self-adjusting, there is no need for pedal adjustment.

If the pedal to floor carpet distance as measured above is less than the minimum distance required, have your vehicle inspected by a MARUTI SUZUKI authorized workshop.

### NOTE:

- When measuring the distance between the brake pedal and floor wall, be sure not to include the floor mat or rubber on the floor carpet in your measurement.
- Measure the distance at the brake pedal's side facing toward the driver's door.

52RM70500

### **⚠ WARNING**

**If the brake pad lining becomes worn and it has reached its minimum thickness, squealing noise sounds during braking.**

**If you hear this noise, have the vehicle inspected immediately by a MARUTI SUZUKI authorized workshop.**

**Continued driving with this condition can cause an accident.**

### **⚠ CAUTION**

**If you experience any of the following problems with your vehicle's brake system, have the vehicle inspected immediately by a MARUTI SUZUKI authorized workshop.**

- Poor braking performance
- Uneven braking (brakes not working uniformly on all wheels)
- Excessive pedal travel
- Brake dragging

**Parking brake**

70TH09008

**Ratchet tooth specification "b":**  
**4th – 9th**  
**Lever pull force (1):**  
**200 N (20 kg)**

Check the parking brake for proper adjustment by counting the number of clicks made by the ratchet teeth as you slowly pull up on the parking brake lever to the point of full engagement. The parking brake lever should stop between the specified ratchet teeth and the rear wheels should be securely locked. If the parking brake is not properly adjusted or the brakes drag is suspected even after the lever has been fully released, have the parking brake inspected and/or adjusted by a MARUTI SUZUKI authorized workshop.

**Brake discs and brake drums**

**Brake disc**

70TH09009

Brake location	Minimum thickness "a"
Front wheels	18.0 mm

**Brake drum**

70TH09010

Brake location	Maximum inner diameter "b"
Rear wheels	202 mm

If the measured thickness or inner diameter of the most worn part falls below or exceeds the value indicated above, the parts should be replaced with a new one. The measurement involves disassembling each brake and requires the use of a micrometer or caliper, which must be done according to the instructions described in the relevant service manual or available from the relevant repair information site.

## INSPECTION AND MAINTENANCE

### Steering wheel

Check that the steering wheel turns easily and smoothly without rattling by turning it all the way to the right and to the left while driving very slowly in an open area. If you find anything else to be wrong, an inspection must be performed by a MARUTI SUZUKI authorized workshop.

### Tyres

70TH05001

The front and rear tyre pressure specifications are listed in the tyre information label (1). Both front and rear tyres should have the specified tyre pressure.

### Tyre inspection

Inspect your vehicle's tyres at least once a month or before long trip by performing the following checks:

- 1) Measure the air pressure with a tyre gauge. Adjust the pressure if necessary. Remember to check the spare tyre, too.

#### **⚠ WARNING**

- **Air pressures should be checked when the tyres are cold or you may get inaccurate readings.**
- **Check the tyre pressure from time to time while inflating the tyre gradually, until the specified pressure is obtained.**
- **Never under-inflate or over-inflate the tyres.**  
**Under-inflation can cause unusual handling characteristics or can cause the rim to slip on the tyre bead, resulting in an accident or damage to the tyre or rim.**  
**Over-inflation can cause the tyre to burst, resulting in personal injury.**  
**Over-inflation can also cause unusual handling characteristics which may result in an accident.**

52KM110

- (1) Tread wear indicator
- (2) Indicator location mark

- 2) Check that the depth of the tread groove is more than 1.6 mm. To help you check this, the tyres have molded-in tread wear indicators in the grooves. When the indicators appear on the tread surface, the remaining depth of the tread is 1.6 mm or less and the tyre should be replaced.
- 3) Check for abnormal wear, cracks and damage. Any tyres with cracks or other damage should be replaced. If any tyres show abnormal wear, have them inspected by a MARUTI SUZUKI authorized workshop.

**⚠ CAUTION**

Hitting curbs and running over rocks can damage tyres and affect wheel alignment. Have tyres and wheel alignment checked periodically by a MARUTI SUZUKI authorized workshop.

- 4) Check for loose wheel nuts.
- 5) Check that there are no nails, stones or other objects sticking into the tyres.

**⚠ WARNING**

- Your MARUTI SUZUKI vehicle is equipped with tyres which are all the same type and size. This is important to ensure proper steering and handling of the vehicle. Never mix tyres of different size or type on the four wheels of your vehicle. The size and type of tyres used should be only those approved by MARUTI SUZUKI as standard or optional equipment for your vehicle.

(Continued)

**⚠ WARNING**

(Continued)

- Replacing the wheels and tyres equipped on your vehicle with certain combinations of aftermarket wheels and tyres can significantly change the steering and handling characteristics of your vehicle.
- Therefore, use only those wheel and tyre combinations approved by MARUTI SUZUKI as standard or optional equipment for your vehicle.

**NOTICE**

- Replacing the original tyres with tyres of a different size may result in false speedometer or odometer readings. Check with a MARUTI SUZUKI authorized workshop before purchasing replacement tyres that differ in size from the original tyres.
- Replacing a tyre with one of a different size, or using different brands among the four tyres can result in damage to the drive train.

## INSPECTION AND MAINTENANCE

### Tyre rotation

#### 4-tyre rotation (Vehicle with 185/65R15 88H tyre)

65D459

#### 5-tyre rotation (Vehicle with 165/80R14 85T tyre)

55T090680

To avoid uneven wear of your tyres and to prolong their life, rotate the tyres as illustrated. Tyres should be rotated every 10000 km. After rotation, adjust front and rear tyre pressures to the specification listed on your vehicle's Tyre Information Label.

### Wheel Balancing

If the vehicle vibrates abnormally on smooth road, have the wheel balanced at a MARUTI SUZUKI authorized workshop.

### Wheel Alignment

In case of abnormal tyre wear or pulling towards one side, have the wheel aligned at a MARUTI SUZUKI authorized workshop.

### Tubeless Tyres

The vehicle is equipped with Tubeless Tyres. In tubeless tyre, a thin layer of butyl rubber is used for lining the inside of the tubeless tyre. This layer is to prevent air loss and fulfilling the purpose of tube. The air pressure is maintained by the sealing between tyre bead and wheel rim. Tubeless tyres are having advantage of slow air loss and preventing sudden deflation while driving.

### Care and maintenance tips for tubeless tyres

- 1) Always maintain recommended inflation pressure. Driving continuously at low inflation pressure can lead to tyre damage.
- 2) In case any leakage is found, check for any nail penetration/valve core damage or rim bent. Damaged wheel must not be used.
- 3) In case tyre has run at low pressure, it must be inspected for any defect.
- 4) Whenever new tyre is fitted, replace the valve.
- 5) If continuous high speed driving is required, increase tyres pressure by 5 psi over recommended inflation pressure.
- 6) Never run the tyre beyond TWI (Tread wear indicator). The tyre is recommended to be replaced when the remaining tread has worn to this point. The indicators are spaced across the tread around the tyre marked by a triangular symbol (TWI).
- 7) Always prefer tubeless tyre mounting machine. In case of manual mounting-tyre/wheel rim damage may occur.
- 8) In case of any problem, please get in touch with a MARUTI SUZUKI authorized workshop.

## Battery

### ⚠ WARNING

- Batteries produce flammable hydrogen gas. Keep flames and sparks away from the battery or an explosion may occur. Never smoke when working near the battery.
- When checking or servicing the battery, disconnect the negative cable. Be careful not to cause a short circuit by allowing metal objects to contact the battery posts and the vehicle at the same time.
- To avoid harm to yourself or damage to your vehicle or battery, follow the “Jump-starting instructions” in “EMERGENCY SERVICE” section if it is necessary to jump-start your vehicle.
- Diluted sulfuric acid spilled from battery can cause blindness or severe burns. Use proper eye protection and gloves. Flush eyes or body with ample water and get medical care immediately if suffered. Keep batteries out of reach of children.

59RN09430

For maintenance-free battery (cap-less type), you need not add water. For traditional type battery, which has water filler caps, the level of the battery solution must be kept between the upper level line “MAX” (1) and the lower level line “MIN” (2) at all times. If the level is found to be below the lower level line (2), add distilled water to the upper level line (1). You should periodically check the battery, battery terminals, and battery hold-down bracket for corrosion. Remove corrosion using a stiff brush and ammonia mixed with water, or baking soda mixed with water. After removing corrosion, rinse with clean water.

If your vehicle is not going to be driven for a month or longer, disconnect the cable from the negative terminal of the battery to help prevent discharge.

### ⚠ WARNING

If the battery is used with battery level being less than the lower level line “MIN” (2), it may cause reduced battery life, an exothermic heat, or an explosion by hydrogen gas occurring from the battery. Do not use the battery with battery level being less than the lower level line “MIN” (2).

### NOTICE

- If the battery liquid is added more than the upper level line “MAX” (1), liquid may leak by vibrations during driving or liquid may spray out in some case depending on the condition of battery charging. These may cause damage to the parts near the battery. If the battery liquid overflows, immediately wash away with water. Do not add the battery liquid more than the upper level line “MAX” (1).

(Continued)

### NOTICE

(Continued)

- If your vehicle is equipped with the ENG A-STOP system and the battery which is exclusive for the ENG A-STOP system is used, only use the specified type of battery for ENG A-STOP system. Refer to “Specifications” in “SPECIFICATIONS” section for details. Otherwise, you could damage your vehicle, and the ENG A-STOP system could not be available. If a vehicle battery has to be replaced, consult a MARUTI SUZUKI authorized workshop.

### NOTE:

The battery liquid is consumed when the battery is used. If the level is found to be less than the center of upper level “MAX” (1) and lower level “MIN” (2), add distilled water till it reaches the upper level line “MAX” (1).

### Replacement of the battery

55UM09020

To remove the battery:

- 1) Disconnect the negative cable (1).
- 2) Disconnect the positive cable (2).
- 3) Remove the clips(3)(if equipped).
- 4) Remove the protector(4)(if equipped).
- 5) Remove the retainer nuts (5) and remove the retainer (6).

To install the battery:

- 1) Install the battery in the reverse order of removal.
- 2) Tighten the bracket bolt and battery cables securely.

### NOTE:

- When the battery is disconnected, some of the vehicle's functions will be initialized and/or deactivated. These functions must be required to reset after the battery is reconnected.
- Do not disconnect the battery terminals for at least one minute after the ignition switch is turned to “LOCK” position.

### ⚠ WARNING

Batteries contain toxic substances including sulfuric acid and lead. They could have potential negative consequences for the environment and human health. Used batteries must be disposed of or recycled according to applicable rules or regulations and must not be disposed of with ordinary household trash. Make sure not to tip over the battery when you remove it from the vehicle. Otherwise, sulfuric acid could run out and you might get injury.

**NOTICE**

After stopping the engine, controller and system are operated for a while. Therefore, before removing the battery, wait for more than one minute after turning the ignition switch to "LOCK" position.

(Battery label)

51KM042

- (5) Crossed-out wheeled bin symbol
- (6) Chemical symbol of "Pb"

The crossed-out wheeled bin symbol (5) located on the battery label indicates that the used battery should be collected separately from ordinary household trash. The chemical symbol of "Pb" (6) indicates the battery contains more than 0.004% lead.

By ensuring the used battery is disposed of or recycled correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate trash handling of the battery. The recycling of materials will help to conserve natural resources. For more detailed information about disposing of or recycling the used battery, consult a MARUTI SUZUKI authorized workshop.

**Fuses**

Your vehicle has three types of fuses, as described below:

**Main fuse**

The main fuse takes current directly from the lead-acid battery.

**Primary fuses**

These fuses are between the main fuse and individual fuses, and are for electrical load groups.

**Individual fuses**

These fuses are for individual electrical circuits.

To remove a fuse, use the fuse puller provided in the fuse box cover.

55T090640

- (1) Fuse puller
- (2) Spare fuse

## INSPECTION AND MAINTENANCE

69T090460

### ⚠ WARNING

- If the main fuse blows, have your vehicle inspected by a MARUTI SUZUKI authorized workshop.
- Always replace a blown fuse with a fuse of the same amperage and the same size which is equipped with your vehicle. Never use other objects than specified above to replace a blown fuse. Otherwise, wiring may burn out and it may cause a fire.
- If you replace a fuse and the new one blows in a short period of time, you may have a major electrical problem. Have your vehicle inspected immediately by a MARUTI SUZUKI authorized workshop.

### Fuses in engine compartment

70TH09011

- (1) Main fuse box
- (2) Relay box
- (3) Sub relay box

### Main fuse box

(44)	15 A	Headlight (Right)
(45)	25 A	Headlight high
(46)	–	Blank
(47)	–	Blank

The main fuse, primary fuses and some of the individual fuses are located in the engine compartment. If the main fuse blows, no electrical component will function. If a primary fuse blows, no electrical component in the corresponding load group will function. When replacing the main fuse, a primary fuse or an individual fuse, use a genuine MARUTI SUZUKI replacement parts or equivalent for individual fuses.

To remove a fuse, use the fuse puller provided in the fuse box. The amperage of each fuse is shown in the back of the fuse box cover.

### Headlight aiming

Since special procedures are required, ask a MARUTI SUZUKI authorized workshop for this job.

**Bulb replacement**

**NOTE:**  
 If it seems to be difficult to perform bulb replacement, consult a **MARUTI SUZUKI** authorized workshop.

No.	ITEM: Lights	WATT-AGE	BULB No.	
(1)	Headlight	12V55W	HIR2	
(2)	Position light	12V5W	W5W	
(3)	Turn signal light	12V 21W	Front	WY21W
(4)			Rear	PY21W
(5)	Side turn signal light	12V 5W	WY5W	
(6)	Brake light* <sup>1</sup>	LED	–	
(7)	Tail light* <sup>1</sup>	LED	–	
(8)	High mount stop light* <sup>1</sup>	LED	–	
(9)	Reversing light	12V16W	W16W	
(10)	License plate light	12V5W	W5W	

If you need to replace the following bulbs indicated in the above table, consult a **MARUTI SUZUKI** authorized workshop.

\*1: Since the lights are non-disassemble type, you cannot replace a bulb. Replace the target assembly if any bulb is defective.

55UM09029

## INSPECTION AND MAINTENANCE

---

### CAUTION

- Light bulbs can be hot enough to burn your finger right after turning off lights. This is true especially for halogen headlight bulbs. Replace the bulbs after they become cool enough.
- The headlight bulbs are filled with pressurized halogen gas. They can burst and injure you if they are hit or dropped. Handle them carefully.
- To avoid injury by sharp-edged parts of the body, wear gloves and a long-sleeved shirt when replacing light bulbs.

### NOTICE

- The oils from your skin may cause a halogen bulb to overheat and burst when the lights are on. Grasp a new bulb with a clean cloth.
- Frequent bulb replacement indicates the need for an inspection of the electrical system. This should be carried out by a MARUTI SUZUKI authorized workshop.
- During bulb replacement always use same bulb number as used in vehicle which is imprinted on the said bulb/unit and/or mentioned in this section.

### NOTE:

*The inner surface of lens such as the headlights or the rear combination lights may be clouded or dew condensation may occur by driving on a rainy day or washing the vehicle. This is a temporary phenomenon caused by temperature difference between the inside and the outside of the lights. (This is the same phenomenon as the windows are clouded on a rainy day.) Also, it sometimes seems that water gets into the lights because of waterdrop on the edge of the lens. This is a temporary phenomenon caused by water adherence to the outside of the lights.*

*The above-mentioned phenomena are not vehicle malfunction.*

*However, if water is piled up in the lights or large waterdrop adheres to the inner surface of lens, have your vehicle inspected by a MARUTI SUZUKI authorized workshop.*

### Non-disassembled type lights

Since the lights shown below are non-disassemble type, you cannot replace a bulb. Replace the target assembly if any bulb is defective.

If you need to replace the assembly, ask a MARUTI SUZUKI authorized workshop.

- Tail/brake light (LED type)
- High mount stop light

**Headlights**

55UM09009

(1) Headlight (high/low beam)

55UM09001

Disconnect the coupler (2) by pushing the lock release. Turn the bulb (3) counter-clockwise and remove it. Install a new bulb in the reverse order of removal.

**Side turn signal light**

**Fender type (if equipped)**

68PM00736

1) Remove the light housing (1) by sliding to left with your finger.

## INSPECTION AND MAINTENANCE

68PM00717

- 2) Turn the bulb holder (2) clockwise and pull it out from the light housing.

68PM00718

- (4) Removal  
(5) Install
- 3) To remove and install the bulb of the side turn signal light (3), simply pull out or push in the bulb.

### Front position light

55UM09011

- (1) Front position light

### Front turn signal light

55UM09034

- 1) Open the engine hood. To remove the bulb holder of the front position light from the light housing, turn the holder counterclockwise and pull it out.

70TH09030

- (2) Removal  
(3) Installation
- 2) To remove and install the bulb of the front position light (1), simply pull out or push in the bulb.

55UM09010

- (1) Front turn signal light

- 1) Start the engine. Turn the steering wheel to the opposite side of the front turn signal light to be replaced to be replaced the bulb easily. Then turn off the engine.

## INSPECTION AND MAINTENANCE

- 2) Remove the clip (3) and screw (4). For removing the clip, use a flat blade screwdriver as show in the illustration.

- 3) Open the end of the front bumper (5) in arrow direction.

- 4) To remove the bulb holder (6) of the front turn signal light from the light housing, turn the holder counterclockwise and pull it out.

Rear combination light

For LED tail / brake light, it is recommended that you take your vehicle to a MARUTI SUZUKI authorized workshop for light replacement since special procedures are required.

55UM09035

70TH09037

- (7) Removal
- (8) Installation

5) To remove the bulb of the front turn signal light (2) from the bulb holder, push in the bulb and turn it counterclockwise. To install a new bulb, push it in and turn it clockwise.

**NOTE:**  
When reinstalling the front bumper (5), push the end of the cover (9) into the inside of the front bumper, and then install the front bumper in numerical order by pushing in the arrow direction as shown in the illustration.

55UM09013

1) With the trunk opened, remove the bolts (1).

## INSPECTION AND MAINTENANCE

2) Remove the light housing (2) by pulling it straight back.

3) To remove the bulb holder of the reversing light (3) or the rear turn signal light (4) from the light housing, turn the holder counterclockwise and pull it out.

(5) Removal  
(6) Installation

4) To remove and install the bulb of the reversing light (3) or the rear turn signal light (4), simply pull out or push in the bulb.

55UM09016

**NOTE:**  
When reinstalling the light housing, check that the clips are properly attached.

**License plate light**

56RH00719

- 1) Open the trunk lid. Turn the bulb holder of the license light (1) counterclockwise and remove it.

70TH09022

- (3) Removal
  - (4) Installation
- 2) To remove and install the bulb of the license plate light (2), simply pull out or push in the bulb.

**High mount stop light**

Since special procedures are required, it is recommended that you take your vehicle to a MARUTI SUZUKI authorized workshop for light replacement.

## INSPECTION AND MAINTENANCE

### Interior light

ITEM: Lights	WATTAGE	BULB No.
Front Room Lamp (if equipped)	12V 10W	—
Center Room Lamp	12V 10W	—
Trunk lid light (if equipped)	12V 5W	—

If you need to replace the following bulbs indicated in the above table, consult a MARUTI SUZUKI authorized workshop.

### Front Room Lamp (if equipped)

70TH09023

- 1) To prevent scratches, insert a commercially available flat-blade screwdriver covered with a soft cloth into the notch (1), and then remove the lens (2).

55UM09022

- (3) Removal
- (4) Installation

- 2) Pull the bulb out and then insert a new one.
- 3) After replacing the bulb, install the front room lamp lens in the reverse order of removal.

### Center Room Lamp

55UM09021

- 1) To prevent scratches, insert a commercially available flat-blade screwdriver covered with a soft cloth into the notch (1), and then remove the lens (2).

55UM09022

- (3) Removal
  - (4) Installation
- 2) Pull the bulb out and then insert a new one.
  - 3) After replacing the bulb, install the Center lamp lens in the reverse order of removal.

Trunk lid light (if equipped)

55UM09019

- 1) Open the trunk lid and remove the lens by turning it counterclockwise.
- 2) To remove and install the bulb of trunk lid, simply pull out or push in the bulb.

After replacement of bulb, perform the operation 1) in reverse order to restore to original state.

Wiper blades

59RN09450

If the wiper blades become brittle or damaged, or make streaks when wiping, replace the wiper blades.

To install new wiper blades, follow the procedures below.

**NOTICE**

**To avoid scratching or breaking the window, do not let the wiper arm strike the window while replacing the wiper blade.**

**NOTE:**

*Some wiper blades may be different from the ones described here depending on vehicle specifications. If so, consult a MARUTI SUZUKI authorized workshop for proper replacement method.*

## INSPECTION AND MAINTENANCE

### For windshield wipers

55UM09032

- 1) Hold the wiper arm away from the window.

59RN09240

- 2) Squeeze lock (1) towards wiper arm (2) and remove the wiper frame from the arm as shown.

59RN09250

- 3) Unlock the lock end of the wiper blade and slide the blade out as shown.

59RN09260

- (3) Retainer

- 4) If the new blade is provided without the two metal retainers, move them from the old blade to the new one.

59RN09270

- (A) Up  
(B) Down

**NOTE:**  
When you install the metal retainers (3), make sure the direction of metal retainers as shown in the above illustration.

55T090710

(4) Locked end

- 5) Install the new blade in the reverse order of removal, with the locked end positioned toward the wiper arm. Make sure the blade is properly retained by all the hooks. Lock the blade end into place.
- 6) Reinstall wiper frame to arm, making sure that the lock lever is snapped securely into the arm.

**NOTICE**

Fit the stopper side (5) of the wiper blade rubber in the driver's seat side. Otherwise, the wiper blade rubber may be misaligned while the wiper operates.

**Windshield washer fluid**

70TH09026

Check that there is washer fluid in the tank. Refill it if necessary. Use a good quality windshield washer fluid, diluted with water as necessary.

**⚠ WARNING**

- Do not use radiator antifreeze in the windshield washer reservoir. This can severely impair visibility when sprayed on the windshield, and also can damage your vehicle's paint.
- Do not add washer fluid when the engine is hot or operating as washer fluid contains alcohol and may catch fire if spilled on the engine, etc.

**NOTICE**

- Damage may result if the washer motor is operated with no fluid in the washer tank.
- Avoid use of hard water to prevent building of lime scale on the vehicle.

## INSPECTION AND MAINTENANCE

### Air conditioning system

If you do not use the air conditioner for a long period, such as during winter, it may not give the best performance when you start using it again. To help maintain optimum performance and durability of your air conditioner, it needs to be run periodically. Operate the air conditioner at least once a month for one minute with the engine idling. This circulates the refrigerant and oil and helps protect the internal components.

70TH09027

- 1) To approach the air conditioner filter, remove the glove box by pressing both sides of the glove box inward and pulling it out.

### Air conditioner filter replacement

Since special procedures are required, ask a MARUTI SUZUKI authorized workshop for this job.

69T090380

- 2) Push the tabs on both sides of the holder (1) in the direction of the arrow to remove the filter (2).

**Installing the Air conditioner filter**

69T090440

- 1) Insert the filter with the arrow of the mounting direction mark (3) facing upward.
- 2) Attach the holder (1) by hooking the tabs on both sides to the case side.

**Keyless entry system transmitter battery replacement**

If the transmitter becomes unusable, replace the battery.

*NOTE:*  
You may damage the transmitter when replacing its battery. Asking a MARUTI SUZUKI authorized workshop is recommended.

To replace the battery of the transmitter:

73S020030

- 1) Remove the screw (1), and open the transmitter cover (2).
- 2) Remove the transmitter (3) from the transmitter holder (4).

73S020010

(6) Lithium disc type battery:  
CR1616

- 3) Separate the case up and down while applying force to the slot (5) on the side of the transmitter (3).
- 4) Replace the battery (6) so its + terminal faces “+” mark of the transmitter.
- 5) Close the case and install it into the transmitter holder (4).
- 6) Close the transmitter cover (2), install and tighten the screw (1).
- 7) Check that the door locks can be operated with the transmitter.
- 8) Dispose of the used battery properly according to applicable rules or regulations. Do not dispose of lithium batteries with ordinary household trash.

## INSPECTION AND MAINTENANCE

### ⚠ WARNING

Swallowing a lithium battery may cause serious internal injury. Do not allow anyone to swallow a lithium battery. Keep lithium batteries away from children and pets. If swallowed, contact a physician immediately.

### NOTICE

- The transmitter is a sensitive electronic instrument. To avoid damaging it, do not expose it to dust or moisture or tamper with internal parts.
- When replacing the battery by yourself, the transmitter controller could be damaged affected by static electricity. Discharge the static electricity built up in your body by touching metal before replacing the battery.

### NOTE:

*Used batteries must be disposed of properly according to applicable rules or regulations and must not be disposed of with ordinary household trash.*

(1) Crossed-out wheeled bin symbol

The crossed-out wheeled bin symbol (1) indicates that a used battery should be collected separately from ordinary household trash.

By ensuring the used battery is disposed of or recycled correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate battery disposal. The recycling of materials will help to conserve natural resources. For more detailed information about disposing of or recycling of the used battery, consult a MARUTI SUZUKI authorized workshop.

Be careful not to lose your key and to leave it in the locked vehicle.

### ⚠ WARNING

When you take the transmitter in an airplane, do not press the lock button or the unlock button. When you put the transmitter in a bag, place it so that either of these buttons is not pressed easily. If either of these buttons is pressed, radio wave may interfere with operation of the airplane.

\*The transmitter is an electronic device which has a restriction on its use in the airplane.

### Preparation before winter season

#### Windshield washer fluid

To prevent windshield washer fluid from freezing, dilute it by the ratio according to outside temperature.

#### Lead-acid battery

Check the liquid measure and the specific gravity of lead-acid battery. When it becomes cold, the battery performance gets worse. Also, it becomes difficult to start the engine by the weak battery. Refer to "Battery" in this section.

#### Engine coolant

To prevent the inside of engine from corroding and freezing, use the designated engine coolant. Refer to "Specifications" in "SPECIFICATIONS" section.

#### NOTE:

To check the concentration of engine coolant or replace it, ask a MARUTI SUZUKI authorized workshop.

### Winter tyres and chocks

- (1) Winter tyre
- (2) Chock

Winter tyres and chocks are necessary to drive on the snow roads or the frozen roads.

### Before your driving

#### Snow on the roof

Remove snow on the roof before your driving. If you do not remove it, snow may fall during your driving and it may hinder your view.

## INSPECTION AND MAINTENANCE

### Frozen wiper blades

65P60060

Melt ice by pouring lukewarm water. After melting it, wipe off water to prevent refreezing. If you operate the wiper blades forcedly when ice stays freezing, the wiper rubbers may be damaged and the wiper blades may be broken.

### Snow and frost on the window glasses

82K261

Use the plastic board (1). You can remove snow and frost not to damage the window glasses.

### Frozen outside rearview mirrors

65P60070

Melt ice by pouring lukewarm water. After melting it, wipe off water to prevent refreezing. If you operate the outside rearview mirrors forcedly when ice stays freezing, the outside rearview mirrors may be broken.

### NOTICE

- For the outside rearview mirror folding switch, check if you can move the mirrors by your hands first. Then, operate the switch. If you repeat to operate the switch when ice stays freezing, the mirrors may be broken.
- For the remote folding mirrors, deactivate the function of the remote folding mirrors in the cold condition where the outside rearview mirrors are frozen. If you repeat to operate them when ice stays freezing, the mirrors may be broken.

### Frozen doors

65P60080

Pour lukewarm water except the keyhole on the door. After opening the door, wipe off water. If you open the door forcibly when ice stays freezing, the rubbers around the door may be come off and broken.

### Snow attaching to shoes

80J312

Remove snow attaching to shoes before getting in your vehicle. If you do not remove it, you may slip when operating the pedals and the window glasses may mist easily because of high humidity inside the vehicle.

## INSPECTION AND MAINTENANCE

---

### When parking the vehicle outside

80J315

#### **NOTICE**

- If you park the vehicle under eaves or trees, the roof of the vehicle may be dented by accumulated snow or fallen snow. When it is snowing, do not park the vehicle under eaves or trees.
- If you park the vehicle outside when it is snowing, the wiper arms may be deformed or the wiper blades may be frozen on the windshield by snow weight. Raise the wiper arms away from the windshield when parking the vehicle.
- When raising both of the front wiper arms, pull the driver's side wiper arm up first. When returning the wiper arms, lower the passenger's side wiper arm first. Otherwise, the wiper arms may interfere with each other.

## EMERGENCY SERVICE

### Towing by tow truck

If you need to have your vehicle towed, contact a professional service. A MARUTI SUZUKI authorized workshop can provide you with detailed towing instructions.

#### **NOTICE**

**To help avoid damage to your vehicle during towing, proper equipment and towing procedures must be used.**

### 2-wheel drive (2WD) manual transmission or Auto Gear Shift

Manual transmission vehicles or Auto Gear Shift may be towed using either of the following methods.

- Being towed from the front:  
Lift the front wheels and keep the rear wheels on the ground. Before the vehicle is towed, make sure that the parking brake is released.
- Being towed from the rear:  
Lifted and the front wheels on the ground, provided the steering and drive-train are in operational condition. Before towing, check that transmission is in neutral, the steering wheel is unlocked (vehicle without keyless push start system - the ignition key should be in "ACC" position) (vehicle with keyless push start system - the ignition mode is ACC), and the steering wheel is secured with a clamping device designed for towing service.

67T00160

#### **NOTICE**

- **The steering column is not strong enough to withstand shocks transmitted from the front wheels during towing. Always unlock the steering wheel before towing.**

## Towing by using towing eye

### Hanging point of a towing cable

Hang a towing cable on a towing eye. The towing eye is provided on the front of the vehicle for use in emergency situations or sea shipping purposes.

- 1) Remove the cover (1) by using a jack handle (2) covered with a soft cloth (3) as shown in the illustration.

#### **NOTICE**

**Do not apply excessive force as it may damage the cover strap.**

#### **NOTE:**

*We recommend that you fasten the cover with tape to prevent damage during towing.*

- 2) Install the towing eye (4) by hand.

- 3) To tighten the towing eye (4), turn it clockwise by using a wheel brace (5) until the towing eye (4) is securely installed.

#### **NOTICE**

- Observe the following instructions when using the towing eye (4). Otherwise, the towing eye or the vehicle body may break and cause serious injury or damage:
  - Avoid pulling the vehicle to get out of severe snowy, muddy or sandy conditions.
  - Avoid sudden starts or erratic driver performance which could cause excessive stress on the towing eye.
- In such cases, we recommend that you contact a professional service.
- Do not use the towing eye (4) for towing another vehicle or transporting your vehicle by a car carrier trailer, etc.

## EMERGENCY SERVICE

55UM010002

### NOTICE

- Your vehicle was originally designed to carry people and a normal amount of cargo, not to tow a trailer.
- The frame hook (6) is provided on the rear of the vehicle for use in emergency situations and sea shipping purposes only. Do not use the frame hook for towing another vehicle, being towed by another vehicle or transporting your vehicle by a car carrier trailer, etc. Otherwise, the frame hook or the vehicle body may break and cause serious injury or damage.

### Towing by using a rope

- 1) Hang a towing cable on a towing eye horizontally, so that the hanging side would be the same for the towing vehicle and the towed vehicle if possible.
- 2) Keep the engine running.
  - When you cannot start the engine, turn the ignition switch to the position other than "LOCK" position.
  - Turn the steering wheel to left and right to check that the steering lock is released.

### ⚠ WARNING

**If you drive the vehicle without the engine running, it may cause an accident.**

**When your vehicle is towed by using a rope, observe the following instructions.**

- **Never turn the ignition key to "LOCK" position. Otherwise, the steering wheel will be locked and not be turned.**
- **Depress the brake pedal more firmly than usual, as the brake booster does not work.**
- **Operate the steering wheel with more force, as the power steering system does not work.**

### NOTICE

**If you cannot release the steering lock, you cannot operate the steering wheel and it may cause an accident. If you cannot release the steering lock because of malfunction and running out of the lead-acid battery, do not perform towing by using a rope.**

- 3) Shift the gearshift lever into "N".

#### NOTE:

*If you cannot shift the gearshift lever into "N", towing by using a towing cable is not possible. Consult a MARUTI SUZUKI authorized workshop or a professional service.*

- 4) During towing, make sure that a towing cable is not slack. To avoid a collision, carefully drive your vehicle checking the brake lights of the front vehicle.
  - To warn the driver of a following vehicle, turn on the hazard warning lights of the towed vehicle.

**⚠ WARNING**

If you continuously depress the brake pedal on a long or steep downhill slope, the brakes could overheat and become ineffective. When there is a long or steep downhill slope, do not perform towing by a rope. Make a request of a tow truck.

**NOTICE**

- If a strong impact is applied to a towing eye or a towing cable by sudden starting etc., the towing eye or the vehicle body may be damaged. When the vehicle needs to be towed, do not apply a strong impact to a towing eye or a towing cable by sudden starting etc. Do not accelerate suddenly.
- If the vehicle unavoidably needs to be towed by a rope, tow your vehicle on paved roads. Do not exceed the vehicle speed of 30 km/h and do not drive the vehicle for longer than 30 km to protect the transmission.

**Tyre changing tool**

70TH10005

- (1) Jack
- (2) Jack handle
- (3) Wheel wrench

The tyre changing tools are stowed in the luggage compartment. Refer to "Luggage compartment" in "QUICK GUIDE" section.

Pull the thread of the luggage compartment board upwards. The luggage compartment board can be held open by hanging the thread on the hook as shown in the below illustration.

56RH00805

To remove the jack (1), turn its shaft counterclockwise by using jack handle (3) and pull the jack out of the storage bracket.

## EMERGENCY SERVICE

56RH00809

To stow the jack (1), place it in the storage bracket (4) and turn the shaft clockwise with hand.

56RH00807

After temporarily holding the jack (1) until it contacts the storage bracket (4), turn the shaft (5) approximately 90° to 180° by using jack handle (3) to securely hold the jack in place.

### 10-5

#### NOTE:

If you are difficult to use the jack handle (2), use jack handle and wheel wrench (3) as shown in the illustration.

#### ⚠ WARNING

After using the tyre changing tools, stow them securely or they can cause injury if an accident occurs.

#### ⚠ CAUTION

The jack should be used only to change wheels. It is important to read the jacking instructions in this section before attempting to use the jack.

#### NOTICE

To avoid damaging the storage bracket, do not expand the jack excessively.

68PM20801

To remove the spare tyre, turn its bolt (4) counterclockwise and remove it.

#### NOTICE

Make sure that the spare tyre is fixed securely on the floor. Loosely fixed tyre may cause noise during driving and damage paint on vehicle body.

## Jacking instructions

- 1) Place the vehicle on level, hard ground.
- 2) Set the parking brake firmly and shift into "R" (Reverse).

**⚠ WARNING**

- Shift into "R" (Reverse) when you jack up the vehicle.
- Never jack up the vehicle with the transmission in "N" (Neutral). Otherwise, unstable jack may cause an accident.

59RN10010

59RN10120

- 3) Turn on the hazard warning switch if your vehicle is near traffic.

- 4) Block the front and rear of the wheel diagonally opposite to the wheel being lifted.
- 5) Place the spare tyre near the wheel being lifted as shown in the illustration in case the jack slips.

59R80200

- 6) Position the jack at an angle as shown in the illustration and raise the jack by turning the jack handle clockwise until the jack-head groove fits around the jacking bar boss (1) beneath the vehicle body.

## EMERGENCY SERVICE

70TH10011

7) Continue to raise the jack slowly and smoothly until the tyre clears the ground. Do not raise the vehicle more than necessary.

### WARNING

- Use the jack only to change wheels on level, hard ground.
- Never jack up the vehicle on an inclined surface.
- Never raise the vehicle with the jack in a location other than between the frame bosses near the wheel to be changed.
- Make sure that the jack is raised at least 25 mm before it contacts the boss. Use of the jack when it is within 25 mm of being fully collapsed may result in failure of the jack.
- Do not use wooden blocks or similar objects as a jack underlay.
- No person should place any portion of their body under a vehicle that is supported by a jack. Never place your hands or feet under the raised vehicle when it is supported by a jack.
- Never run the engine when the vehicle is supported by the jack. If there are passengers or heavy luggage, get them out of the vehicle.

### Raising vehicle with garage jack

- Apply the garage jack to one of the points indicated below.
- Always support the raised vehicle with jack stands (commercially available) at the points indicated below.

- (1) Front
- (2) Rear
- (3) Jack stand
- (4) Garage jack
- (5) Jacking point for garage jack

**⚠ WARNING**

As the vehicle may get damaged or an accident may occur, observe the following points.

- Observe the designated points shown in the illustration.
- When holding the lifted vehicle, use the jack stand.
- When jacking up the front side or the rear side only, put a chock (commercially available) on front and back of the grounded tyre.

55UM010001

## EMERGENCY SERVICE

70TH10009

- (a) Specified position of jack stand for the front side
- (b) Specified position of jack stand for the rear side

### NOTICE

If you use the jack stand (2) in the condition that it touches the side skirt (6), the side skirt may be broken or damaged. When using the jack stand, make sure that it does not touch the side skirt.

### NOTE:

For more details, consult a MARUTI SUZUKI authorized workshop.

## Changing wheels

### ⚠ WARNING

Never change a wheel in traffic lane. Always move the vehicle off the road on level, hard ground away from traffic for changing a wheel. For any further assistance contact your nearest Maruti Suzuki authorized workshop.

To change a wheel, use the following procedure:

- 1) Prepare the jack and tools.
- 2) Loosen, but do not remove the wheel nuts.
- 3) Jack up the vehicle (follow the jacking instructions in this section).

### ⚠ WARNING

- Shift into "R" (Reverse) when you jack up the vehicle.
- Never jack up the vehicle with the transmission in "N" (Neutral). Otherwise, unstable jack may cause an accident.

### ⚠ CAUTION

Immediately after the vehicle has been driven, the wheels, the wheel nuts and the area around the brakes might be extremely hot. Touching these areas may cause burn injury. Do not touch these areas, immediately after the vehicle has been driven.

- 4) Remove the wheel nuts and wheel.

84S08170

- 5) Clean any mud or dirt off from the surface of the wheel (1), hub (2), thread part (3) and surface of the wheel nuts (4) with a clean cloth. Clean the hub carefully; it may be hot from driving.
- 6) Install the new wheel and replace the wheel nuts with their cone shaped end facing the wheel. Tighten each nut snugly by hand until the wheel is securely seated on the hub.

**Tightening torque for wheel nuts  
100 Nm (10.2 kg-m)**

- 7) Lower the jack and fully tighten the nuts with a wrench in numerical order as shown in the illustration.

**⚠ WARNING**

Use genuine wheel nuts and tighten them to the specified torque as soon as possible after changing wheels. Incorrect wheel nuts or improperly tightened wheel nuts may come loose or fall off, which can result in an accident. If you do not have a torque wrench, have the wheel nut torque checked by a MARUTI SUZUKI authorized workshop.

Return the spare tyre back into the luggage compartment in the reverse order of removal and tighten its bolt (1) clockwise as shown in the above illustration.

**NOTICE**

Make sure that the spare tyre is fixed securely on the floor. Loosely fixed tyre may cause noise during driving and damage paint on vehicle body.

**Full wheel cover (if equipped)**

(1) or (2) Flat end tool

Your vehicle includes two tools, a wheel wrench and a jack crank, one of which has a flat end.

Use the tool with the flat end with soft cloth (3) to remove the full wheel cover, as shown above.

When installing the cover, make sure that it is positioned so that it does not cover or foul the air valve.

### Jump-starting instructions

#### **▲ WARNING**

- Never attempt to jump-start your vehicle if the lead-acid battery appears to be frozen. Batteries in this condition may explode.
- When making jump lead connections, check that your hands and the jump leads remain clear from pulleys, belts or fans.
- Lead-acid batteries produce flammable hydrogen gas. Keep flames and sparks away from the battery or an explosion may occur. Never smoke when working near the battery.
- If the booster battery you use for jump-starting is installed in another vehicle, check that the two vehicles are not touching each other.
- If your lead-acid battery discharges repeatedly, for no apparent reason, have your vehicle inspected by a MARUTI SUZUKI authorized workshop.
- To avoid harm to yourself or damage to your vehicle or battery, follow the jump-starting instructions below.  
If you are in doubt, call for qualified road service.

#### **NOTICE**

Your vehicle should not be started by pushing or towing. This starting method could result in permanent damage to the catalytic converter. Use jump leads to start a vehicle with a weak or flat battery.

- 1) Use only a 12-volt lead-acid battery to jump-start your vehicle. Position the good 12-volt lead-acid battery close to your vehicle so that the jump leads will reach both batteries. When using a battery installed on another vehicle, check that two vehicles do not touch each other. Set the parking brakes fully on both vehicles.
- 2) Turn off all vehicle accessories, except those necessary for safety reasons (for example, headlights or hazard lights).

70TH10010

- 3) Connect jump leads as follows:

1. Connect one end of the first jump lead to the positive (+) terminal of the discharged battery (1). Below process needs to follow for jumper cable connection at positive(+) terminal of discharged battery(1).

55UM09028

**NOTE:**

*Removing the complete fuse cover is not recommended.*

2. Connect the other end to the positive (+) terminal of the booster battery (2).
3. Connect one end of the second jump lead to the negative (-) terminal of the booster battery (2).
4. Make the final connection to an unpainted, heavy metal part (i.e. engine mount bolt (3)) of engine cylinder head in the vehicle with the discharged battery (1).

**⚠ CAUTION**

**Connect the jump lead to the engine mount bolt securely. If the jump lead disconnects from the engine mount bolt because of vibration at the start of the engine, the jump lead could be caught in the drive belts.**

- 4) If the booster battery you are using is fitted to another vehicle, start the engine of the vehicle with the booster battery. Run the engine at moderate speed.
- 5) Start the engine of the vehicle with the discharged battery.
- 6) Remove the jump leads in the exact reverse order in which you connected them.

**Running out of battery**

In the following cases, the lead-acid battery is running out.

- The starter does not engage when attempting to turn on the engine. Or, the starter rotation is too weak to make the engine start.
- The headlight illumination is extremely low or the horn volume is low.

**⚠ WARNING**

**Never connect the jump lead directly to the negative (-) terminal of the discharged battery, or an explosion may occur.**

### If you get a flat tyre while driving

Firmly hold the steering wheel and carefully apply the brakes to slow down the vehicle and stop it in a safe place.

### Engine trouble: Starter does not operate

- 1) Try turning the ignition switch to "START" position with the headlights turned on to determine the lead-acid battery condition. If the headlights go excessively dim or go off, it usually means that either the lead-acid battery is discharged or the battery terminal contact is poor. Recharge the lead-acid battery or correct battery terminal contact as necessary.
- 2) If the headlights remain bright, check the fuses. If the reason for failure of the starter is not obvious, there may be a major electrical problem. Have the vehicle inspected by a MARUTI SUZUKI authorized workshop.

### Engine trouble: Does not start

Make sure that your vehicle has enough fuel and battery.

If the engine does not start under very cold condition, press the accelerator pedal all the way to the floor and hold it while cranking the engine.

Refer to "Starting / stopping engine (vehicle without keyless push start system) (if equipped)" or "Starting / stopping engine (vehicle with keyless push start system) (if equipped)" in "OPERATING YOUR VEHICLE" section.

If the engine still does not start have your vehicle inspected at a MARUTI SUZUKI authorized workshop.

- Do not operate the starter motor for more than 12 seconds.

#### NOTE:

*If the engine refuses to start, the starter motor automatically stops after a certain period of time. After the starter motor has automatically stopped or if there is anything abnormal in the engine starting system, the starter motor runs only while the ignition switch is turned to "START" position.*

## Engine trouble: Overheating

The engine could overheat temporarily under severe driving conditions. If the high engine coolant temperature warning light comes on as overheating or the engine coolant temperature gauge indicates overheating during driving:

- 1) Turn off the air conditioner.
- 2) Take the vehicle to a safe place and park.
- 3) Run the engine at a normal idle speed for a few minutes until the high engine coolant temperature warning light goes off or the indicator is within the normal, acceptable temperature range between "H" and "C".

### WARNING

If you see or hear escaping steam, stop the vehicle in a safe place and immediately turn off the engine to cool it. Do not open the hood when steam is present. When the steam can no longer be seen or heard, open the hood to see if the coolant is still boiling. If it is, you must wait until it stops boiling before you proceed.

If the high engine coolant temperature warning light does not go off or the temperature indication does not come down to within the normal, acceptable range:

- 1) Check the coolant level in the reservoir. If it is found to be lower than "LOW" line, check radiator, water pump, radiator hoses and heater hoses for leakage. If leakage that may cause overheating is found, do not run the engine until these problems have been corrected.
- 2) If leakage is not found, carefully add coolant to the reservoir and then the radiator, if necessary. Refer to "Engine coolant" in "INSPECTION AND MAINTENANCE" section.

### NOTE:

*If engine overheats and you are not sure what to do, contact a MARUTI SUZUKI authorized workshop.*

79J007

### WARNING

- It is hazardous to remove the radiator cap when the water temperature is high, because scalding fluid and steam may be blown out under pressure. The cap should only be taken off when the coolant temperature has lowered.
- To help prevent personal injury, keep hands, tools and clothing away from the engine cooling fan and air-conditioner fan. These electric fans can automatically turn on without warning.

## EMERGENCY SERVICE

### Warning triangle

55T100010

In case of vehicle break-down or during emergency stopping, where, your vehicle could become a potential traffic hazard, keep the warning triangle, provided with your vehicle, on the road free from any obstacles behind your vehicle so as to warn the approaching traffic, at an approximate distance of 50-100 m. The reflecting side of the triangle should face the oncoming traffic. Please activate the hazard warning lamps before alighting the vehicle to keep the warning triangle.

55T100020

- Remove the warning triangle carefully from the cover as shown by arrow (1).
- Open both the reflector arms as shown by arrow (2) and lock the arms with each other with the clip provided in the right arm. Open the bottom stand in counter clock-wise direction as shown by arrow (3). Position the warning triangle behind the vehicle on a plain surface.
- Reverse the removal procedure for keeping inside the cover.

55T100030

## APPEARANCE CARE

Corrosion prevention .....	11-1
Cleaning exterior .....	11-2
Cleaning interior .....	11-7

60G412

## APPEARANCE CARE

---

### Corrosion prevention

It is important to take good care of your vehicle to protect it from corrosion. Listed below are instructions for how to maintain your vehicle to prevent corrosion. Please read and follow these instructions carefully.

#### Important information about corrosion

##### Common causes of corrosion

- 1) Accumulation of road salt, dirt, moisture or chemicals in hard-to-reach areas of the vehicle underbody or frame.
- 2) Chipping, scratches and any damage to treated or painted metal surfaces resulting from minor accidents or abrasion by stones and gravel.
- 3) Any or all of the below mentioned points:
  - Continuous exposure to sunlight.
  - Hard water & sea water coming in contact with vehicle.
  - Foot rubbing (skirting).

##### Environmental conditions which accelerate corrosion

- 1) Road salt, dust control chemicals, sea breeze or industrial pollution will all accelerate the corrosion of metal.
- 2) High humidity will increase the rate of corrosion particularly when the temperature range is just above the freezing point.

- 3) Moisture in certain areas of a vehicle for an extended period of time may promote corrosion even when other body sections are completely dry.
- 4) High temperatures will cause an accelerated rate of corrosion to parts of the vehicle which are not well-ventilated to permit quick drying.

This information illustrates the necessity of keeping your vehicle (particularly the underbody) as clean and dry as possible. It is equally important to repair any damage to the paint or protective coatings as soon as possible.

#### How to help prevent corrosion

##### Wash your vehicle frequently

The best way to preserve the finish on your vehicle and to help avoid corrosion is to keep it clean with frequent washing. Wash your vehicle at least once during the winter and once immediately after the winter. Keep your vehicle, particularly the underside, as clean and dry as possible. If you frequently drive on salted roads, your vehicle should be washed at least once a month during the winter. If you live near the ocean, your vehicle should be washed at least once a month throughout the year.

For washing instructions, refer to "Cleaning exterior" in this section.

#### Remove foreign material deposits

Foreign materials such as salts, chemicals, road oil or tar, tree sap, bird droppings and industrial fall-out may damage the finish of your vehicle if it is left on painted surfaces. Remove these types of deposits as quickly as possible. If these deposits are difficult to wash off, an additional cleaner may be required. Check that any cleaner you use is not harmful to painted surfaces and is specifically intended for your purposes. Follow the manufacturer's directions when using these special cleaners.

#### Repair finish damage

Carefully examine your vehicle for damage to the painted surfaces. Should you find any chips or scratches in the paint, touch them up immediately to prevent corrosion from starting. If the chips or scratches have gone through to the bare metal, have a qualified body shop make the repair.

**Keep passenger and luggage compartments clean**

Moisture, dirt or mud can accumulate under the floor mats and may cause corrosion. Occasionally, check under these mats to ensure that this area is clean and dry. More frequent checks are necessary if the vehicle is used for off-road driving or in wet weather.

Certain cargos such as chemicals, fertilizers, cleaners, salts, etc. are extremely corrosive by nature. These products should be transported in sealed containers. If they are spilled or leaked, clean and dry the area immediately.

**Park your vehicle in a dry, well-ventilated area**

Park your vehicle to save it from continuous exposure to direct sunlight. Do not park your vehicle in a damp, poorly-ventilated area. If you often wash your vehicle in the garage and place it there in wet condition, your garage may be damp. The high humidity in the garage may cause or accelerate corrosion. A wet vehicle may corrode even in a heated garage if the ventilation is poor.

**⚠ WARNING**

**Do not apply additional undercoating or rust preventive coating on or around exhaust system components such as the catalytic converter and the exhaust pipes. It may catch a fire if the undercoating substance becomes overheated.**

**Cleaning exterior**

**⚠ WARNING**

**When cleaning the interior or exterior of the vehicle, do not use flammable solvents such as lacquer thinners, petrol and benzene. Also, do not use cleaning materials such as bleaches and strong household detergents. The materials could cause personal injury or damage to the vehicle.**

**For keeping the paintwork beautiful**

To keep your vehicle's beautiful appearance for a long term, daily care is important.

- For parking and storing the vehicle, we recommend garages with good ventilation and locations with roofs.
- The following situations may cause rusting and discoloration of the paint. Wash your vehicle promptly.
  - When driving in coastal areas or on roads sprayed with antifreeze agent (Wash the underside of the vehicle and around the wheel wells especially)
  - When bird droppings, dead insects, sap, iron dust, soot or smoke residue, coal tar, etc., adhere to the paint or when the vehicle gets wet with acid rain
  - When the vehicle is dirty with dust or mud

- Give the vehicle a wax about once a month or whenever the water-repelling ability of the painted surfaces has declined. Follow all instructions on the package of the wax (sold separately).

**NOTE:**

*Do not use wax on plastic parts that are not coated. Waxing these surfaces could result in a whitened or uneven appearance.*

80J302

- Chips from flying rocks, scratches, etc. can cause rust. Repair these areas as soon as possible.

## APPEARANCE CARE

### NOTICE

- When repairing scratches on painted surfaces, consult a MARUTI SUZUKI authorized workshop. Using an inappropriate material for repair could cause damage to the paint.
- It is important that your vehicle be kept clean and free from dirt. Failure to keep your vehicle clean may result in fading of the paint or corrosion to various parts of the vehicle body.

### Washing

#### WARNING

- Never attempt to wash and wax your vehicle with the engine running.
- When cleaning the underside of the body and fender, where there may be sharp-edged parts, wear gloves and a long-sleeved shirt to protect your hands and arms from being cut.
- After washing your vehicle, carefully test the brakes before driving to check that they have maintained their normal effectiveness.

### NOTICE

- If water contacts the engine compartment, it may cause the engine malfunction or the electrical components to fail. Do not apply water to the engine compartment when washing the vehicle.

84S09240

- When washing or waxing the vehicle, do not lean on the vehicle body or do not push it hard. This might cause it to deform.

(Continued)

### NOTICE

(Continued)

55T110010

- When washing or waxing the vehicle, do not put your foot on the door opening. This might cause it to damage.

**Washing by hand**

80J303

When washing the vehicle, park it in the place where direct sunlight does not fall on it as much as possible and follow the instructions below:

- 1) Flush the underside of body and wheel housings with pressurized water to remove mud and debris. Use plenty of water.

**NOTICE**

**When washing the vehicle:**

- Avoid directing steam or hot water of more than 80°C (176°F) on plastic parts.
- To avoid damaging engine components, do not use pressurized water in the engine compartment.

55T110011

- 2) Rinse the body to loosen the dirt. Remove dirt and mud from the body exterior with running water. You may use a soft sponge or brush. Do not use hard materials which can scratch the paint or plastic. Remember that the headlight covers or lenses are made of plastic in many cases.

**NOTICE**

**To avoid damage to the paint or plastic surface, do not wipe the dirt off without ample water. Follow the above procedure.**

- 3) Wash the entire exterior with a mild detergent or car wash soap using a sponge or soft cloth. The sponge or cloth should be frequently soaked in the soap solution.

**NOTICE**

**When using a commercial car wash product, observe the cautions specified by the manufacturer. Never use strong household detergents or soaps.**

- 4) Once the dirt has been completely removed, rinse off the detergent with running water.
- 5) Wipe off the vehicle body with a wet chamois or cloth and allow it to dry in the shade.
- 6) Check carefully for damage to painted surfaces. If there is any damage, touch up the damage following the procedure below:
  1. Clean all damaged spots and allow them to dry.
  2. Stir the paint and touch up the damaged spots lightly using a small brush.
  3. Allow the paint to dry completely.

## APPEARANCE CARE

---

### Washing by an automatic car wash

#### **NOTICE**

- If you use an automatic car wash, check that your vehicle's body parts, such as antenna and spoilers, cannot be damaged. If you are in doubt, consult the car wash operator for advice.
- Do not wash a car with a roof end spoiler in an automatic car wash. It may get caught in the car wash and damage the spoiler.

### Washing by a high-pressure cleaner

#### **NOTICE**

- If you use a high-pressure cleaner, keep away the nozzle from your vehicle sufficiently.
- Pointing the nozzle to the surrounding parts of camera can allow water to enter the camera. This may cause a fire, malfunction, dew condensation, etc.
  - For vehicle with 360 view camera or rearview camera, do not point to the nozzle to the camera.
  - Bringing the nozzle to your vehicle too close or pointing the nozzle to the opening of front grill or bumper etc. can cause damage and malfunction of the vehicle body and parts.
  - Pointing the nozzle to door glasses and door frames can allow water to enter the cabin.

### Caring for lights

Wash the lens part of light and wipe it off with a soft cloth.

#### **NOTICE**

- Do not use the detergent including organic solvent on the lens surface of the light. The lens surface may be cracked. If you use the detergent including organic solvent, rinse it off with ample water.
- Do not wipe the lens surface by wax or a hard brush. This may damage the lens or hasten its deterioration.

### Caring for the windshield

If an oil film, etc. adheres to the windshield and the windshield wipers cannot clean it, use a glass cleaner (sold separately) to clean the windshield by hand.

**Caring for cameras (if equipped)**

Wash the lens part of camera and wipe it off with a soft cloth. If the lens part is very dirty, use a mild detergent.

**NOTICE**

- Using alcohol, benzine, thinner etc. to wipe the camera may cause discoloration.  
When you wipe the camera, do not use alcohol, benzene, thinner etc.
- Hard coating is used for the lens of camera not to be easily scratched. However, if you use the brush for a vehicle, it may be difficult for you to see the image on the 360 view camera.  
Be very careful not to scratch the lens.
- The resin cover of the camera may be damaged if an organic solvent adheres to the camera.  
Do not let organic solvent, body wax, oil film remover, or glass coating agent adhere to the product.
- If the camera is subjected to a sudden temperature change, it may be damaged.  
Do not expose the camera to sudden temperature changes such as melting frozen snow with hot water.

**Caring for aluminum wheels (if equipped)**

**NOTE:**

- Do not use an acidic or alkaline detergent, or a cleaner containing petroleum solvent to wash aluminum wheels. These types of cleaners will cause permanent spots, discoloration and cracks on the finished surface and damage to the center cap.
- Do not use a bristle brush and a soap containing an abrasive material. These will damage the finished surface.

**Waxing**

60G412

After washing the vehicle, waxing and polishing are recommended to further protect and beautify the paint.

- Only use waxes and polishes of good quality.
- When using waxes and polishes, observe the precautions specified by the manufacturers.

## APPEARANCE CARE

### Cleaning interior

- Clean out any dirt, sand, etc. using a vacuum cleaner, or wipe off the surfaces using a soft cloth moistened with cold or lukewarm water. If the interior is left dirty, scratches can occur.
- Quickly clean off any liquids such as those from air fresheners or spilled beverages by using tissue paper or a soft cloth. Leaving spilled liquids can cause staining, discoloration or cracking.

#### WARNING

Do not spray the interior with water or other liquids. If the navigation equipment, audio components, switches, wiring under the floor, or other electrical parts become wet, there is a risk of fire or malfunction, and the SRS airbag system could fail to function normally. If you pour water or spill a drink in the vehicle, consult a MARUTI SUZUKI authorized workshop as soon as possible for inspection.

#### NOTICE

- **Do not use chemical products containing the following ingredients. Doing so may cause staining, discoloration, deformation, or a deterioration in strength, etc.**
  - Solvents such as benzine, gasoline, thinner, or sticker peeling agents
  - Acidic or alkaline detergents
  - Bleaches or dyes
- Do not use chemical products that include silicone for cleaning the areas around the air conditioner, electronic equipment such as the audio or navigation systems or switches. Contact with silicone may cause them to malfunction.
- Do not leave colored leather goods, furs, vinyl articles, etc. in your vehicle for long periods. Doing so could cause discoloration or deformation of the interior.

#### NOTE:

*To prevent liquid-based air fresheners from spilling, it is recommended to fix their containers in place, or use solid-type air fresheners instead.*

### Vinyl upholstery

Prepare a solution of soap or mild detergent dissolved in warm water. Apply the solution to the vinyl with a sponge or soft cloth and let it soak for a few minutes to loosen dirt.

Rub the surface with a clean, damp cloth to remove dirt and the soap solution. If some dirt still remains on the surface, repeat this procedure.

### Fabric upholstery

Remove loose dirt with a vacuum cleaner. Using a mild soap solution, rub stained areas with a clean damp cloth. To remove soap, rub the areas again with a cloth dampened with water. Repeat this until the stain is removed, or use a commercial fabric cleaner for tougher stains. If you use a fabric cleaner, carefully follow the manufacturer's instructions and precautions.

### Leather upholstery

Remove loose dirt with a vacuum cleaner. Using a mild soap or saddle soap solution, wipe dirt off with a clean damp soft cloth. To remove soap, wipe the areas again with a soft cloth dampened with water. Wipe the areas dry with a soft dry cloth. Repeat this until the dirt or stain is removed, or use a commercial leather cleaner for tougher dirt or stains. If you use a leather cleaner, carefully follow the manufacturer's instructions and precautions. Do not use solvent type cleaners or abrasive cleaners.

**NOTE:**

- *In order to keep the leather upholstery looking good, it should be cleaned at least twice a year.*
- *If the leather upholstery becomes wet, immediately wipe it dry with a tissue paper or a soft cloth. Water may cause the leather to harden and shrink if it is not wiped off.*
- *When parking on sunny days, select a shady place or use a sunshade. If the leather upholstery is exposed to the direct sunlight for a long time, it may discolor and shrink.*
- *As is common with natural materials, leather is inherently irregular in grain and cowhide has spots in its natural state. These do not affect the performance of the leather in any way.*

### Seat belts

Clean seat belts with mild soap and water. Do not use bleach or dye on the belts. They may weaken the fabric of the belts.

### Vinyl floor mats

Ordinary dirt can be removed from vinyl with water or the mild soap. Use a brush to help loosen dirt. After the dirt is loosened, rinse the mat thoroughly with water and dry it in the shade.

### Carpets

Remove the dirt and soil as much as possible with a vacuum cleaner. Using a mild soap solution, rub stained areas with a clean damp cloth. To remove soap, rub the areas again with a cloth dampened with water. Repeat this until the stain is removed, or use a commercial carpet cleaner for tougher stains. If you use a carpet cleaner, carefully follow the manufacturer's instructions and precautions.

### Instrument panel and console

Remove loose dirt with a vacuum cleaner. Gently wipe dirt off with a tightly squeezed damp clean cloth. Repeat this until the dirt is removed.

**⚠ WARNING**

**Do not use chemical products that contain silicon to wipe electrical components such as the air conditioning system, audio, navigation system, or other switches. These will cause damage to the components. Do not spray water or any liquid directly on instrument cluster or any other electrical or electronic components. This may cause damage and/or lead to non-functioning of the part or may cause fire.**

55T110012

### Inside of the trunk window

**NOTE:**

*Wipe the window along the antenna wires or heat wires by a soft cloth dampened with water to avoid damaging these wires.*

84MM01001

## SPECIFICATIONS

### Vehicle identification

#### Chassis serial number

70TH12001

70TH12002

The chassis and/or engine serial numbers are used to register the vehicle. They are also used to assist a MARUTI SUZUKI authorized workshop when ordering or referring to special service information. Whenever you have occasion to consult a MARUTI SUZUKI authorized workshop, remember to identify your vehicle with this number. Should you find the number difficult to read, you will also find it on the identification label.

#### Engine serial number

70TH12003

The engine serial number is stamped on the cylinder block as shown in the illustration.

### Provision for AIS140: Intelligent Transportation System (ITS)

This vehicle has provision of Power Connector for fitment of AIS140 ITS device.

Battery power, Ignition & ground are available in speedometer connector as per below description.

55UM12005

#### Description of Signal

(1)	(+B) Battery
(2)	(IG) Ignition Supply
(3)	(GND) Ground

**FASTag (if equipped)**

As per Ministry of Road Transport and Highways, the FASTag (1) is mandatory for each vehicle for the purpose of electronic toll collection or any other purpose as may be defined by the Government of India.

In case of any damage to FASTag or replacement of front windscreen, please contact your nearest MARUTI SUZUKI authorized workshop.

70TH12033

**As seen from inside of the vehicle**

70TH12034

**NOTE:**  
The picture shown is for indicative purpose only. Internal structure of actual device mounted on vehicle may be different.

**As seen from outside of the vehicle**

70TH12035

**NOTE:**  
The picture shown is for indicative purpose only. Internal structure of actual device mounted on vehicle may be different.

- NOTE:**
- Any attempt to remove the tag from the windscreen will result in permanent damage to the tag.
  - Use of chemical cleaners to clean the windscreen area where the tag is mounted can damage the tag.
  - Use of any sharp objects on the tag can damage the tag.

## SPECIFICATIONS

### High Security Registration Plate (HSRP) (if applicable)

As per Ministry of Road Transport and Highways, every new vehicle must have HSRP.

HSRP contains;

- Front and rear HSRP, which will be fitted with 2 snap-locks each on number plate area.
- Third license plate on front windshield.

### Third License Plate

(1) Third license plate

### Third license plate - As seen from outside of the vehicle

- (a) HSRP issuing authority name
- (b) Vehicle registration number
- (c) Unique laser number - Front plate
- (d) Unique laser number - Rear plate
- (e) Date of 1st registration (in DD-MM-YYYY format)
- (f) Green strips (BS6 vehicle)

#### NOTE:

The picture shown is for indicative purpose only. Internal structure of actual label mounted on vehicle may be different.

#### NOTE:

- Any attempt to remove the third license plate from the windshield will result in permanent damage to the label.

- Use of chemical cleaners to clean the windscreen area where the label is mounted can damage the same.
- Use of any sharp objects on the label can damage the label.
- In the event of any replacement of the third license plate, may please contact the approved authority.

### Third license plate - As seen from inside of the vehicle

#### NOTE:

The picture shown is for indicative purpose only.

#### NOTE:

Color of third license plate (back) is as per HSRP regulation as defined by Ministry of Road Transport and highways.

## Fuel recommendation

### Petrol Engine

To avoid damaging catalytic converter, you must use unleaded petrol with an octane number (RON) of 91 or higher.

### Gasoline/Ethanol blends

Blends of unleaded gasoline and ethanol, also known as gasohol, are commercially available in the country and can vary with location. Gasoline Ethanol blend up to E20 can be used as fuel for this vehicle.

### Gasoline containing MTBE

Unleaded gasoline containing MTBE (methyl tertiary butyl ether) may be used in your vehicle if the MTBE content is not greater than 15%. This oxygenated fuel does not contain alcohol.

### CAUTION

Use of spurious, low quality, adulterated fuel can cause damage to the engine and engine auxiliaries, affect functioning of engine and degrade engine performance including but not limited to engine seizure.

### NOTICE

- The fuel tank has an air space to allow for fuel expansion in hot weather. If you continue to add fuel after the filler nozzle has automatically shut off or an initial blowback occurs, the air chamber will become full. Exposure to heat when fully fuelled in this manner will result in leakage due to fuel expansion. To prevent such fuel leakage, stop filling after the filler nozzle has automatically shut off, or when initial vent blowback occurs, if using an alternative non-automatic system.
- Be careful not to spill fuel containing alcohol while refueling. If fuel is spilled on the vehicle body, wipe it up immediately. Fuels containing alcohol can cause paint damage, which is not covered under the New Vehicle Limited Warranty.

### Setting mode of information display

When the ignition switch is in “ON” position and the vehicle is stationary, you can enter into the setting mode of the information display.

#### To switch to the setting mode

#### (1) Indicator selector knob

- 1) Push and hold the indicator selector knob (1) until the display shows “*LOCK*” (if equipped).
- 2) Turn and/or push the indicator selector knob (1) to select a function that you want to set up according to the chart in the next page.

- 3) Turn and/or push the indicator selector knob (1) to register settings of the following functions.

#### NOTE:

- As shown in the above illustration, “SEL” indicates on the display of currently setting item.
- To go back to the higher level display during operation, turn the indicator selector knob (1) to display “*bRCH*” or “*-bRCH*” and then push the indicator selector knob (1).

#### To exit the setting mode

Switch the display to show “*End*” and then push the indicator selector knob (1).

#### NOTE:

You can exit the setting mode by either of the following operations:

- Turn the ignition switch to “ACC” or “LOCK” position.
- Start driving your vehicle.

**Setting items**

In the setting mode, you can set up and customize the following functions.

Indication	Functions
 <p>CLoCK (if equipped)</p>	Time indication of clock "CL"
 <p>door</p> <p>d1</p> <p>d2</p> <p>d3</p>	Central door locking system "d1"
 <p>LIGHT</p> <p>L2</p>	Automatic door locking function "d2"
	Automatic door unlocking function "d3"
	Additional flashes of the turn signal "L2"

## SPECIFICATIONS

Indication		Functions	
<p><i>Sound</i></p> <p>↕</p> <p><i>ua-Hi</i></p> <p>↕</p> <p><i>ua-Mid</i></p> <p>↕</p> <p><i>ua-Low</i></p>	<p>→ <i>ua-Hi</i> ←</p>	Notification sounds " <i>ua-Hi</i> "

		Exit the setting mode " <i>End</i> "	

	Turn the indicator selector knob (1).
	Push the indicator selector knob (1).

**NOTE:**  
 Depending on vehicle's specifications, some items may not be displayed.

**Time indication of clock "CL"**

- CL-12h: 12-hour format (default setting)
- CL-24h: 24-hour format

**Central door locking system "d1"**

- d1-SL1: Unlock all doors by turning the key once
- d1-SL2: Unlock all doors by turning the key twice (default setting)

**Automatic door locking function "d2"**

- d2-SL1: Disable the automatic door locking function
- d2-SL2: Lock all doors when the vehicle speed reaches 15 km/h (default setting)

**Automatic door unlocking function "d3"**

- d3-SL1: Disable the automatic door unlocking function
- d3-SL2: Unlock all doors when the key is pulled out from the ignition switch (default setting)

**Additional flashes of the turn signal "L2"**

- L2-SL1: Turn signal flashes three times after the turn signal lever is returned (default setting)
- L2-SL2: Disable the additional flashes of turn signal

**Notification sounds "uo"**

- uo-HI, MID and LO: Adjust the buzzer volume. (Lowest volume level is LO and highest is HI, and default setting is MID)

**Initialization setting "dE-on"**

- dE-on: Initialize all settings
